

Table of Contents

Preface, Committees

Chapter 1: Plenary Lectures

Excellent Formability of Light Metals Sheets by Friction Stir Incremental Forming M. Otsu	3
---	---

Chapter 2: Extrusion and Drawing

Benefits of Using Diamond Dies for Cold Alternate Drawing of Magnesium Alloys V.S. Hristov and K. Yoshida	13
Ductility Improvement of High Carbon Steel Wire by Alternate Wire Drawing H. Nagashima and K. Yoshida	22
Improvement of Ductility with Maintaining Strength of Drawn High Carbon Steel Wire S. Gondo, S. Suzuki, M. Asakawa, K. Takemoto, K. Tashima and S. Kajino	32
Influence of Process Parameters on the Product Integrity in Friction Stir Extrusion of Magnesium Alloys D. Baffari, G. Buffa and L. Fratini	39
Manufacture of Magnesium Tubes with Gradient Hardness Distribution Using a Two-Stage Porthole Extrusion Die Y.M. Hwang, Y. Chen and S. Alexandrov	49
Numerical Optimization and Practical Implementation of the Tube Extrusion Process of Mg Alloys with Micromechanical Analysis of the Final Product A. Milenin, P. Kustra, D. Byrska-Wójcik, B. Plonka, V. Petránová, V. Hrbek and J. Němeček	55
Study on Wire Rod Drawing Process Using the Rotating Die G.Y. Tzou, D.C. Chen and S.H. Lin	63
The Effect of Equivalent Strain on Punch Load for Cold Backward Extrusion of Copper Cans T. Milek	68
The High Speed Wire Drawing Process of Steel Wires under Fluid Frictions Conditions M. Suliga	76

Chapter 3: Formability

Evaluation of Press Formability of Pure Titanium Sheets Q.T. Pham and Y.S. Kim	87
Formability and Surface Quality of Incrementally Formed Grade 1 Titanium Thin Sheets A. Formisano, L. Boccarusso, L. Carrino, M. Durante, A. Langella, F.M.C. Minutolo and A. Squillace	99
Formability of AA6082-T6 at Warm and Hot Stamping Conditions X. Luan, O. El Fakir, H.X. Gao, J. Liu and L.L. Wang	107
Formability of Explosive Welded Mg/Al Bimetallic Bar S. Mróz, P. Szota, T. Bajor and A. Stefanik	114
Investigation on Hardening and Softening Behavior of Steel after Rapid Strain Rate Changes J. Dierdorf, J. Lohmar and G. Hirt	121
The Influence of the Punch Shape and the Cutting Method on the Limit Strain in the Hole Expansion Test J. Krawczyk, Z. Gronostajski, S. Polak, K. Jaśkiewicz, W. Chorzępa and I. Pęczak	129
Thickness and Microstructure Analysis on Hot Gas Bulged Cup-Shaped Parts of Ti-22Al-24.5Nb-0.5Mo Y. Wu, G. Liu, Z.Q. Liu and B.B. Kong	138

Chapter 4: Friction and Lubrication

Evaluation of Tribological Performance of Lubricants and Nitrided Die for Hot Forming of Steel Using Tapered-Plug Penetration Test K. Asai and K. Kitamura	147
Extended Conical Tube-Upsetting Test to Investigate the Evolution of Friction Conditions M. Teller, A. Klubakov, M. Franzke, J. Lohmar and G. Hirt	157
Identification of Friction Coefficient in Forging Processes by Means T-Shape Tests in High Temperature R. Sethy, L. Galdos, J. Mendiguren and E. Sáenz de Argandoña	165
Investigation on Friction Conditions during a Severe Bending Deformation on a Thick Plate A. D'Annibale, M. El Mehtedi, A. Di Ilio, F. Gabrielli and L. Panaccio	176
Measurement of Coefficient of Friction in Hot Stamping by Hot Deep Drawing Test H. Sasaki, T. Mukai and A. Yanagida	184
Relationship between Molecular Structures of Organic-Sulfur Compounds and Metal Forming Performance T. Takaki, S. Ito, K. Kitamura, K. Yagishita and J. Shibata	190

Chapter 5: Micro- and Nano-Forming

Effect of Microstructure and Mechanical Properties Formation of Medium Carbon Steel Wire through Continuous Combined Deformation M. Polyakova, I. Calliari and A. Gulin	201
Influence of Servo Motion on Forming Limit of Thin Metallic Foils Using Micro Bulge Test R. Yamaguchi, T. Shimizu and M. Yang	208
Influence of Strain Gradient on Springback of Thin Pure Titanium Foils in Microbending Assisted by Resistance Heating Q. Zheng, T. Shimizu and M. Yang	215
Metallic Multilayered Materials Produced by Constrained Compression M. Kwiecień, Ł. Lisiecki, S. Bajda, J. Majta and M. Krzyżanowski	225
Multi-Resolution Material Hardening Law for CPFE Micro-Forming Analysis J.L. Feng, S.W. Wang and J.G. Lin	232
Shear Banding in Polycrystalline Aluminium and Copper Pre-Deformed by ECAP and Subsequently Plane Strain Compressed H. Paul and M.M. Miszczyk	240

Chapter 6: Microstructure and Properties

A Method of Determining Unified Viscoplastic Constitutive Equations for Hot Forging Simulations N.J. Politis, D.J. Politis, C.M. Davies and J.G. Lin	251
Deep Drawability and Bendability in Hot Stamping of Ultra-High Strength Steel Parts K. Mori, T. Maeno and Y. Yanagita	262
Effect of Different Quench Media on the Microstructure and Mechanical Properties of Large-Scale Low Alloy Steel Forgings E.I. Saldana-Garza, B.P. Wynne, R. Cerda-Rojas and R.D. Mercado-Solis	270
Effect of the Time between Last Deformation Pass and Accelerated Cooling on the Mechanical Properties in Nb and Nb-Mo Microalloyed Steels G. Larzabal, N. Isasti, J.M. Rodriguez-Ibabe, I. Gutiérrez and P. Uranga	281
Effect of Thermomechanical and Austenite Partitioning Processing on Microstructure and Mechanical Properties of 0.4 Carbon Steel Containing Aluminum A.I.Z. Farahat and M. Mohamed	291
Enhancing the Strain-Hardening Behavior of Hadfield Steel Using Ladle Treatment Technique M.K. El-Fawkhry, A.I.Z. Farahat and S.N. Ghali	302

Examination of the Effect of Variation in Stress Magnitude on the Amount of Transformed Retained Austenite in the Structure of TRIP Steel Wires M. Siemiński, S. Wiewiórska and Z. Muskalski	311
Hot Deformation and Microstructural Characteristics of Nitrogen Enhanced 316L Stainless Steel S. Kumar, B. Aashranth, D. Samantaray, M. Arvinth Davinci, U. Borah and A.K. Bhaduri	317
Investigation of Tensile and Compressive Creep Behaviour of AA2050-T34 during Creep Age Forming Process Y. Li, Z. Shi, Y.L. Yang and J.G. Lin	323
Investigation of the Unloading Yield Effect in Aluminum and Magnesium Sheet Metal Alloys at Room Temperature J. Degner, S. Suttner and M. Merklein	331
Investigation of Uniaxial Tensile Properties of AA6082 under HFQ[®] Conditions N. Li, Z.T. Shao, J.G. Lin and T.A. Dean	337
Microstructural Evolution of the Magnesium Alloy AZ31 with and without SiC Particles during Ultrasonic Melt Treatment K. Neh, M. Ullmann and R. Kawalla	345
Modelling Microstructure Evolution in ATI 718Plus[®] Alloy A. Reshetov, O. Bylya, M. Gzyl, M. Rosochowska and P. Blackwell	352
Modelling of Flow Behaviour of Magnesium Alloys C. Bruni	360
The Onset of the Austenite to Bainite Phase Transformation for Different Cooling Paths and Steel Compositions A. Pohjonen, M.C. Somani, J. Pyykkönen, J. Paananen and D.A. Porter	368

Chapter 7: Modelling of Metal Forming Technologies

Analysis of Material Flow in Oval Upsetting Using Mild-Wedged Die T. Nomura, C. Ngyuen, K. Kitamura and K. Matsunaga	379
Connection Strength of Additive Manufactured Tool Elements to the Substrate D. Junker, A. Fedorov, O. Hentschel, M. Schmidt and M. Merklein	389
Design of a Novel End-Effector for Kinematic Support in Incremental Sheet Forming J. Brüninghaus, Y. Volfson, J. Bickendorf and S. Brell-Cokcan	395
Determination of Processing Windows for the Hot Stamping of AA7075 Q.L. Zhang, K. Ji, O. El Fakir, X.C. Liu and L.L. Wang	402
Energy Efficient Servo Controlled Roll Levelling Machines E. Sáenz de Argandoña, E. Silvestre, D. Garcia, J. Mendiguren and L. Galdos	413
Experimental Investigation on Shape Evolution in Metal Forming Hybrid Process F. Makhdum, A. Conway and P. Blackwell	420
Improvement of Fatigue Strength of Hole Edge of Ultra-High Strength Steel Sheet by Punching Process Including Thickening Y. Abe, K. Mori and R. Kosaka	428
Influence of Burnishing Conditions on Burnishing Force and Application of Coated Roller in Inclined Roller Burnishing M. Okada, T. Hirokawa, N. Asakawa and M. Otsu	435
Influence of Cutting Processes on Edge Cracking Sensitivity of Bright Finishing Alloys M. Merklein, T. Gnibl, I. Tsoupis, M. Friedrichsen and J. Beck	443
Investigation of the Relationship between Material Flow and Rollover in Double-Sided Shearing Using Image Processing M. Sasada and J. Tamura	451
Joining of Stepped Shaft and Disc by Forming K. Hirota, K. Kitamura, Y. Ukai and K. Matsunaga	458
Microstructure and Mechanical Properties of Ti/Cu Clads Manufactured by Explosive Bonding at Different Stand-Off Distances W. Skuza, H. Paul, K. Berent, M. Prażmowski and P. Bobrowski	464
Optimized Cooling Strategies for Bainitic Forging Steels G. Eggbauer and B. Buchmayr	472

Prediction of Failure Mode in Hole Clinching of Al Alloy and Advanced High-Strength Steel G. Shen, C.J. Lee, J.M. Lee, G.S. Kang, J.H. Park, B.M. Kim and D.C. Ko	481
Prevention of Local Thinning and Springback in Hot Stamping of Thin Sheets Y. Nakagawa, K. Mori and T. Maeno	487
Process Effects in Short Cycle Stretch Forming of Tinplate Can Bodies M. Schneider and M. Liewald	494
Production of Aluminium Based Interpenetrating Phase Composites Using Semi-Solid Forming C. Seyboldt, M. Liewald and D. Heydt	502
Reducing Blanking Vibration with Active Vibration Control Using a Servo Press T. Murakami, M. Yang, H. Kishi, S. Mori, M. Ohkawa and E. Fujino	510
The Effectiveness of Cold Rolling for Residual Stress Reduction in Quenched 7050 Aluminium Alloy Forgings R. Pan, C.M. Davies, W. Zhang, Z. Shi, T. Pirling and J.G. Lin	521
Ultrasonic Wave Propagation Analysis for In-Process Monitoring of Stamping N. Hagino, S. Komiya, J. Endou and M. Ishihama	528
Ultrasonic-Assisted Metal Staking with 15 kHz Oscillation Frequency U. Leicht, M. Merklein and S. Engler	536
Ultrasonic-Assisted Upsetting of Steel with 15 kHz Oscillation Frequency M. Michalski and M. Merklein	544

Chapter 8: Numerical Analysis and Modelling

A Comparison of Input Data Used to Represent Phase Transformations during the Quenching of a Large Nuclear Forging M.P. Howson, B.P. Wynne, P.S. Davies, S.S. Al-Bermani and J. Talamantes-Silva	555
A Fast Three-Dimensional Model for Strip Rolling C. Overhagen and P.J. Mauk	566
Analysis of Void Closure during Open Die Forging Process of Large Size Steel Ingots N. Harris, D. Shahriari and M. Jahazi	579
An Analytical and Numerical Investigation on Flange Wrinkling Behavior in Warm Forming Process of AA5754 Using Macro-Textured Tool Design K.L. Zheng, L. Zhu, D.J. Politis, J.G. Lin and T.A. Dean	586
A New Approach for Void Closure in Bulk Metal Forming K. Kittner, J. Wiesner and R. Kawalla	595
A New Method Predicting Contact Length and Flattening in Temper Rolling J. Ilmola, A. Pohjonen, J. Larkiola and J. Nylander	605
Computer Simulation of the Combined Process "Helical Rolling-Pressing" A.B. Naizabekov, S. Lezhnev, A. Arbuz and E. Panin	614
Computer Simulation of Transformation during TRIP Steel Rod Drawing D. Konstantinov, K. Bzowski, A. Korchunov, M. Pietrzyk and R. Kuziak	620
Constitutive Equation Development to Model the Hot Forging of ZERON®100 Super Duplex Stainless Steel and Associated Microstructural Evolution J. Pennington, B.P. Wynne and G. Byrne	632
Crack Formation and Propagation Mechanism in the Punching Process of High Tensile Strength Steel Sheet T. Okano, K. Sakumoto, K. Yamazaki, S. Toyoda and S. Suzuki	643
Development of a Process Map for Wire Drawing of Pearlitic Steel by Finite Element Analysis Coupled with Damage Evolution Y.S. Lee	652
Development of the Technology of Various Large Bodies Manufacturing Based on Combined Methods of Deformation A. Pesin, E. Drigun, D.O. Pustovoytov and I. Pesin	659
Elastic-Plastic Thermomechanical Fatigue Analysis of Forging Dies A. Vlasov, N. Biba and S. Stebunov	667
Extension of the Freiburger Model of Spread for the Calculation of Material Flow during Rolling of Long Products to a New Material Group of Mg Alloys AZ31, AZ81, WE43 P. Adamyanets, M. Schmidtchen and R. Kawalla	677

Feasibility Study of Complex Sheet Hydroforming Process: Experimental and Modelling M. Mohamed, D. Carty, J. Storr, N. Zuelli, P. Blackwell and D. Savings	685
Finite Element Simulation of Heat Transfer during Cryogenic Asymmetric Sheet Rolling of Aluminum Alloys A. Pesin and D.O. Pustovoytov	692
Finite Element Simulation of Shear Strain during High-Ratio Differential Speed Rolling of Aluminum Alloy 5083 A. Pesin and D.O. Pustovoytov	700
Influence of Die Geometry on Drawing Force in Cold Drawing of Steel Tubes Using Numerical Simulation P. Bella, P. Buček, M. Ridzon, M. Mojžiš and Ľ. Parilák	708
Influence of Material and Tribological Modelling on the Prediction of Big Size Automotive Components Springback I. Gil, E. Mugarra, J. Agirre, J. Mendiguren, E. Sáenz de Argandoña and L. Galdos	713
Investigation into the Numerical Model Behaviour of Belleville Washers in Cold Roll Forming K.S. Tsang, W. Ion and M. English	719
Modelling Central Consolidation during Hot Rolling of Cast Products D. Farrugia	728
Numerical Investigation of the Material Behaviour during Compression Tests for Samples with Rough Surfaces Represented in Different Geometry Scale Factors M.A. Petrov, A.N. Petrov and P.A. Petrov	736
Numerical Modelling of AlSi7 Tubular Components Flowformed at Elevated Temperature M.F. Novella, A. Ghiotti, S. Bruschi and R. Capuzzo	753
Parameters Design of Discontinuous Dot Indenter in Fine Blanking Process with Different Thickness Workpiece F. Zhou, H.J. Mao, Y.X. Liu and L. Hua	762
Prediction of Forming Limit Diagram for AA5754 Using Artificial Neural Network Modelling M. Mohamed, S. Elatriby, Z. Shi and J.G. Lin	770
Prediction of Localized Necking Based on Crystal Plasticity: Comparison of Bifurcation and Imperfection Approaches H.K. Akpama, M. Bettaieb and F. Abed-Meraim	779

Chapter 9: Powder Forming

An Investigation of Direct Powder Forging of Nickel Superalloy FGH96 S. Fang, Z. Shi, Q. Bai, J.Y. Jiang, S.Y. Wang and J.G. Lin	793
Exploitation of Field-Assisted Sintering Technology (FAST) to Produce Pre-Forged Billets from Metastable Beta Titanium Alloy Powder E. Calvert, B.P. Wynne and M. Jackson	800
Methodology for Modelling Diffusion Bonding in Powder Forging Y. Wang, I.K. Mohammed and D.S. Balint	817
Supercritical Debinding of Environmentally Friendly Inconel 718 Feedstock to Metal Injection Moulding Process A. Royer, J.C. Gelin and T. Barrière	824
Unconventional Methods of Sintering Inconel 718 MIM Samples O. Dugauguez, J.M. Torralba, T. Barrière and J.C. Gelin	830

Chapter 10: Rolling

A Review of Microstructure and Microtexture of Tertiary Oxide Scale in a Hot Strip Mill X.L. Yu, Z.Y. Jiang, J.W. Zhao, D.B. Wei and J. Zhou	843
Hybrid Calculations of Bending Deformations for 20 Roll Cold Rolling Mill P. Mauer, B. Weyh and P.J. Mauk	856
Influence of the Deformation Method on the Microstructure Changes in AZ31 Magnesium Alloy Round Rods Obtained by the Rolling Process A. Stefanik, P. Szota, S. Mróz, T. Bajor and S. Boczkál	864

Microstructure and Mechanical Properties of Multi-Pass Warm Rolled Ti-6Al-4V Alloy of Different Microstructures Y. Xu, X.J. Yang and D.N. Du	871
--	-----

Chapter 11: Sheet Forming

Deep Drawing of One-Sided, Stiffness Increasing Sheet Metal Composites D. Hofmann and M. Liewald	879
Effect of Plastic Deformation on Elastic and Plastic Recovery in CP-Titanium S. Khayatzaheh, S. Rahimi and P. Blackwell	891
Fabrication of Deep Cup with Flange by In-Plane Stretch Forming Applying Compressive Force in Thickness Direction S. Kajikawa, T. Iizuka and T. Kuboki	897
Friction Stir Welding of Copper Alloy CuETP N. Sibalic and M. Vukcevic	907
Hot Stamping of Titanium Alloy Sheets into U Shape with Concave Bottom and Joggle Using Resistance Heating T. Maeno, Y. Yamashita and K. Mori	915
Influence of Geometrical Shapes and Sheet Thicknesses on the Dimensional Accuracy of Single and Assembled Parts T. Konrad, S. Schöllhammer, K. Roll and M. Merklein	923
Stability of a Suppression Method of Dent and Spring-Back in Zigzag Bending of Sheet Metal/Plate T. Kuboki, T. Yamada, S. Kajikawa and H. Abe	931
Studies on the Hot Forming and Cold-Die Quenching of AA6082 Tailor Welded Blanks J. Liu, A.L. Wang, H.X. Gao, O. El Fakir, X. Luan, L.L. Wang and J.G. Lin	941
The Influence of Strain Rate and Strain on the Behavior of Stress Relaxation in 980 MPa-Grade Dual Phase Steel Sheets K. Murasawa, H. Komine, Y. Otake, H. Sunaga, M. Takamura, Y. Ikeda and S. Suzuki	948

Chapter 12: Tube and Hydro Forming

Effect of Multistage Deformation during the Pipe Processing on Mechanical Properties of Steels Strength Grade X70-X80 G.E. Khadeev, D. Ringinen and L. Efron	957
Investigation about the Oil Pressure Rate in the Warm Hydroforming of an Al-Mg Alloy Component G. Palumbo, A. Piccininni, P. Guglielmi, V. Piglionico, D. Sorgente and L. Tricarico	963
Investigation on the Mechanical Properties and Formability of Ti3Al2.5V Tubes Deformed at Elevated Temperatures E. Simonetto, G. Venturato, S. Bruschi and A. Ghiotti	973
Numerical and Experimental Study on Sheet Hydroforming of 2A12 Aluminum Alloy C. Wang, M. Wan and W.N. Yuan	981
Production Technology for Precision Seamless Steel Tubes from the Perspective of Microhardness Changes M. Mojžiš, M. Ridzon, P. Bella, M. Martinkovič and L. Parilák	988
T-Shape Connector Hydroforming Process Analysis M. Paćko, J. Krawczyk, P. Bała, P. Paćko, T. Śleboda, K. Muszka, M. Hojny, M. Wojtaszek, G. Cios, J. Burdzy and R. Wydra	994
