# Table of Contents

Preface, Committee, Sponsor

## Chapter 1: Advanced Ceramic and Glass Materials

**Saman Tree Ash for Stoneware Glaze**  
S. Tansripraparsiri  

**Preparation of Cerium Dioxide Film by Anodization in Na₂C₂O₄-NH₃·H₂O-H₂O-(CH₂OH)₂ Electrolyte**  
X.Z. Liu, W.R. Rong, X.Z. Liu, X.H. Ren, J. Chen and Y. Zhu  

**Effect of Heat Treatment on the Crystal Structure of the Anodic Cerium Oxide Films**  
X.Z. Liu, Y.F. Ni, X.Z. Liu, L.T. Xia, J. Chen and X.Y. Zheng  

**Experimental Research on Preparation Technics of High-Purity Quartz Material**  
Q.D. Zhang, X.L. Li, Y.S. Song and G.Y. Zhou  

**Preparation of Bi₂WO₆ Powders with Micro-Carbon Spheres Acting as a Template by Refluxing Method**  
Y. Lin and H.F. Chen  

## Chapter 2: Composites, Polymers and Hybrid Materials

**A Molecular Dynamics Simulation Study on the Relationship between Hydrogen Bond and Damping Properties of AO-70/NBR Composites**  
J. Zhu, X.Y. Zhao, M. Song, Y. Han, L. Liu and S.Z. Wu  

**Effect of DFA Modification on Thermal Properties of Multifunctional Epoxy/Anhydride Systems**  
M.M. Yu, L. Fang, M. Yang, H. Li, M.S. Ren and J.L. Sun  

**Interaction between Polyaramidic Electrospun Nanofibers and Epoxy Resin for Composite Materials Reinforcement**  
S. Merighi, E. Maccaferri, J. Belcari, A. Zucchelli, T. Benelli, L. Giorgini and L. Mazzucchetti  

**Ply Orientation-Driven Path Planning with Multi Reference Paths for Robotic Fiber Placement on Mesh Surface**  
J.Z. Pei and X.P. Wang  

**Flame Retardant Effect of a Modified Intumescent Flame Retardant on a Rigid Polyurethane Foam**  

**A Comparison of the Polymer Matrix Behavior and Mechanical Properties of the Glass Reinforced Plastics and Glass Reinforced Epoxy Pipes under Different Oil Field Chemicals**  
M. Al-Samhan, A. Yussuf and S. Jacob  

**Flexural Properties and Vibration Behavior of Jute/Glass/Carbon Fiber Reinforced Unsataturated Polyester Hybrid Composites for Wind Turbine Blade**  
A. Murdani, S. Hadi and U.S. Amrullah  

**Experimental Evaluation of the Chill Casting Method for the Fabrication of LM-25 Aluminum Alloy-Borosilicate Glass (p) Composites**  
A. Hiremath and J. Hemanth  

**Effect of Graphene Oxide on Non-Isothermal Melt Crystallization Kinetics of Poly(Trimethylene Terephthalate)**  
K.Y. Wang and B. Li  

**Influence of Zinc Oxide Nanograins on Properties of Epoxidized Natural Rubber Vulcanizates**  
R. Suntako  

**An Alternative Crosslinking of Epoxidized Natural Rubber with Maleic Anhydride**  
N. Srirachya, T. Kobayashi and K. Boonkerd  

**Emission Spectra Analysis of Atmospheric Pressure DBD Plasma Being Processed by Polypropylene Non Woven Fabric**  
Y. Zhang, Q.N. Xu, Y.W. Li, T. Yang and Y.Z. Sun
Biocompatible Tough Hydrogels via Micellar Copolymerization of NIPAM and Stearyl Acrylate: Synthesis and Characterization
X.D. Xu, J. Liu, Y.P. Wu and J.P. Deng

Electrodeposition of Chitosan Composite Film and its Application for Protein Conjugation
T. Chen, C.L. Xiang, F. Xu and L.X. Sun

Chapter 3: Materials for Photonics, Opto- and Microelectronics

Optical Characterization of Quaternary AlInGaN Multiquantum Wells
Y.F. Wu and J.C. Lee

Polyester Gel Electrolyte with Three Dimensional Network for Efficient Quasi-Solid-State Dye-Sensitized Solar Cells
C.J. Shen, Q.Z. Huang, J.F. Shi, Y.Y. Fang, G. Xu and Y.Q. Ge

Analysis of Carrier Transport Mechanism for p-Type SnO Thin-Film Transistor
J. Qin and L. Qiang

Fabrication of Macroporous Silicon in Organic Electrolytes and their Luminescence
W.L. Li, W.J. Yang, M. Long, G.R. Li, Y. Ma, X. Zou, Y. Xu and Y.F. Li

Influence of Support Structure on the Ultraviolet Photoluminescence Enhancement from Graphene/ZnO Hybrid Structures
P.C. Zhang and Y.H. Zhou

Structures, Dielectric Properties and Luminescence Properties of Nb Doped Li$_2$TiO$_3$ Solid Solution Ceramics
F. Wang, C.F. Yao, Q. Zeng, H. Zhou and Z.Y. Zhou

Studies on the Structure and Properties of ZnSb Thin Films Deposited under Various Sputtering Conditions
H.J. Xu, J. Qin, P.F. Gao, W.M. Shi and L.J. Wang

Preparation and Properties of Glutaraldehyde Cross-Linked Silk Sericin Films
F.Y. Zhan, K.Y. Wang and M.M. Niu

Chapter 4: Nanomaterials and Nanofabrication

Effect of Preparation on Microstructure of Ag-Loaded TiO$_2$ Nanotube Arrays
S. Photharin and U. Tipparach

Fabrication of TiO$_2$ by Rotating Horizontal Anodization and its CO$_2$ Photoreduction Activity
S.S. Han, D. Li, Y.F. Chen and Z.K. Zhang

Antiwear Behavior of CuO Nanoparticles as Additive in Bio-Based Lubricant
M. Gulzar, H.H. Masjuki, M.A. Kalam, M. Varman and N.W.M. Zulkifli

Chapter 5: Properties and Processing of Structural Metals and Alloys

Quasi-Static Compressive Characteristics of Cu-Containing Closed-Cell Aluminum Foams
J. Wang, Z. Zhang, J. Ding, C.R. Qiu, X.C. Xia and W.M. Zhao

Semisolid Strip Casting of Aluminum Alloy by a Twin Roll Caster Equipped with a Channel Scraper
T. Haga, S. Nishida and H. Watari

Effect of Casting Conditions on Fabrication of Lotus Type Holes in Ingot Cast by Core-Bar Pulling Method
T. Haga, K. Toyoda and H. Fuse

The Removal of Impurity Silicon from Aluminum Melt by the Addition of K$_2$TiF$_6$

Effect of Boosting Velocity on Forming Quality of High-Strength TA18 Titanium Alloy Tubes in Numerical Control Bending
J. Fang, C. Liang, S.Q. Lu and K.L. Wang

Vertical Wall on an Aluminum Alloy Plate Fabricated by Friction Stir Forming
T. Ohashi, H.M. Tabatabaie and T. Nishihara
Multi-Objective Optimization in Electrical Discharge Machining of 6061 Al/SiC<sub>p</sub> Using RSM and NSGA-II
B. Singh, S. Kumar and J. Kumar

Fractal Characterization Analysis in CNC Milling Aluminium Alloy
Z.M. Zhang, B.L. Xing, J. Wang, H.Y. Cao and S.H. Li

Effects of Deformation and Annealing Temperature on the Microstructures and Hardness of Cu-29Zn-0.6Bi Brass
I. Basori, R. Gadhu and B.T. Sofyan

Study on Fractal Characterization Laws of Cutting Force in CNC Turning Aeronautic Aluminium Alloy 7075-T651
B.L. Xing, J. Wang, H.Y. Cao, S.Z. Zhang, W. Wei and Z.M. Zhang

Study on Surface Roughness of Al2024 Alloy during Shot Peening Process Based on Finite Element Method
X. Zheng and D.W. Gao

The Effects of Water Flow Rate on Copper Corrosion
M.H. Mahmood, Suryanto and M.H.F. Al Hazza

Annealing Effects in Nanograined Al-Cu-Mg Alloy Processed by Equal Channel Angular Pressing
H.H. Ktari, J.P. Couzine, J. Bourgon, Y. Champion and N. Njah

Effect of Quenching Treatment on Microstructure and Hardness of Mg-9Li-4Al-1Zn-0.5Y Alloy
C. Duan and J.L. Huang

Study on Aging Treatment Microstructure of Magnesium-Zinc Alloy
Z.L. Wang

Experiments of Drilling Titanium Alloy with Varying Operation Parameters
C.Y. Liu, B.S. Zhang and S. Shrestha

Simulation of Stress Field in High-Frequency Welded Pipe of Composite Aluminum Alloy
Z.W. Wang, X. Li and H. Chen

Depth and Horizontal Distance of Surface Roughness Improvement on Vertical Surface of 3D-Printed Material Using Ultrasonic Cavitation Machining Process with Abrasive Particles
W.L. Tan, M.S. Vohra and S.H. Yeo

A Grinding Wheel of Self-Lubrication with Solid Powder Lubricant and Centrifugal Impeller for Green Grinding Process of TC4 Alloy
Y.F. Ding, W.G. Huo, X.D. Su and L. Zhang

A Study of the Interaction between Abrasive Waterjet and Target by CFD and FEM Method

Ferrite-Martensite Dual Phase Treatment of AISI 1040 Steel and Mechanical Characterization
B.M. Gurumurthy, S.S. Sharma and A. Kini

WELDOX960 Low Alloy High Strength Steel Welding Automation Manufacturability Research
M. Hu

Evaluation of the Fire Resistance for Beams Designed with Fire Resistant Steel through a Fire Engineering Method
I.K. Kwon

Chapter 6: Building Materials

Mechanical Properties and Microstructure of Graphene-Cement Composites
R.S. Jiang and B.M. Wang

Effect of Silica Fume and Fly Ash on Compressive Strength and Weight Loss of High Strength Concrete Material in Sulfuric and Acetic Acid Attack

Effect of Fibers Length and Fibers Content on the Splitting Tensile Strength of Coconut Fibers Reinforced Concrete Composites
R.H. Lumingkewas, A. Husen and R. Andrianus
### The Evolution Analysis of Mechanical Properties of Marine Submerged Concrete Based on GRA
C.Y. Liang, C.X. Qian, W.C. Kang and H.C. Chen

### Effect of Carbon Dioxide Curing on Strength Development of Cement Mortar
M.G. Lee, W.C. Wang, Y.S. Huang, Y.M. Su and Q.Z. Jiang

### Numerical Modeling on the Stress-Strain Behavior of Sand via Disturbed State Concept Model
P.H. Tsai, Y.H. Liang and P.C. Lin

### Research Progress on the Effect of Stray Current on Properties of Cement-Based Materials in China
G.N. Li and B.M. Wang

### Study on the Effect of [Al\(_{13}\)]\(^{7+}\) over the Free Swelling Ratio of Expansive Soil

### Effectiveness of Non-Suction Controlled Method of Wetting-Drying Cycles for Unsaturated Compact Loess Material
Z. Hu and Y.Z. Cheng

### Chapter 7: Measurements and Modeling of Materials Properties and Behavior

#### Preparation of Polyaniline/Cu-BTC Composite and its Sensing Application for Ammonia
Y.J. Zou, Y. Yin, H.T. Zhang, F. Xu and L.X. Sun

#### Quartz Crystal Microbalance Coated with 18-Crown-6 Ether Film for 2,4,6-Trinitrotoluene (TNT) Vapor Detection
P. Phuvanatal and T. Phetchakul

#### Study on Methane Adsorption Capacity of Sensor Probe Based on Lead-Free Piezoelectric Resonance Modified by Zeolite X
J. Du, H.L. Du and Q.L. An

#### New Methodology of Controlling Mechanical Properties of Materials
R. Kotowski, V.I. Alshits, E.V. Darinskaya, M.V. Koldaeva, E.A. Petrzik and P. Tronczyk

#### Molecular Dynamics Simulation of the Variation in the Microstructure of a Polycrystalline Material under Tensile Load
T. Uehara

#### High-Precision Determination of Residual Stress of As-Sprayed and Ground WC-10Co-4Cr Coating Using Optimized XRD-sin\(^2\)ψ Technique
M.S. Zoei, M.H. Sadeghi and M. Salehi

#### Three-Dimensional Scanning Hall Probe Microscopy for Final Stage of Crack Growth of Chromium Molybdenum Steel SCM440
T. Nakashima and K. Kida

#### Measurement Model for Young's Modulus of Axially Functionally Graded Materials
X.L. Chen, L. Zhang and D.Y. Li

#### Modified Method to Predict Fatigue Crack Shape Based on Empirical Observation
T. Matsueda and T. Nakashima

### Chapter 8: Materials and Chemical Technologies in Environmental Engineering

#### Characterization and Photocatalytic Activity of SmMnO\(_3\) Prepared by Sol-Gel Process
J.Y. Min, L.L. Yu, P.S. Tang and H.F. Chen

#### Synthesis of TbMnO\(_3\) by Microwave Assisted Method and its Photocatalytic Activity

#### Preparation and Characterization of Pr\(_2\)Ti\(_2\)O\(_7\) by Sol-Gel Process

#### Preparation of Nanosized Ni\(^{2+}\)-Doped ErFeO\(_3\) by Microwave Assisted Process and its Visible-Light Photocatalytic Activity
L. Fang, Q. Yang, M.Y. Xu, J.W. Cao, P.S. Tang and H.F. Chen
Tunable Fabrication of Electrospun Polyvinyl Alcohol Nanofibrous Membrances for Effective Air Filtration
J.Y. Zhao, Z.L. Liu and J.C. Shan

Preparation and Characterization of YMnO$_3$ by Microwave Assisted Process

Preparation of Cobalt Phthalocyanine Supported Mg-Al Hydrotalcite and its Catalytic Activity for Degradation of Methylene Blue
M.X. Qian, J.L. Ma and M.H. Xu

Chapter 9: Chemical Geology and Chemical Engineering

Investigation on Jurassic Shale Gas Reservoir Characteristics from Northern Qaidam Basin
G.X. Xu, S.Z. Wang, X.R. Luo and Z.F. Jing

Water-Rock-CO$_2$ Interaction in Hot Dry Rock - A Review
G.X. Xu and S.Z. Wang

Bioleaching and Desulfurization of Pyrite Roasting Residues by NB Bacteria for the Recovery of Cu, Zn and the Magnetic Materials
X.L. Cui, H.E. Zuo, J.K. Wen, B. Wu and Y. Ning

Simulation on the Compression Molding Process of Biomass Material
G.Y. Xu, H.F. Gao, G.W. Huang and D.W. Zhou
