

Table of Contents

Preface

Chapter 1: MS-1: In Honor of Professor Hoon Huh

A Stress-Based Model for Shear Ductile Fracture

Y.S. Lou and J.W. Yoon

3

Constitutive Equations for Rubber under Abrupt Change in Strain Rate Direction

Y. Tomita and M. Uchida

9

Chapter 2: MS-2: Ductile Fracture

Investigation of X80 Line Pipe Steel Fracture during Tensile Testing Using Acoustic Emission Monitoring

T. Chuluunbat, A.G. Kostyryzhev and O. Marenych

21

An Analytical Solution of the Subsequent Drawing Force on Multistage Deep Drawing of Cylindrical Cup

Q.Q. Lin, Z.Z. Wang, Y.R. Peng, C.W. Hu, W.Z. Dong and Y.L. Wang

28

The Effect of Various Notches on the Prediction of the Ductile Fracture for SUS304 Sheets

S.J. Zhang, Y.C. Lu, Z.H. Shen and C. Zhou

36

Assessment of Newly Developed Ductile Fracture Criteria for Lightweight Metals

R.G. Chai, Y.S. Lou and J.W. Yoon

42

Forming Limit Evaluation with Perturbation Approach Considering Through-Thickness Normal Stress

Q. Hu, X.F. Li and J. Chen

48

A Graphical Method to Estimate Forming Limit Curve of Sheet Metals

Q.T. Pham, N. Duc Toan, J.J. Kim and Y.S. Kim

55

Chapter 3: MS-3: Multiscale Modelling of Mechanical Behaviours of Metals and Composites

Numerical Study on Bicrystalline Micropillar Compression Using High-Order Gradient Crystal Plasticity

Y. Tadano

65

A Computational Simulation of Martensitic Transformation in Polycrystal TRIP Steel by Crystal Plasticity FEM with Voronoi Tessellation

T.D. Trinh and T. Iwamoto

71

Development and Validation of Multiscale Thermo-Elasto-Viscoplastic Analysis Method for Plain-Woven Composites

G. Kubo, T. Matsuda, H. Nagaoka and Y. Sato

78

Development of a Decoupled Multiscale Analysis Method for Woven Composites

H. Nagaoka, T. Matsuda and T. Ogaki

89

A Hybrid Model for Studying the Size Effects on Flow Stress in Micro-Forming with the Consideration of Grain Hardening

M. Singh, A. Hossain and D.B. Wei

97

Chapter 4: MS-4: Intelligent Manufacturing and Forming Technology

Electro-Magnetic Forming of Fiber Metal Laminates

V. Glushchenkov, D. Chernikov, Y. Erisov, I. Petrov, S. Alexandrov and L.H. Lang

107

Microstructures and Mechanical Properties of Magnesium Alloy ZK60 Sheets after Multi-Pass Hot Rolling

Y.M. Hwang and Y.L. Wang

113

Forming Limit in the Nosing Process of Micro Copper Cups C.C. Chang, S.K. Pan and K.T. Yu	121
Springback Suppression of AZ31 Magnesium Alloy Sheet in Draw Bending at Elevated Temperature T. Katahira, T. Uemori, T. Yoshida, M. Takiguchi, T. Naka, K. Lawanwong and F. Yoshida	127

Chapter 5: MS-7: Advances in Constitutive Modeling for Metal Forming

Tensile Behavior of Ti-5Al-2.5Sn Alloy at Low Temperatures and High Strain Rates B. Zhang and Y. Wang	135
Thermal Deformation Behavior and Formability of High Temperature with Corrosion Resistance Alloy G.U. Jeong, J. Park, C.K. Jin, Y.H. Moon and C.G. Kang	142
Drop-Test Simulations to Investigate Collision Characteristics of Automobile Center-Pillar Structures According to Partial Quenching Area M.S. Lee, J. Park and C.G. Kang	151

Chapter 6: Mechanics and Modeling

A Plane Stress Yield Function Described by Multi-Segment Third Order Bézier Curves T. Amaishi, H. Tsutamori, T. Nishiwaki and T. Kimoto	163
Stress Compensation Method for Structural Shakedown Analysis H. Peng and Y.H. Liu	169
Measurement of Negative Poisson's Ratio of CFRP Laminates Using 3D Digital Scanning Method R. Oikawa, G. Kubo, T. Matsuda, K. Goto, N. Ohno and M. Arai	182
Numerical Analysis of the Impact Fracture of Metallic Glass Based on Free Volume Model T. Umeda and K. Mimura	188
Experimental Study on Crushing Resistance of Square CFRP Frusta under Axial Loading T. Pang, G.Y. Sun, D. Ruan, X.D. Huang and G.X. Lu	194
Dynamic Axial Compression of Square CFRP/Aluminium Tubes R.D. Hussein, D. Ruan, G.X. Lu, J.W. Yoon and Z.Y. Gao	202
A Three-Dimensional Formulation of Phase Field Model Representing Polycrystalline Solidification K. Sadamoto, Y. Tadano and S. Morita	208
Meshfree Analysis of Higher-Order Gradient Crystal Plasticity Using Nodal Integration T. Niino and Y. Tadano	214
Development of Bifurcation Analysis Method for Rate Dependent Materials D. Towata and Y. Tadano	220
Forming Limit Analysis of Hexagonal Metal Considering Volume Fraction of Deformation Twinning T. Koga and Y. Tadano	226
Three Dimensional Finite Element Simulation of Strip Shape and Flatness of High Strength Steel H.B. Xie, L.J. Li, T.W. Liu, E.R. Wang, X. Liu and Z.Y. Jiang	232
Macroscopic and Microscopic Non-Uniform Deformations of Polycrystalline Pure Copper during Uniaxial Tensile Test with High Stress Gradient A. Taniguchi, T. Maeyama, M. Uchida and Y. Kaneko	246
A Damage Mechanics Based Cohesive Zone Model with Damage Gradient Extension for Creep-Fatigue-Interaction J. Nordmann, K. Naumenko and H. Altenbach	253
Finite Element Calculation of Anisotropy of Hole Expansion in a Thin Steel Sheet with Six Degrees Polynomial Yield Function S.Y. Yang and W. Tong	260
A Springback Prediction of 1.5 GPa Grade Steel in Roll Forming Process for Automotive Sill-Side Inner Component H.S. Choi, J.W. Yoon, J.S. Lee and G.H. Kim	267

Chapter 7: Materials Processing

Data-Driven Compensation for Bulk Formed Parts Based on Material Point Tracking D. Maier, C. Hartmann, M. Till, C. Büdenbender, B.A. Behrens and W. Volk	277
Investigation of Stamping Tool Wear Initiation at Microscopic Level Using Acoustic Emission Sensors V.V. Shanbhag, B.F. Rolfe, N. Arunachalam and M.P. Pereira	285
Ultra-Thin Sheet Forming Analyses Considering Size Effects B.Y. Ghoo, J.H. Son, Y. Umezu, T. Hirashima and Y. Watanabe	295
High Temperature Deformation Behavior and Processing Maps of AZ31 Alloy Deformed in Tension versus Compression K.P. Rao, K. Suresh and Y.V.R.K. Prasad	305
Numerical and Experimental Study on ECAP-Processing Parameters for Efficient Grain Refinement of AA5083 Sheet Metal M. Gruber, C. Illgen, P. Frint, M.F.X. Wagner and W. Volk	315
Evaluation of Effect of Sample Size and Layer Direction on Mechanical Property of Specimen Manufactured by FDM-Type 3D Printer H. Akiyama, M. Uchida and Y. Kaneko	324
Mechanism of Gallling Generation Using TiCN Coating in Finish Blanking - Thermochemical Simulation and Elemental Analysis - T. Yamada	333
