

Table of Contents

Preface

Durable Architectural and Decorative Powder-Activated Concrete Using Waste-Crushing Stone Rocks S.V. Daletsky, Y.M. Kolitievsky, V.V. Nikonov, N.N. Sirotin and V.V. Yudaev	1
Dry Mixes Based on Zeolite-Containing Rocks O.V. Chumakova	17
Development of Composition and Technology of Wood-Slag Composite Material S.V. Kolobova	31
Compositions Based on Nanosized Powders Carbides of Tungsten and Titanium, Obtained by the Method Self-Propagating High Temperature Synthesis for the Modification of Gray Cast Iron and Steel 110g13L M.G. Leontiev	43
The Decrease in the Concentration of Formaldehyde in the Environment of Aluminosilicate Sorbents A.V. Semenyutina, V.A. Semenyutina, A.S. Khuzhakhmetova and I.P. Svintsov	57
Obtaining Fine-Grained Concrete with the Use of Ash Hidrogelei and Conducting Final Testing A.V. Semenyutina, I.Y. Podkovyrov, G.V. Podkovyrova and V.A. Semenyutina	69
Technology of Building Composites on the Basis of Portlandite-Aluminosilicate Contact Condensation Systems of Hardening A.V. Tereshkin, I.V. Kirichkova and V.V. Kruglyak	79
Study of the Process of Self-Ignition of Coniferous Wood Samples O.V. Chumakova	91
Dry Mixes for Self-Leveling Floors Based on Composite Binder R.A. Abramov, M.S. Sokolov, M.N. Surilov and S.V. Derevianko	101
Research of Properties of Modern Construction Materials Based on Industrial Waste, Waste Wood and Metallurgical Industries R.A. Abramov, M.S. Sokolov and S.V. Derevianko	113
Automation of Spectral Control Nanocrystalline Protective Labels for Food Industry S.A. Krasnikov, S.V. Nikolaeva and O.V. Makeeva	125
