

Table of Contents

Preface

High Strength Steel Research in Australia

A. Brownrigg 1

The Progress of Thermo-Mechanical Control Process for HSLA Plate in Japan

K. Tsukada and I. Watanabe 17

The Steel Industry in Korea

Y.G. Kim 58

Ferrous Pearlite Transformation: A Review

B.A. MacDonald 62

Effects of Alloying Elements upon the Kinetics of the Proeutectoid Ferrite Reaction in Fe-C-X Alloys

H.I. Aaronson, W.T. Reynolds and M. Enomoto 85

Bainitic Structures in Low Carbon Low Alloy Steels

D.S. Sarma and A. Joarder 129

Study of Precipitation Kinetics in High Strength Low Carbon Ferrous Alloys

C.S. Pande, M.A. Imam, C.L. Vold, E. Dantsker and B.B. Rath 145

Enhanced Hardenability in Microalloyed Steels

J.B. Breedis and L.J. Cuddy 175

A Low Carbon High Strength Steel Containing Titanium and Boron

R. Datta, S. Mishra, V. Ramaswamy and A.J. DeArdo 193

Phase Transformation in Low Carbon Steels Bearing Niobium and Boron

S. Ghosh, S. Das and O.N. Mohanty 208

HSLA-100 Steels: Microstructure and Properties

M. Mujahid, A.K. Lis, C.I. Garcia and A.J. DeArdo 209

Endurance Diagram of High Strength Low Alloy Steels

V.M. Radhakrishnan and K.J.L. Iyer 237

Structure-Property Correlations in Microalloyed Steels for Structural and Line-Pipe Applications

V. Ramaswamy, S. Mishra and S.K. Chaudhuri 250

Microstructural Influences on Shear Instability in High Strength Steel

J.H. Beatty and M. Azrin 271

Void Nucleation and the Fracture Toughness of Ultra High Strength Steels

W.M. Garrison, J.L. Maloney and A.L. Wojcieszynski 281

Studies on Deformation Characteristics of Q & T and C-Mn Steels by High Temperature Bend Strength Tester

U.C. Patra, A.K. Panda and R.I. Ganguly 294

The Effect of Sulphur and Niobium on Machinability of Micro-Alloyed Steels

A.K. Roy, S.K. Bhattacharyya and G. Krauss 308

The Development of Thermo-Mechanical Controlled Processing of High Strength Low Alloy Steel

T. Tanaka 331

Experiences in the Design and Thermo-Mechanical Processing of High Manganese and Higher Silicon Ultra Low Carbon Bainitic/ 'MAR' Steels

A.K. Patwardhan 356

Thermo-Mechanical Processing and Properties of Forged High Strength, High Toughness Precipitation Hardened Steel

A.K. Khare 357

The Improvement of Toughness of Low-Carbon Ferrite-Pearlite Steels by Intercritical Annealing - A Review

W.C. Leslie 379

Some New Observation in Dual Phase Steels

B. Ghosh, S. Das and O.N. Mohanty 405

Retained Austenite and Its Effect on Trip Aided Low Carbon High Strength Multiphase Steels	
V.S. Dwivedi, B.K. Jha, R. Avtar and G. Thomas	406
Design of Strong, Ductile HSLA and Dual Phase Steels	
G. Thomas	437
Development of New Austenitic Fe-Mn-Al-C Steels for Automotive Applications	
Y.G. Kim, T.W. Kim, J.K. Han and R.W. Chang	461
Structure and Properties of Microalloyed HSLA Steels Resistant to Sour Gas	
R. Datta, K. Ravi and S. Mishra	472
High Strength Steels for Submarine Applications	
A. Brownrigg	490
Advances in High Strength Steel Technology for Naval Hull Construction	
E.J. Czyryca	491
New Gear and Bearing Steels and Coatings for Aerospace Applications	
M.G.H. Wells, J.S. Montgomery and R.M. Middleton	521
Strengthening and Toughening of Maraging Steel for Rocket Motor Case	
K. Kuribayashi and T. Yasuno	536
Low Carbon Structural Steels for Soft Magnetic Applications - An Appraisal	
O.N. Mohanty, V. Rao and S.P. Narayan	545
Development of High Strength Line Pipe Steels in Bhilai Steel Plant	
S. Bhattacharya, C. Dasgupta and K.C. Agrawal	561
Fluid Flow Consideration in the Production of Advanced Alloys	
J. Szekely	575
Weldability of Dual Phase HSLA Steels	
N.K. Batra and S.P. Gupta	576
The Development of High-Strength, Cooling-Rate Insensitive Ultra-Low-Carbon Steel Weld Metals	
M.G. Vassilaros and E.J. Czyryca	587
Fracture Toughness and Microstructural Characteristics in Submerged Arc Welded HSLA-80 Grade Steel	
S.K. Sen, S.K. Dhua, D. Mukherjee, S. Mishra and B.B. Rath	602
Modelling of Welding in Low Alloy Steels	
B.V. Kumar, A. Biswas, A. Seshukumar, R.N. Ghosh and O.N. Mohanty	627
ICFA-92 - Planel Discussion - The Scenario of Low Carbon Ferrous Alloys	
O.N. Mohanty	644
