

Preface

This issue of the journal focuses on the advances in engineering science with special attention to the building materials and materials for environmental applications. The main topics include Constructional and Engineering Materials, Structure of materials characterization and testing, the Influence of An Infill, Environmental and Green Materials. the content in this issue provides a modern view of the aims in the development of environmentally friendly building materials and solving the problems associated with environmental safety and enhancement and the achievement of sustainable development also the current issue deal with anew research in green engineering.

Thank you,

Editors

Prof. Dr. Ghassan H. Abdul Majid, Scientific Committee Chair.

Prof. Dr. Salah Al-Bermamy, Organizing Board Chairs.

Dr. Ahmed J. Obaid, Technical Program Chair.

Dr. Laith A. Alasady, Advisory Board Chairs.
