

Preface

It is an honor for us to introduce you to the proceeding of the selected peer-reviewed papers presented at the Life Sciences, Materials, and Applied Chemistry symposium as part of The 6th International Conference on Science and Technology (ICST 2020), which was held in Yogyakarta, Indonesia, 7-8 Sept 2020.

The volume includes 59 selected papers from 81 submitted papers to the conference from universities, research institutes, and industrial sectors across the globe. Each contributed paper has been strictly peer-reviewed by dedicated reviewers. The reviewers are experts in the field from various countries. The collection offers the readers the latest research results from the particular areas of life sciences, materials engineering, and applied chemical technologies.

We wish to thank all the reviewers for the invaluable comments and suggestions and the organizing committee for arranging all the needed facilities for the successful conference. We do hope that the proceeding would contribute generously to the advance of science and technology, especially in the field of chemistry and its related areas.
