

## Preface

It was my great pleasure and honor to extend a warm invitation to the 6th International Conference on Composite Materials and Material Engineering (ICCMME2021) held during January 12-14, 2021, as a virtual conference. ICCMME2021 was originally scheduled to be held in Bangkok, Thailand but the onsite presentation was replaced by the online presentation due to the pandemic of COVID-19.

ICCMME was one of the most important conferences that bring our members together from around the world to share professional experiences, expand our professional networks, and receive updates on the latest advances in the field of composite materials and material engineering.

The ICCMME conferences were organized every year in rotation with the Asian countries. Following the success of the 1st ICCMME2016 in Bangkok Thailand, the 2nd ICCMME2017 in Chengdu China, the 3rd ICCMME2018 in Singapore and the 4th ICCMME2019 in Tokyo Japan, 5th ICCMME2020 in Seoul, South Korea. We hoped to bring you another exciting conference this year 2021.

ICCMME2021 prepared diverse programs, including plenary, keynote and oral, and poster sessions. We were ready to reach out and listen to various and valuable voices from professionals and industry colleagues globally and were willing to reflect their wishes into the program, serving as a bridge between them and beyond.

As a program chair of ICCMME2021, we were certain that virtual ICCMME2021 was a memorable experience for you both on personal and professional grounds. Your participation made the conference more valuable and successful. We believed that this conference surely serve as one of the most rewarding and memorable meetings for all of us.
