

Table of Contents

Preface

The Synthesis of a High Quality, Low Cost Silicon Nitride Powder by the Carbothermal Reduction of Silica G.A. Cochran, C.L. Conner, G.A. Eismann, A.W. Weimer, D.F. Carroll, S.D. Dummead and C.J. Hwang	3
Carbothermal Reduction Processes for the Preparation of Si₃N₄ Based Ceramic Powders C. Bishop, C.C. Anya and A. Hendry	9
Effect of Impurities on the Formation of Silicon Nitride by Carbothermal Reduction-Nitridation of Fine Hydrated Silica Powders D.-. Peck, J.Y. Kim and S.W. Choi	15
A Comparative Study of Three Silicon Nitride Powders, Obtained by Three Different Syntheses F.K. van Dijen, A. Kerber, U. Vogt, W. Pfeifer and M. Schulze	19
Synthesis of Si₃N₄ Fibres by Gas-Phase Process U. Vogt, H. Hofmann and V. Krämer	29
Synthesis of Silicon Nitride Powders in an RF Plasma Torch, and Studies of Their Sintering Behaviour J. Szépvölgyi, I. Mohai-Toth, I. Bertóti, E. Gilbart and F.L. Riley	35
Synthesis of Si₃N₄ And Si₃N₄-SiC Powders by an RF-Induction Plasma R. Mach, H.-. Klotz, K.-. Suhrke, H. Drost, F. Oleszak, G. Lacayo, K. Sulzewesky and I. Dörfel	41
Ultra Fine Crystalline Silicon Nitride from a Continuous Gas Phase Plasma Route T.A. Jennett, P.D. Harmsworth and A.G. Jones	47
Parameters Controlling the Synthesis of β-Silicon Nitride from Silica S.K. Bandyopadhyay, A.S. Sanyal and J. Mukerji	55
Preparation of Rod-Like β-Si₃N₄ Single Crystal Particles K. Hirao, A. Tsuge, M.E. Brito and S. Kanzaki	63
Si-Nanopowder: A Material for Synthesis of Si₃N₄ and Joining of Si₃N₄-Parts A. Eiling and G. Passing	67
Investigations on the Synthesis of Fine-Grained, High-Purity β-Si₃N₄-Powder by Crystallization of Amorphous Precursors R. Brink and H. Lange	73
New Materials in the System Si-(N,C)-B and Their Characterization H.-. Baldus, M. Jansen and O. Wagner	75
From Octamethylcyclotetrasilazane (OMCTS) via Crystalline Silicon Nitride Imide Si₂N₂NH to α-Si₃N₄ S. Schaible, R. Riedel, F. Aldinger and U. Klingebiel	81
A Synthesis of Mono-Crystalline Silicon Nitride Filaments K.J. Hüttinger and T.W. Pieschnick	87
Crystallization of Amorphous Silicon Carbonitride Investigated by Transmission Electron Microscopy (TEM) M. Friess, J. Bill, F. Aldinger, D.V. Szabó and R. Riedel	95
Processing and Properties of Carbon Containing Silicon Nitride Ceramics Derived from the Pyrolysis of Polyhydridochlorosilazanes M. Seher, J. Bill, R. Riedel and F. Aldinger	101
Nanosized Si₃N₄/SiC-Powders by Polysilazane/Polycarbosilane-Pyrolysis G. Boden and M. Keuthen	107
The Relationship between the Structure of Polysilazane Precursors, the Pyrolysis Conditions and their Final Ceramic Products D. Bahloul-Hourlier, M. Pereira and P. Goursat	113
Microstructural Design of Silicon Nitride with Tailored Properties A. Bellosi and G.N. Babini	117
Some New Aspects of Microstructural Development During Sintering of Silicon Nitride H. Feuer, G. Woetting and E. Gugel	123
Self-Reinforced Silicon Nitride for Cutting Tool Application A.R. Prunier and A.J. Pyzik	129

Microstructure Control in Si₃N₄ by Particle Coating C.M. Wang and F.L. Riley	135
The Effect of Powder Modification on Sinterability, Microstructure and Properties of Si₃ N₄ H. Schubert, J. Deuerlein, U. Neidhardt, H. Lange, F. Aldinger and E. Muschelknautz	141
Microstructure and Mechanical Properties of Si₃N₄ Densified with ZrO₂ and Al₂O₃ Z.S. Rak and P.J. van Tilborg	147
Si₃N₄ Ceramics Formed with Different Metal Oxide Additives - Control of Microstructure and Properties M. Knutson-Wedel, L.K.L. Falk and T. Ekström	153
Microstructural Features of Polycrystalline Si₃N₄ with Different α to β Phase Ratios A.R. DeArellano-López, J. Martínez-Fernández and J.P. Singh	159
Correlation Among Powder Characteristics, Microstructural Development and Fracture Toughness of Si₃N₄ W. Dressler, M.J. Hoffmann and G. Petzow	165
Preparation and Properties of Fine Si₃N₄ Ceramics P. Sajgalík and J. Dusza	171
Effect of Powder Characteristics on Sintering Behavior of Silicon Nitride T. Yamada, Y. Kanetsuki, K. Fueda, T. Takashashi, Y. Kohtoku and H. Asada	177
Sintering and Microstructure of Si₃N₄-Materials W. Hermel, M. Herrmann and I. Schulz	181
Gas Pressure Sintering of Si₃N₄ in N₂/CO/(CO₂) Atmosphere U. Neidhardt, H. Schubert, E. Bischoff and G. Petzow	187
Pressability and Sinterability of the Silicon Nitride Powders J.J. Partyka, M. Wójczyk and A. Biel	193
Porosity and Shrinkage Behaviour of Silicon Nitride Compacts D. Linke, B. Röhl-Kuhn, T. Rabe, M. Buchholz and W. Ebert	197
Special Aspects of the Sintering of Carbothermally Synthesized Si₃ N₄ Powder F.K. van Dijen, A. Kerber and U. Vogt	203
High Temperature Interaction in Ultrahigh Dispersion Systems Si₃ N₄ -MeO	213
Processing and Mechanical Properties of Si₃N₄ with Low Content of Additives W. Wörner, H. Schubert, G. Petzow and H. Lange	219
SiO₂ Doped Si₃N₄ Ceramics T. Takashashi, M. Isomura, Y. Endoh and Y. Furuse	225
Transient Viscous Phase Reaction Sintering (TVPRS) for the Fabrication of Silicon Oxynitride Ceramics K.P. Plucknett and D.S. Wilkinson	229
Effect of Process Atmosphere on Dilatometer Controlled Sintering S. Siegel, M. Hermann and G. Putzky	237
Comparison of Properties in Silicon Nitrides Sintered with Oxide and Organometallic Additives W. Luxem and B. Saruhan	245
Effect of Iron Silicon Addition in the Sintering Behavior of Silicon Nitride J. Duailibi Fh. and J.C. Bressiani	253
Sintering Characteristics of Si₃N₄ with Additives from Y₂O₃-La₂O₃ Binary System P.K. Das	259
Method of Studying the SiAlON Wetting with Oxides of Silicon, Aluminium, Calcium and Titanium V. Petrovski	265
Oxidation of Silicon Nitride Sintered with Ytria and Magnesia Containing Nitrogen Rich Liquid S. Biswas, J. Mukerji and P.K. Das	271
PVD Coatings in the System Si-Al-O-N O. Knotek, F. Löffler and W. Beele	275
Morphological Development of Surface Scales During Long Term Oxidation of a Low Al-Substituted β'-Sialon M.J. Pomeroy, R. Ramesh and S. Hampshire	283

Long Term Uniaxial Mechanical Behaviour of a Pre-Corroded HP-Si₃N₄ at High Temperature	
C.S. Martins, M. Steen, J. Bressers and L.G. Rosa	289
Hydrothermal Reactions of Si₃N₄	
K.G. Nickel, U. Däumling and K. Weisskopf	295
Oxidation of Pure Si₃N₄: Spectroscopic Ellipsometry and Glancing Angle X-Ray Diffraction Studies	
J. Chen, H. Arwin, M. Heim and J. Sjöberg	301
Oxidation Behaviour of Si₃N₄-ZrN-AlN Ceramics	
C.C. Ge, W.S. Liu, Y.L. Xia and L.-. Chen	307
Hot-Salt Induced Degradation of a High Strength Silicon Nitride	
D.J. Baxter, V. Biasini, P. Moretto, T. Graziani and A. Bellosi	313
Surface Modification of Dense Silicon Nitride by Ion Beam Techniques	
C. Taut, M. Herrmann and A. Mucha	319
SiAlON Composite Ceramics	
T. Ekström	327
Crystallisation of Grain Boundary Phases in Silicon Nitride and SiAlON Ceramics	
M.H. Lewis	333
High-Resolution Electron Microscopy Studies on Si₃N₄ Ceramics	
H.J. Kleebe	339
Prospects for Nitrogen Ceramics	
K.H. Jack	345
Effects of Temperature on Viscosities and Elastic Modulus of Oxynitride Glasses	
S. Hampshire, R. Flynn, V. Morrissey, M.J. Pomeroy, T. Rouxel, J.L. Besson and P. Goursat	351
Modelling of Devitrification Kinetics in Sintered Silicon Nitride Ceramics	
H.-. Bossemeyer and P. Greil	357
Aspects of Stability of Amorphous Grain Boundary Phase in Silicon Nitride Ceramics	
A.K. Jha and S.J. Yoon	361
A Perspective on Segregants and Glassy Films at Grain Boundaries in Structural Ceramics	
R.M. Cannon	367
High-Temperature Dissociation Pressure of Silicon Nitride	
R.A. Andrievski, R.A. Lutikov and J.F. Khromov	369
Investigation of α-SiAlON Formation by High Temperature X-Ray Diffraction	
A. Ashkin, D. Ashkin and O. Babushkin	373
Formation of O'/β' SiAlON in the Presence of Yttria	
S. Bošković and T.Y. Tien	381
Stability Ranges of Li-α'-SiAlONs	
E. Günay, M. Redington and S. Hampshire	387
Subsolidus Phase Relationships in the Nd-Si-Al-O-N System	
A. Kaiser, H.-. Richter, M. Herrmann and W. Hermel	393
Experimental Study and Thermodynamic Calculations of the MgO-Y₂O₃-SiO₂ System	
S. Kuang, M.J. Hoffmann, H.L. Lukas and G. Petzow	399
Differential Thermal Analysis of Iron Containing Silicon Nitride	
B. Kumar and S.K. Sen	405
Microstructural Features in Sintered Si₃N₄/SiC Platelets Systems	
M.E. Brito, K. Hirao, M. Yasuoka and S. Kanzaki	413
Microstructural Characterisation of Silicon Nitride-Bonded Silicon Carbide	
D.P. Edwards, B.C. Muddle and R.H.J. Hannink	417
Ceramic Matrix Composites of Silicon Nitride with Conducting Particles	
A. Smith, A. Abed, H.J. Edrees and A. Hendry	423
Continuous SiC-Fiber Reinforcement of Reaction Bonded Silicon Nitride (RBSN)	
B. Kanka and H. Schneider	429
Pressureless Sintered Si₃N₄-SiC Composites	
Y.J. Song, V. Gunay, D. O'Sullivan, M.J. Pomeroy and S. Hampshire	433
Gas Pressure Sintering of Si₃N₄ - Based Particulate Composites and Their Wear Behavior	
D.S. Park, H.D. Kim, S.Y. Lee and S. Kim	439

Creep Studies in Si₃N₄ - TiB₂ Materials R.A. Andrievski, V.T. Ivannikov and V.S. Urbanovich	445
Elaboration and Characterization of Si₃N₄-BN Composites C. Doche and F. Thévenot	449
Dielectric Properties and Thermal Conductivity of SiAlON with Titanium Additives V. Petrovski	455
Influence of Processing on the Carbon Fibre/SiAlON Interface N. Dodds, H.W. Chandler and D.P. Thompson	461
Quantitative Description of Si₃N₄ Microstructures F. Mücklich, S. Hartmann, M.J. Hoffmann, G.A. Schneider, J. Ohser and G. Petzow	465
Quantitative Analysis of Si₃N₄ Microstructure Response on Interface Chemistry E. Meissner, S. Unger, H.J. Kleebe and G. Ziegler	471
Characterization of the Matrix Morphology in Si₃N₄ Ceramics Formed with Different Additives H. Björklund, L.K.L. Falk and J. Wasén	477
Nucleation and Growth of Si₂N₂O in Si₃N₄-Materials Employing Different Sintering Additives W. Braue, R. Pleger and W. Luxem	483
Development of Microstructure in Si₃N₄ Ceramics Formed with Additions of ZrO₂, Y₂O₃ and Al₂O₃ L.K.L. Falk	489
Study of Grain Boundary Phase in Silicon Nitride Materials by Raman Spectroscopy T. Laoui and O. Van der Biest	495
Grain Growth in Si₃N₄ J.S. Wallace and J.F. Kelly	501
Grain Boundary Fracture Resistance of Silicon Nitride R. Tandon and D.R. Clarke	509
R-Curve Behaviour and Subcritical Crack Growth of Reinforced Si₃N₄ Ceramics J. Dusza, P. Šajgalík and F. Lofaj	517
Die Pressing and Mechanical Behaviour of Silicon Nitride A Comparative Study of Three Different Powders D.F. Meyer, K.A. Drüsedau, T. Hollstein and A. Kerber	523
The Effect of Interparticle Contacts on the Mechanical Properties P. Arató	529
Mechanical Properties of Some Si₃N₄ Automotive Gas Turbine Rotor Ceramics J. Dusza, T. Lube, R. Danzer and K.-. Weisskopf	535
Elastic Properties, Hardness and Indentation Fracture Toughness of β-SiAlONs J. Piekarczyk, J. Lis and J. Bialoskórski	541
Ultramicrohardness Measurement of Silicon Nitride Films X. Cai, J.F. Wang, P.N. Zhou, X.H. Liu and Z. Zhen	547
Mechanical Properties of Silicon Nitride Bonded Silicon Carbide Refractory and its Relation with Microstructure R.P. Rettore and M.A.M. Brito	553
Application of Vickers Indentation Technique to Study the Slow-Crack Growth Behaviour in Silicon Nitride-Based Ceramic Matrix Composites A.G. Solomah, L. Esposito and A. Tucci	559
Thermal Shock Behaviour of Si₃N₄ G.A. Schneider and G. Petzow	563
Tensile Creep and Creep Rupture Behavior of HIPED Silicon Nitride T. Ohji, Y. Yamauchi and S. Kanzaki	569
High Temperature Structural Reliability of Silicon Nitride S.M. Wiederhorn, G.D. Quinn and R. Krause	575
Creep Rate and Stress Rupture Properties of NT154 Si₃N₄ M.N. Menon, H.T. Fang, D.C. Wu, M.G. Jenkins and M.K. Ferber	581
Tension/Compression Creep Asymmetry in Si₃N₄ W.E. Luecke and S.M. Wiederhorn	587

Improvements in the Creep Strength of HPSN by Optimization of Additive Content and Thermal Treatment	
A. Rendtel, H. Hübner and C. Schubert	593
Structure Dependent Creep and Crack Propagation in Silicon Nitrides	
E. Gehrke, H. Riedel, H. Schubert and G. Schneider	599
Thermal Shock and Thermal Cycling Behavior of Silicon Nitride Ceramics	
G. Kirchhoff, M. Holzherr, U. Bast and U. Rettig	605
Characterization of Two Si₃N₄ Commercially Available Ceramics	
M. Bougoin	611
Thermal Shock Properties of SiC Whisker-Reinforced Silicon Nitride Ceramics	
Y. Sato and M. Ueki	613
Tensile Creep Behaviour of Two Silicon Nitride Materials	
S. Osgerby, M.S. Peck and B.F. Dyson	617
Tensile Creep of a Silicon Nitride Ceramic	
R. Krause and S.M. Wiederhorn	619
Mechanical Properties of Sintered and Gas Pressure Sintered Silicon Nitride	
K. Rundgren, N. Modig, T. Nose and H. Kubo	625
Creep Rupture of Si₃N₄ Ceramics for Gas Turbine	
M. Mizuno and H. Usami	627
High-Temperature Creep Deformation of Hot-Pressed Silicon Nitride	
A.A. Postnikov and V.G. Verjovka	633
Tensile Creep of Sintered Silicon Nitride - Deformation Mechanisms and Lifetime Evaluation	
K. Kussmaul, J. Helm and S. Lauf	635
Microstructural Response of ZrO₂-Doped Si₃N₄ During Static Loading	
J. Göring, W. Braue and H.J. Kleebe	641
Temperature Dependence of Young's Modulus of Si₃N₄ Based Ceramics	
F. Lofaj and J. Dusza	647
Manufacturing Features, Structure and Properties of High-Porous Si₃N₄-Ceramics and SiAlONs	
A.G. Lanin, V.N. Antsiferov and V.G. Gilyov	653
Structural Evolution of Silicon Nitride-Titanium Nitride Composites During High-Temperature Creep	
Y.G. Gogotsi, G. Grathwohl and G.E. Khomenko	659
Self-Reinforced Composite Ceramics of the Si-Si₃N₄ System	
V. Vikulin and A. Nikonov	665
High Temperature Deformation and Fracture of Polycrystalline Silicon Nitride	
I. Merkel and U. Messerschmidt	667
Cyclic Fatigue of Silicon Nitride at 1000°C	
A. Bushby, F. Guiu, J. Knowles and M.J. Reece	673
Surface Chemical Interactions of Si₃N₄ with Polyelectrolyte Deflocculants	
V.A. Hackley, R. Premachandran and S.G. Malghan	679
Processing and Characterization of Si₃N₄ Made with Self-Propagating High-Temperature Synthesis	
J.T. Li, C.C. Ge and L.-. Chen	683
Injection Molding of Silicon Nitride	
E. Bezzel, N.P. Dalskov and K.A. Nielsen	689
Silicon Nitride-Nd₂O₃/Al₂O₃ Powders Prepared by Precipitation of the Oxide Additives	
H.-. Richter and W. Hermel	693
Slip Casting of Silicon Nitride and Properties of Sintered Body	
P.C. Rojas, G.J. Piderit, P. Toro and O. Wittke	699
Spray Freeze Drying of Non-Aqueous Si₃N₄-Slips	
T. Moritz	705
Thermos Construction Made of Si₃N₄ in the Heat Insulated Engine	
H. Kawamura	713
Applications of Silicon Nitride	
P. Popper	719

Practical Application of Silicon Nitride Ceramics for Sliding Parts of Rotary Engine M. Ueki, Y. Sato and K. Fukuda	725
Studies of Friction Pair Si₃N₄-Steel Wear Mechanisms I.I. Osipova and A.M. Kovaltchenko	731
Structure and Characteristics of Si₃N₄-Based Ceramic Cutting Tools G.G. Gnesin and V.P. Yaroshenko	737
Diffusion Bonding of Silicon Nitride with Low Carbon Steel Using Tungsten Layer N. Bhieh and W. Wlosinski	743
Analysis of Buried Nitride Layers Produced by Ion Implantation D. Fröse and D. Kollwe	749
Ceramic Wear Maps: Silicon Nitride S.W. Lee, M. Shen and S.M. Hsu	751
Brazing of Silicon Nitride Ceramics A.M. Hadian and R.A.L. Drew	757
Tribological Induced Microstructural Changes in Subsurface Layers of Si₃N₄-Based Materials I. Dörfel, W. Gesatzke, W. Österle and A. Skopp	763
