

Preface

The 11th International Conference on Advanced Materials Research (ICAMR 2021), in conjunction with the 5th International Conference on Civil and Building Materials, the 4th International Conference on Advanced Energy Materials, was successfully held during 21-24 January 2021 via a virtual channel. 2020 and 2021 are difficult years in which the pandemic has changed the practical of all global activities, including the organization of conferences. Thanks to the technological advancement, the power of the internet that made our conference's success through virtual face-to-face presentations, workshops, and discussions. Within the framework of the conference, a total of 13 sessions were held, in which over 95 presentations were given. By counting the geographical distribution of presenters, 28 were from China, 17 from Taiwan, 7 from India, 5 from Indonesia and others were from the rest of the world. The quality of papers that were presented is very high. Every submission was peer-reviewed to ensure the quality of works that are up to the world standard for presentation.

On behalf of the organizing committees, I would like to express my sincere appreciation to all individuals who have contributed to the conference. Special thanks are extended to committee members for their thorough review of all the submissions, which is vital to the success of the conference, and also to the members in the organizing committee and the volunteers who had dedicated their time and efforts in planning, promoting, organizing and helping the conference.

This proceedings provides a valuable insight for all researchers to reference. Many valuable research outcomes could be linked with further research directions and focuses. Once again, I would like to express my gratitude to all who have assisted in making the conference's success, and I wish to see you again at the next conference.

Your sincerely

Professor Alan Kin-Tak LAU
