

## Preface

The 5<sup>th</sup> International Conference on Materials Sciences and Nanomaterials (ICMSN 2021) and the 4<sup>th</sup> International Conference on Advanced Composite Materials (ICACM 2021) were held virtually via the ZOOM platform separately. Papers of ICMSN 2021 and ICACM 2021 are published together as one conference proceedings. The ICMSN and ICACM conference series was initiated to promote research results in advanced materials science, mainly focusing on nanomaterials and advanced composite materials. The conference provided a platform for discussions on real problems in nanomaterials, advanced composite materials, electronic materials, material chemistry, and materials processing technologies, to name a few. The program of each conference was composed of keynote speeches, invited speeches, and oral presentations. A best oral presentation was selected for each session by the session chairperson.

The conference proceedings of ICMSN and ICACM 2021 include selected papers submitted to the conference by participants from universities, research institutions, and the industry sector. They were selected based on their quality and relevance to the themes of the forums. All papers have been peer-reviewed by either conference committee members or international reviewers.

I would like to thank Prof. Alexander Korsunsky from Trinity College, Oxford, UK; Prof. Yasuhiko Hayashi from Okayama University, Japan; Assoc. Prof. Daoud Walid from the City University of Hong Kong, China; Prof. Sotirios Grammatikos from Norwegian University of Science and Technology, Norway; Assoc. Prof. Christèle Jaillet-Bartholome from University of Bordeaux, France; Prof. Alan Lau from Swinburne University of Technology, Australia; Prof. Qingsong Yu from University of Missouri, USA; Prof. Yoshimi Watanabe, Nagoya Institute of Technology, Japan; Prof. Yoshihiro Terada, Tokyo Institute of Technology, Japan for sharing their views and insights of their research fields with the rest of the participants. Special thanks go to the technical committee members and reviewers for their efforts in the reviewing process. I would also like to thank the group for organizing the conference and Trans Tech Publications Inc. for providing the platform to publish the conference papers.
