

Table of Contents

Preface

Chapter 1: Metals Properties and Processing Technologies

Hot Forging of Gravity Casted Al-Mg Alloy T. Haga, T. Sugishita, H. Fuse, H. Watari and S. Nishida	3
Structures and Mechanical Properties of Pure Titanium by Different Boriding and Nitriding Conditions T. Chen and S. Koyama	9
Effect of Casting Condition on Ripple Mark and Surface Crack of Roll-Cast Al-Mg Alloy T. Haga, T. Okada, H. Watari and S. Nishida	15
Surface Tension and Kinematic Viscosity of Multicomponent FeCuNbSiB Melt V.S. Tsepelev, Y.N. Starodubtsev, V.V. V'yukhin and N.P. Tsepeleva	23
Twin-Roll Casting of Al-4.8%Mg Alloy with Added Fe T. Haga, A. Kozai, H. Watari and S. Nishida	29
Structures and Mechanical Properties of Pure Titanium by Different Nitriding Temperatures T. Chen and S. Koyama	35
Effect of Die Edge Roundness on Crack Initiation near Punch Edge in Blanking K. Imada, Y. Maekawa, M. Sasada and T. Tanaka	41

Chapter 2: Properties and Processing Technologies of Composite Materials

Optimizing the Process Parameters of Hydro-Deep Drawing of Cylindrical Parts Using Fiber Metal Laminates F. Sumon, Y. Wang, W. Qiang and S. Khan	49
Effect of Friction Stir Forming Parameters and Heat Treatment on Mechanical Properties of Fibre-Reinforced Aluminium Alloy H.M. Tabatabaei, T. Ohashi and T. Nishihara	57
Influence of Heat Treatment on Microstructure and Performance of Degradable Mg Matrix Composites Reinforced with Hollow Glass Microsphere L. Liu, S.R. Yu, G. Zhu, E.Y. Liu and K. Wang	67
Comparative Study of Epoxy Composites Reinforced with Kenaf Fiber and Different Types of Microparticles H. Sosiati, M. Fahmi Rozi, C. Budiyanoro and S. Hamdan	73
Study on Composite Material Failure of Reinforced Thermoplastic Pipes under External Pressure L. Wang, M. Lou and Y.Y. Wang	83

Chapter 3: Semiconductors

Near Unity Absorbance and Photovoltaic Properties of TMDC/Gold Heterojunction for Solar Cell Application M.A.U. Khan, N.O. Adesina and J. Xu	97
--	----

Chapter 4: Biotechnologies

Dual Frequency Ultrasound-Assisted Esterification of Palm Empty Fruit Bunch Oil with Zeolite Heterogeneous Acid Catalyst T. Pholsawang, V. Seiththanabutra, P. Keawkannetra and T. Wongwuttanasatian	109
--	-----

Waste to Product: Feasibility of Egyptian Peanut Shell Transformation into a Useful Product

H.D. Gohoho, H. Noby, J.I. Hayashi and A.H. El Shazly

117

Chapter 5: Building Materials

Combined Use of Phosphoric Acid Modified Steel Slag and Protein Material for Retarding of B-Semi-Hydrous Gypsum

Y. Liu, J.H. Yang and F.Q. Zhao

129
