## Preface

## Chapter 1: Materials for Energy Storage and Energy Conversion Devices

|                                                                                                                                                                                                                                         |    |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| <b>Study on Dielectric Properties of (Ba<sub>0.90</sub>Sr<sub>0.10</sub>) TiO<sub>3</sub> Based Ceramic Capacitors for Energy Storage Applications</b><br>M. Ali, M.A. Amin and A. Nigah                                                | 3  |
| <b>Carbon-Nickel Oxide Nanofiber based Supercapacitors for Improvement of Electrochemical Performance</b><br>Z. Arslan, Z. Abdullah, A.W. Anwar, I.U. Haq and M. Awais Raza                                                             | 13 |
| <b>Optimization of Laser Induced Graphene Electrodes for Water Splitting Applications</b><br>A. Ali, S. Khalid, Q. Ahmed, S. Aneel and M. Abdul Basit                                                                                   | 21 |
| <b>Advanced Materials for Solar Cell Technology and Energy Simulation</b><br>M.A. Ansari, G. Ciampi, S. Mohiuddin and S. Sibilio                                                                                                        | 29 |
| <b>Comparative Study of Zinc Sulfide Thin Films Fabricated by Spin Coating and Rf Magnetron Sputtering as a Buffer Layer for 2nd Generation Photovoltaics</b><br>S.S.A. Shah, N. Ali, Z. Habib, S. Taimoor, N. Mehboob and F. Ur Rehman | 41 |
| <b>Increasing the Performance of Mixed Cation Mixed Halide Lead Based Perovskite Solar Cell by Passivating the Rare Interface: A SCAPS-1D Numerical Simulation Investigation</b><br>I. Ali, S. Rehan, H. Sadia and L. Siddiqui          | 51 |

## Chapter 2: Metal Welding

|                                                                                                                                                                                                           |    |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| <b>Corrosion Properties of Weld Metal in 304 Stainless Steel for Food Grade Using GTAW with Various Types of Backing Gas</b><br>N. Phuraya, I. Phung-on, S. Chaideesungnoen, T. Tangsri and P. Panmongkol | 61 |
| <b>Effect of Alloying Elements on Weld Characterization and Wear Resistance of Hardfacing of Structural Steel with Iron-Based Electrodes</b><br>J.S. Gill, A. Singh and O.V. Singh                        | 69 |
| <b>Aspects Regarding FSW and SFSW Welding of Copper Cu99</b><br>L. Botila, I.A. Perianu, M.C. Matei, E. Binchiciu, I. Duma and R.N. Popescu                                                               | 75 |
| <b>Influence of the Cylindrical Profile of the Welding Tool Pin on the Dimensions of FSW and SFSW Welded Joints in EN AW 1200 Aluminium Alloy</b><br>E. Dobrin, L. Botila and G. Mnerie                   | 83 |

## Chapter 3: Post-Processing of Additively Manufactured Materials

|                                                                                                                                                                            |     |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Enhancing Surface Properties of AM AlSi10Mg Components: A Study on Shot Peening and Silver Shell-Copper Core Coating</b><br>T. Rautio, M. Hietala and A. Järvenpää      | 93  |
| <b>Improving the Fatigue Performance of Binder Jet Manufactured 316L by Severe Shot Peening Surface Modification</b><br>T. Rautio, M. Hietala, M. Jaskari and A. Järvenpää | 101 |
