

Table of Contents

Preface

Incommensurate, Two-Layer Structures with Complex Crystal Chemistry: Minerals and Related Synthetics E. Makovicky and B.G. Hyde	1
Misfit Layer Compounds (MS)_nTS₂ (M=Sn, Pb, Bi, Rare Earth Metals; T=Nb, Ta, Ti, V, Cr; 1.08 G.A. Wieggers and A. Meerschaut	101
Superspace Description of Incommensurate Intergrowth Compounds and the Application to Inorganic Misfit Layer Compounds S. van Smaalen	173
Electron Microscopy Study of Incommensurate Intergrowth Structures 'MTS₃' S. Kuypers and J. Van Landuyt	223
Modulated Structures of Bismuth-Based Superconductors Y. Gao	273
Modulated Structures in High T_c Superconductors: An Electron Microscopy Study G. Van Tendeloo and S. Amelinckx	309
Incommensurabilities in High- T_c Superconducting Oxides H.B. Brom	341
Introduction to Physical Properties of Incommensurate Structures: From Modulated to Composite Structures H. Cailleau and C. Ecolivet	367
