

Preface

It was our great pleasure to welcome you to the 2019 International Conference on Materials Science and Engineering (ICMSE 2019) which held in Kyoto Research Park Corp, Kyoto, Japan, during Dec 26-28, 2019.

ICMSE 2019 provides an extensive platform for scientists, researchers and scholars to present their research results and newest findings in all fields of materials science and engineering, discuss the practical challenges encountered recommend better solutions for human life. This conference provides opportunities for the delegates to exchange new ideas and application experiences face to face, to establish business or research relations and to find global partners for future collaboration. Submitted conference papers will be reviewed by technical committees of the conference.

This proceeding presents a selection from papers submitted to the conference from universities, research institutes and industries. All of the papers were subjected to peer-review by conference committee members and international reviewers. The papers selected depended on their quality and their relevance to the conference. The volume tends to present to the readers the recent advances in the field of materials science and engineering and various related areas, such as biomaterials and nanomaterial, electronic materials, material chemistry, materials processing engineering and structural material, et.

We would like to thank all the authors who have contributed to this volume and also to the organizing committees, reviewers, speakers, chairpersons, sponsors and all the conference participants for their support to ICMSE 2019.
