

Preface

This book has 32 selected publications out of 79 papers presented at 2nd International Conference of Chemical, Energy and Environmental Engineering; ICCEEE 2019, held on 16-18 July, 2019, at the Egypt-Japan University of Science and Technology, Alexandria, Egypt. The selected papers were peer reviewed by international reviewers under Key Engineering Material Journal published by Scientific.net. The purpose of this book is to provide one volume for the scientific community on the most recent advances and state of the art in the field of materials synthesis and development related to Chemical, Energy and Environmental Engineering. Therefore, the editors were very keen to choose the original and high quality papers in order to have a unique and special book. Preparation of this book required so much efforts and work hours, while with cooperation with Scientific.net editing system the work was very smooth and fruitful. The editors would like to thank authors for their committed and valuable contribution to this book issue. Finally, the editors would like to thank Scientific.net team for their efforts and instrumental contribution to this book.
