

Table of Contents

Preface

Microstructural Identification and Control of Very Low Carbon Modern High Strength Low Alloy Steels	
T. Araki, M. Enomoto and K. Shibata	3
Thermal Cycling in the Austenite Temperature Region for Grain Size Control in Steels	
S.J. Mikalac, A.V. Brandemarte, L.M. Brown, M.G. Vassilaros and M.E. Natishan	11
The Heat Treatment of P/M Tool Steels	
A. Kulmburg and B. Hribernik	31
Surface Chemical Properties of Heat-Treated Industrial Steel	
S.K.E. Forghany	43
Heat Resistant Alloy Performance in the Heat Treatment Industry	
J.C. Kelly	53
Commercial Heat Treatment to 2000 AD	
T.L. Elliott	63
Towards the Optimization of Heat-Treatment in Aluminium Alloys	
C.W. Meyers, K.H. Hinton and J. Chou	75
Hardness, Melting Reactions and Heat Treatment of Al-Si-Cu-Mg Alloys Reinforced with Aluminiumoxide Particles	
M.J. Starink, V. Jooris and P. Van Mourik	85
Advances in the Heat Treatment of 7000 Type Aluminium Alloys by Retrogression and Reaging	
B. Cina and F. Zeidess	99
Effect of High Temperature Treatment on the Structure and Mechanical Properties of Aluminium Foundry Alloys	
V.S. Zolotorevsky, N.A. Belov, A.A. Axenov and D. Goutam	109
Heat Treatment and Phase Inter-Relationships of the Spray Cast Cu-15 wt%Ni-8 wt%Sn Alloy	
E.W.J. van Hunnik, J. Colijn and J.A.F.M. Schade van Westrum	115
Influence of Heat Treatment on the Microstructural and Chemical Evolution of Au₈₀Sn₂₀ Alloys for Welding Applications	
	125
Gas Flow Regulation in a Carburizing Heat Treatment of Steels	
P. Casadesus and M. Gantois	149
Plasma Overcarburizing of Chromium Steels for Hot Working and Wear Applications	
J.P. Souchard, P. Jacquot and M. Buvron	155
Influence of the Base Material Hardenability on Effective Case Depth and Core Hardness	
B. Vandewiele	169
Bending Fatigue and Microstructure of Gas-Carburized Alloy Steels	
K.A. Erven, D.K. Matlock and G. Krauss	183
Influence of Surface Microstructure on Bending Fatigue Strength of Carburized Steels	
A. Melander and S. Preston	199
Case Hardening in the Next Century	
F. Kühn and B. Lineberg	211
Model Description of Iron-Carbonitride Compound-Layer Formation during Gaseous and Salt-Bath Nitrocarburizing	
M.A.J. Somers and E.J. Mittemeijer	223
Control of the Compound-Layer Structure in Gaseous Nitrocarburising	
L. Sproge and J. Slycke	229
Kinetics of Compound-Layer Growth during Nitrocarburizing	
H. Du and J. Ågren	243
Nitriding of Sintered Steels and Nitrocarburizing of Steels in Fluidized Bed Furnace	
F. Cavalleri, G.F. Tosi and P.L. Cavallotti	249
The Structure and Properties of Ion Nitrided 410 Stainless	
M.F. Danke and F.J. Worzala	259

A Fracture Mechanics Approach to Toughness Characterization of Nitrided Layers	271
R. Roberti, G.M. La Vecchia and G. Colombo	
Influence of Thermochemical Treatment on Corrosion Resistance of Steels	279
J. Straus and D. Hitczenko	
Modified Process Parameters in Nitrocarburizing Improve Component Properties and Give Greater Economy	285
G. Wahl	
Plasma Nitriding and Plasma Carburizing of Pure Titanium and Ti6Al4V Alloy	301
P. Jacquot, M. Buvron and J.P. Souchard	
The Influence of Tempering and Surface Conditions on the Fatigue Behaviour of Surface Induction Hardened Parts	319
P.K. Braisch	
Induction Heat Treatment of Case Hardening Steels	335
P. Archambault, M. Pierronnet, F. Moreaux and Y. Pourprix	
Selective Surface Treatment of Gears by Induction Profile Hardening	345
G.D. Pfaffmann	
Induction Hardening of Cast Iron Cylinder Head Valve Seats	365
C.C. Lal	
TFX An Induction Heating Process for the Ultra Rapid Heat Treatment of Metal Strip	373
R.C. Gibson, W.B.R. Moore and R.A. Walker	
Production and Concentration of Magnetic Flux for Eddy Current Heating Applications	383
R.S. Ruffini and R.J. Madeira	
Reduction of the Tensile Stress State in Laser Treated Materials	393
J.T.M. de Hosson, J. Noordhuis and B.A. van Brussel	
Laser Surface Nitriding of Titanium and a Titanium Alloy	401
V.M. Weerasinghe, D.R.F. West and M. Czajlik	
Fatigue Properties and Residual Stresses in Laser Hardened Steels	409
R. Lin and T. Ericsson	
Coupled Growth in Eutectic Systems	417
S.M. Copley, E.Y. Yankov, J.A. Todd and M.I. Yankova	
CO₂ Laser Subcritical Annealing of 2Cr-1Mo Steel Laser Welded Joint	433
W. Cerri, G.P. Mor, M. Balbi and T. Zavanella	
Creating Tailor-Made Surfaces with High Power CO₂-Lasers	443
C.F. Magnusson, G. Wiklund, E. Vuorinen, E. Engström and T.F. Pedersen	
Electron Beam Surface Modification State of the Art (Review)	459
R. Zenker	
Electron Beam Mixing in Copper-Aluminium Surface Layers	477
D.G. Rickerby	
Surface Modification of Materials Produced by Dynamic Ion Mixing	485
J.P. Rivière and J. Delafond	
Surface Characterization and Tribological Improvements of Ti or (Ti+C) Implanted AISI M2 Steel	495
M.A. El Khakani, G. Marest, N. Moncoffre, J. Tousset and M. Robelet	
Ion Implantation for Biomaterials	505
J. Rieu, A. Pichat, L.M. Rabbe and M. Robelet	
Controlled Shot Peening Today	517
C.P. Diepart	
Chemically Vapour Deposited Alumina Coatings on High Speed Steel Cutting Tools	533
A.B. Smith and Z. Naeem	
Characteristics of Chromium Carbide Layers Produced on Martensitic Stainless Steel Using Different Chemical Vapour Deposition (CVD) Techniques	543
B. Eastwood, S. Harmer, J. Smith and A. Kempster	
Multicomponent Hard Coatings for WC-Co Sintered Carbides	553
B. Formanek, L. Swadźba, A. Maciejny and D. Rozlach	
Plasma Characteristics Related to Thin-Film Microstructures in Unbalanced Magnetron Sputtering Processes	563
S.L. Rohde	

Possibilities of Suppression of Droplets in Arc Evaporation Process	573
J. Vyskocil	
Further Developments of the Multiple-Mode Ionised Vapour Source System	581
P. Robinson and A. Matthews	
Deposition of Ti(C,N) Coatings by Arc Evaporation	591
O. Knotek, H.-. Prengel and J. Brand	
The Development of (Ti,Al)N and (Ti,Nb)N Ceramic Coatings Produced by Steered Arc Ion-Plating	599
J.P. Celis, J.R. Roos, E. Vancoille, S. Boelens and J. Ebberink	
Tribological Performance of Plasma Treated and Coated Surfaces	615
A. Leyland, P.R. Stevenson and A. Matthews	
Performance of TiN-, Ti(C,N)- and (Ti,Al)N-Coated Cutting Tools	623
W. König and D. Kammermeier	
Deposition of Stabilised Zirconia onto Metallic Substrates Using a DC Thermionic Triode Ion Plating Technique	633
A.S. James and A. Matthews	
A Comparison of Techniques for Producing Diamond-Like Carbon Coatings	643
P. Holiday, A. Matthews and A. Dehbi-Alaoui	
Combined Plasma Nitriding/PVD Processes	655
M. Zlatanović and T. Gredic	
Diffusion Treatment of Surface Coatings by Hot Isostatic Pressing	667
H.-. Steffens, J. Lebküchner-Neugebauer and M. Dvorak	
Depositions of Welded Coatings to Improve Hot Wear and Thermal Fatigue Resistance of Hot Die Steel	679
P. Gimondo, B. Grifoni and F. Sintoni	
A Study of the Adherence and Cracking by Deformation in a Multilayer Metallic Coating of Plain Carbon Steels	689
L. Sanchez, F. Gutiérrez-Solana, J.J. Gonzalez and J.A. Alvarez	
A Study of a Laser Irradiated Molybdenum Plasma Sprayed Coating on Steel	699
A. Koutsomichalis, H. Badekas and C. Panagopoulos	
Plasma-Spray Coatings on Carbon-Epoxy Substrates	709
F. Alonso, I. Fagoaga and P. Oregui	
Microstructure and Resistance to Cracking of Modified Protective Diffusion Coatings on Nickel-Base Superalloys	721
L. Swadźba, B. Formanek, A. Maciejny and J. Biedron	
The Use of Analysis in Surface Treatments	729
B.A. Bellamy	
Reliable Hardness Testing with a Fast Ultrasonic Method (UCI)	733
E. Schenuit	
Martens Hardening of Steel - Prediction of Temperature Distribution and Surface Hardness	741
H.M. Tensi and A. Stick	
Computerized Process Planning in Heat Treating Practice Using Personal Computers	755
T. Réti and M. Gergely	
Calculation of Distortion during Quenching of a Low Carbon Steel	767
A. Thuvander and A. Melander	
Computer Aided Simulation of the Temperature and the Distortion of Components during Heating Up in Heat-Treatment Furnaces	783
R. Arola, H. Martikainen and J. Virta	
Mathematical Modelling of the Heat Treatments (Quenching and Tempering) of a Cr-Mo-B-V, High Strength Low Alloy Steel	791
M. Isac, D. Pascota and S. Ciucă	
Integrated Computer Control of Induction Hardening	799
N. Kanetake	
Computer-Aided Optimization of Heat-Treatment Processes for the Automobile Industry	809
F. Kühn	
A New Generation of Process Computers for the Heat-Treatment Processes	821
W. Stein	

Oxygen Sensors - A Review of Their Impact on the Heat Treating Industry	
H.W. Bond	831
Electronic Flow Meter and Valve Integration with Computer Controlled Process Equipment	
J.E. Powalisz	839
Progress in Vacuum- and Plasma-Technology	
B. Edenhofer, F. Bless and W. Peter	849
Universal Vacuum Hardening Plant Application and Results	
H. Altena	859
Gas Quenching with Helium in Vacuum Furnaces	
B. Lhote and O. Delcourt	867
Multiflow Pressure Quenching in Vacuum Furnaces	
A. Kay	885
Trends and Developments in Vacuum Furnace Technology	
D. Pye	897
