

# Table of Contents

## Preface

## Chapter 1: Functional Materials

### Production of Activated Carbon from Cow and Goat Bones for the Treatment of Distillery Wastewater

O. Temitayo, I.F. Olaniyan, M.E. Emetere, J.B. Adeoye, O.A. Odunlami and O.G. Abatan 3

### Evaluation of Analgesic Property of Silver Nanoparticles Synthesized Using *Mitracarpus scaber* Aqueous Extract

T. Adesipe, E.E.J. Iweala and A. Adebayo 15

### Fabrication of Cellulose Nanofibers (CNFs)/carbon Dot (HCDs) Nanocomposite Films from Thatching Grass (*Hyparrhenia hirta*) Waste for Potential Application as Food Packaging Materials

N. Ndwandwa, F. Ayaa and M.O. Daramola 27

## Chapter 2: Steel and Alloys

### Solubility of Nitrogen in Austenitic Stainless Steel

S. Ghali, H. El-Faramwy and M. Eissa 43

### Mössbauer Spectroscopy Analysis of FeCo Nano-Particles Alloy Synthesized by Hydrothermal Method

M.W. Halimi, A. Guittoum, M. Hemmous and I. Bouelkreb 53

### Effect of Laser Power on the Synthesis of NbTiFeCrAl High Entropy Alloy Coatings

N. Malatji, M.B. Shongwe, P. Mpofu and L.R. Kanyane 59

## Chapter 3: Concrete Technologies

### Review Paper Properties of Fibers and Mortar of Slurry Infiltrated Fiber Concrete (SIFCON)

W.K. Tuama and G.L. Balazs 67

### Enhancing Concrete Durability Through Hybrid Waste Tire Steel Fiber Integration

A. Zia, I. Holly, J. Prokop and A. Ondak 77

### Model Uncertainty in European UHPC Standards: Insights from SIA-2052 and NF P18-710 Flexure Models

L. Simwanda, M. Sýkora and J. Marková 85

### An Innovative Approach to Evaluating the Freeze-Thaw Resistance of Concrete Using the Ultrasonic Pulse Velocity Test

D. Kocab and R. Dvořák 95

### Decarbonization of Concrete Structures from a Structural Engineer's Perspective

W. Derkowski 101

### Creep and Shrinkage Measured on Different Concretes for Bridges

V. Němcíč and J.L. Vitek 109

### The Properties of Hardened Concrete with Different Dosages of Recycled Concrete Aggregates

A. Ondak, I. Holly, J. Prokop, A. Zia and H. Kamal 117
