## Preface

## Chapter 1: Joining and Casting

|                                                                                                                                                                                                            |    |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| <b>Comparative Analysis of Plasma and Tig Welding on Mild Steel Bars</b><br>C.D. Nkalanga and P. Sándor                                                                                                    | 3  |
| <b>Conditions Forming to Blow-Hole Defects in Casting</b><br>L. Mádi and D. Molnár                                                                                                                         | 13 |
| <b>Literature Review of the Behaviour of Adhesive Joint Fatigue Performance</b><br>P. Pécsi-Kovács, Z. Weltsch and M. Berczeli                                                                             | 23 |
| <b>Numerical Simulation of Residual Stresses Induced by MIG Welding Considering Initial Conditions</b><br>M. Alhafadhi, M.A. Shehab, M. Alsigar, S.S. Kumar, S.S.S. Elfallah, A.A.A. Sahm and M.H.F. Helal | 33 |

## Chapter 2: Special and Functional Materials

|                                                                                                                                                                                               |    |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| <b>Theory for Rotation-Induced Band Splitting in Hollow-Pillar Phononic Metamaterials</b><br>F. Ge and L.Y. Zhao                                                                              | 45 |
| <b>A Review of Materials for Vehicle Structure Based on Specific Strength and Fatigue</b><br>O.Y. Kun, G.Y. Wang, Y.Q. Liu, X.C. Li and Y.B. Yan                                              | 57 |
| <b>Polymer Composite Based No-Core Fiber Structure as Refractive Index Sensor</b><br>N.N.H. Saris, N. Mohd Razali, T. Fukui, T. Ishigure, M. Othman, A. Hamzah and N.A. Daud                  | 77 |
| <b>Biochar-Containing Microcapsule/Recycled Polyethylene Composite with Temperature Regulation Capabilities</b><br>T.J. Yeh, H.H. Chen and Y.F. Shih                                          | 83 |
| <b>Effect of Sintering Conditions on Properties of Assisted Pressure Sintered Tungsten Materials</b><br>H. Hong, S. Lee, K. Sugio and G. Sasaki                                               | 89 |
| <b>Influence of Cockle Shell Ash and Lime on Geotechnical Properties of Expansive Clay Soil Stabilized at Optimum Silica Fume Content</b><br>M.S.I. Zaini, M. Hasan, A.R. Suwito and M. Hyodo | 95 |

## Chapter 3: Chemical Treatment and Chemical Production

|                                                                                                                                                                                                                                                    |     |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Photoconversion of Carbon Dioxide to Methanol Using Doped-Carbon Quantum Dots/TiO<sub>2</sub></b><br>M.W. Nugraha, K.C. Hui, N.Y. Harun, D. Floresyona, A. Nugroho, N.A. Kamal and N.S. Sambudi                                                 | 105 |
| <b>Thermodynamic Stability and Density Functional Theory Simulations of Gold Complexes in Ethaline DES Leaching of Refractory Ores at Varied Temperatures</b><br>J.K. Faigal, C.W.B. Ferrer, L.J.M. Villalobos, Z.G.I. Suaybaguio and G.T. Logrosa | 117 |
| <b>On the Selectivity and Self-Diffusion of CO<sub>2</sub> and H<sub>2</sub> in Mixed-Layer Zeolitic-Imidazolate Frameworks</b><br>K. Anand, M.R.A. Hamid, M.F. Ismail, W.A.W.A.K. Ghani and M.A. Razak                                            | 123 |
