## Preface

## Chapter 1: Alloys and Steel

|                                                                                                                                                                                                                      |    |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| <b>Impact of Artificial Aging Temperature Cycles on Microstructure and Tensile Behavior of TIG Welded Dissimilar Aluminum Alloys</b><br>A. Shazad, M.S.A. Siddiqui, A. Latif, F.M. Awan and S.M.J. Ali               | 3  |
| <b>Influence of Dual Soaking Durations and Variable Tool Feed Rates on Tensile Behavior of Friction Stir Welded Aluminum 2219</b><br>A. Shazad, M. Muzamil, J. Ali, S. Adil, A. Latif and S.Y. Khan                  | 15 |
| <b>Nanoindentation and Simulation Analysis of Deformation Behavior in Bulk Metallic Glass Alloy</b><br>S.S. Shah, M. Akif, M. Arsalan, S.A. Khan and A. Imran                                                        | 27 |
| <b>A Numerical and Experimental Model for P-TIG Welded CpTi/V/Inconel 718 Joint Incorporating Represented Volume Elements (RVEs) and Nanoindentation</b><br>M. Akif, M. Junaid, T. Shehbaz, F.N. Khan and F. Bangash | 37 |
| <b>Mechanical Characterization of Used Steel for Green Construction Practices</b><br>H. Siddiqui, S.M.U. Ali, M.S.A. Siddiqui, M.U. Khan and M. Mehdi                                                                | 47 |

## Chapter 2: Corrosion Protection

|                                                                                                                                                                                                                                      |    |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| <b>Biosynthesis of <i>Moringa oleifera</i> (Malunggay) Silver Nanoparticles as a Corrosion Inhibitor for A36 Mild Steel</b><br>T.A.R. Gallamos, D.F. Fajardo, M.C. Gidayawan, E.B. Carpio, E.E. Terciano, J.D. Binay and R.V.C. Rubi | 59 |
| <b>Properties of Epoxy Coatings Electrodeposited from Cationic Epoxy Suspensions Prepared by Different Secondary Amine's Volumes</b><br>N.S. Mohd Halim, N. Romzei, K.T. Lau, K.T.L. Yong, U.A.A. Azlan and A.H. You                 | 75 |

## Chapter 3: Functional and Special Materials and Technologies

|                                                                                                                                                                                                                                                                                                    |     |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Development of Recycling of Alloyed Industrial Waste by Carbothermic Reduction with the Determination of Structural and Phase Composition of the Obtained Materials</b><br>B. Tsybal, A. Petryshev, M. Motrych and O. Sharovatova                                                               | 87  |
| <b>The Effect of Additives to the Primary Material of a Current-Carrying Conductor on the Heating Temperature of an Electrical Wire</b><br>A. Katunin, O. Kulakov, Y. Zarichniak and I. Shutenko                                                                                                   | 99  |
| <b>Modeling of the Efficiency of Using Sorption Metal Hydride Technologies for the Purification of Gaseous Hydrogen from Accompanying Impurities during its Production, Storage and Transportation</b><br>O. Kondratenko, K. Umerenkova, V. Koloskov, O. Lytvynenko, H. Koloskova and V. Borysenko | 109 |
| <b>Carbonized Residues Electrical Resistance as a Result of the Supramolecular Structure Organization</b><br>D. Tregubov, A. Maiboroda, M. Chyrkina-Kharlamova and D. Zhurbynskyi                                                                                                                  | 133 |
| <b>Experimental-Statistical Models for Obtaining a Database on the Ignition Temperatures of Metal Fuel Particles in Gaseous Products of Thermal Decomposition of Fluoroplasts-Based Pyrotechnic Mixtures</b><br>O. Kyrychenko, V. Kovbasa, M. Kutsenko and I. Shkoliar                             | 145 |
| <b>Investigation of Mechanical Properties of Oxide Films on the Base Nb, Ta and Zr</b><br>V. Starikov, S. Starikova and V. Starikov                                                                                                                                                                | 155 |
| <b>Kinetic Aspects of Wood Hydration and Dehydration</b><br>S. Kulman, O. Horbachova, A. Vyshnevskyi and S. Mazurchuk                                                                                                                                                                              | 163 |

**Inspection of the Thermal State of the Insulating Material on the Surface of a Steam-Water Heat Exchanger under Operating Conditions**

T. Rymar and V. Rymar

179
