

Table of Contents

Preface

Validation of Thermoforming Simulation Models Prior to Parameterization Using Covariance-Based Input-Output Statistics – Assessing the Role of Thermomechanical Material Modeling	
J. Mitsch, T. Würth, J.P. Wank and L. Kärger	1
The Influence of Side-Dependent and Nonlinear Bending Behavior in Forming Simulation of Non-Crimp Fabrics	
J.P. Wank, L. Villing, B. Schäfer, J. Mitsch and L. Kärger	13
Microwave Resin Preheating Integrated with AI-Based Flow Front Monitoring for Liquid Composite Molding Processes	
V. Esperto, F. Rubino, F. Tucci and P. Carlone	23
Numerical Approach to the Simulation of Vitrimer Matrix Composites Manufacturing by Infusion and Coating by Cold Spray	
F. Tucci, A. Viscusi, B. Palmieri, A.S. Perna, A. Martone and A. Astarita	31
Numerical Investigation of the In-Plane Shear Behaviour of Aligned Discontinuous Fibre Composites under Processing Conditions	
H. Yuan, B.O. Yavuz, Y. Feng, I. Hamerton, B.C. Kim, S.R. Hallett and J.P.H. Belnoue	41
Fabric Patching: A Simple Approach to Mitigate Defects	
S. Chen, J.P.H. Belnoue and D.S. Ivanov	51
Machine Learning-Based Prediction of Forming-Induced Defects in Flax Woven Fabrics Using 3D Scanning and Haralick Texture Features	
O.H. Margoto, M.A. Batouei, V. Yang, Y. Abdin and A.S. Milani	59
Application of a Discrete Finite Element Modeling Approach to Form a Near-Uniform Thickness Compound Curvature Composite Part	
K.D. White and J.A. Sherwood	73
Process-Induced Deformations on Composite L-Shaped Part: Numerical Prediction and Compensated Mould Design	
E. Delsol, P. Olivier, B. Castanié, W. Azoti and L. Ratsifandrihana	83
Numerical Modelling of Intimate Contact for Thermoplastic Composite Joints	
P. Waroquier, A. Levy, S. Le Corre, J.L. Bailleul, J. Serra and E. Bertevas	91
Numerical Simulation of Liquid Resin Impregnation in a Real Digitized Reinforcement during Liquid Composites Molding Processes	
M. Boubaker, A. Cantarel and G. Debenest	103
Prediction of Residual Stress in Carbon Fiber Reinforced LM- PAEK Composites	
M.R. Gongati, L. Warnet, F. Rondina, E.T.J. Klompen and R. Akkerman	113
Simulation and Experimental Investigation of the LRI Process for Particle-Filled Resins in Aerostructure Applications	
N. Siddig, M. Mtibaa, M. Coupé and A. Guinoiseau	125
A Unified Simulation Environment for Thermoforming and Distortion Prediction of CFRTP Aircraft Components	
M. Duhovic, L. Handl, M. Müller, D. Schommer, T. Hoffmann, J. Schlimbach and T. Neumeyer	135
