

# Table of Contents

## Preface

<b>Gallig-Free Dry Net Shaping of Titanium and Titanium Alloy Eye-Glass Frame Parts toward Green Manufacturing</b> T. Aizawa, T. Kihara and T. Shiratori	1
<b>Selection and Investigation of Thermoplastic Materials as Forming Tools for Warm Dry Forming of Magnesium and High-Strength Aluminum Sheets</b> S. Vakulenko, K. Weigel and M. Dix	11
<b>Multiscale Simulation of Asperity Flattening with Realistic Surface Topography and Microstructure</b> A. Carley-Clopton, G. Winther, J. Hazrati and C.V. Nielsen	21
<b>Tool Wear Investigation Nickel Plated Steels for Battery Shell Production</b> J. Venema, V. Pater, J. Wörmann and M. Appelman	35
<b>Numerical Analysis of Roughness Transfer Mechanism during Skin-Pass Rolling</b> H.A. Derazkola, L. Jacobs, S. Kiakidis, T. van den Boogaard and J. Hazrati	43
<b>Modeling the Effect of Lubricants on Surface Conditions in Plane-Strain Upsetting Tests</b> L. Koch, H. Brüggemann, S.B. Tamilselvan, E. Scharifi and J. Lian	53
<b>Improvement of Wear and Corrosion Resistance of X46Cr13 Martensitic Stainless Steel by Cryogenic Treatment</b> I. Espinosa, S. Menargues, J.D. Gutierrez, J.A. Picas, J.A. Navas Lopez and M.T. Baile Puig	65
<b>Assessment of the Potential of CO as a Lubricant in Cold Forging of Low-Carbon Mild Steel</b> D.R. Alba, A. Weiss, G. Reichardt and M. Liewald	75
<b>A New Ex-Situ Method for Real Contact Area Determination for Sheet Metal Forming</b> A. Guinea, A. Aginagalde, E. Saenz de Argandoña, J. Mendiguren, W. Tato, I. Llavori, L. Blunt and A. Zabala	85
<b>Sliding Distance Dependency and Third Body Particle Influence in Flat Strip-Draw Testing of Aluminum Sheet for Friction Characterization in Automotive Stamping</b> L. Rocchi, J. Filzek and C. Leppin	97
<b>Towards Multi-Scale Friction Modelling for Bulk Sheet Metal Forming Applications</b> A. Barandiaran, A. Zabala, D. Abedul, J. Hazrati and L. Galdos	113
<b>Effect of Surface Texture on Sheet Metal Formability in Boundary Lubrication Regime</b> J. Hazrati and M. de Rooij	123
