Preface

Experimental-Numerical Approach to Determine the Heat Transfer Coefficients for Compound Forging Processes

N. Mohnfeld, M. Schute, S. Peddinghaus, J. Uhe and B.A. Behrens 1

Quasi-Isothermal Forging of Steel-Encapsulated Ti-6Al-4V Billets

J. Möckelmann, J. Peddinghaus, K. Brunotte and B.A. Behrens 13

Experimental Characterisation of TRIP Effects of 31CrMoV9 for Hot Forming

S. Peddinghaus, N. Mohnfeld, J. Uhe and B.A. Behrens 25

Workpiece-Based Signatures for Machine Diagnostics in Die Forging with Flash

C. Glaubitz, M. Rothgänger, E. Ortlieb, J. Peddinghaus and K. Brunotte 37

ML-Based Prediction of Tool Kinematics in Cold Forging of Tailored Hollow Shafts with Variable Wall Thickness

A. Weiss and M. Liewald 47

Process Optimization for Forging an AA6082 Automotive Upper Control Arm

L.J. Zhou, L.G. Wang, M.X. Shi, A.D. La Rosa, E.F.R.d. Costa and X. Ma 59

Experimental Characterisation of Service-Degraded H13 Tool Steel and Numerical Assessment of Die Plasticity Risk in Hot Forging of Nickel-Based Superalloys

J. Agirre, U. Ibarretxe, D. Abedul, N. Otegi and L. Galdos 73

Profile Contour and Flatness Control Model for Hot Strip Rolling

N. Souto, N. Legrand and S. Jimenez 85

Impact of Separating Agents on the Deformation Regime in Aluminum Roll-Cladding Processes

F. Muhr, B. Höniger, P. Niemietz, P. Frohn-Sörensen, B. Engel and T. Bergs 97

Relating the Cold Rolling Pass Reduction to the Microstructural Evolution and Formability in DP800 Steel

M. Hribsek, N. Fehleemann, I. Biermann and S. Münstermann 109
