

Table of Contents

Preface

| | |
|---|-----|
| PECVD of Silicon Dioxide from TEOS/Oxygen Mixtures | 1 |
| T.S. Cale and G.B. Raupp | |
| Analysis and Design of Plasma Chemical Reactions Based on Quantum Chemical Methods | 17 |
| K. Sato | |
| Advanced Simulation of Dry Etching Process Technology | 25 |
| J. Pelka | |
| Anisotropic ECR Plasma Etching with Low-Energy Ions | 39 |
| Y. Tobinaga, T. Miyano, K. Fujimoto, M. Fujito and H. Fujiwara | |
| High-Rate Sputtering with Electron Cyclotron Resonance and Electric-Mirror Excitation | 55 |
| M. Matsuoka | |
| Modified ECR Plasma Deposition | 79 |
| S. Nakamura, T. Akahori and S. Nakayama | |
| DC Saddle-Field Plasma-Enhanced Vapour Deposition | 89 |
| R.V. Kruzelecky and S. Zukotynski | |
| Theoretical Characterization of Electron Energy Distribution Function in RF Plasmas | 107 |
| M. Capitelli, G. Capriati, M. Dilonardo, C. Gorse and S. Longo | |
| Ion Energy Distributions and Sidewall Profiles in Reactive Ion Etching | 121 |
| P.W. May, D.P. Field, D.F. Klemperer and Y.P. Song | |
| Dissipative Structures and Nonequilibrium Phenomena in Plasma-Surface Interaction | 133 |
| Y.L. Khait | |
| Source of Atomic Oxygen and its Application to Material Oxidation | 159 |
| A.M. Pointu, M. Touzeau and O. Guymont | |
| Practical Applications of In-Situ Plasma-Etching Diagnostic Techniques | 171 |
| D.J. Thomas, P. Southworth, M.C. Flowers, N.J. Dartnell, R. Greef and Y. Liu | |
| Laser-Aided Diagnostics of Processing Plasmas | 191 |
| K. Muraoka and M. Maeda | |
| Radical Kinetics in Processing Plasmas: Optical Diagnostics of Gas Phase and Surface Reactions | 219 |
| J.P. Booth and G. Hancock | |
| Negatively Charged Particles in Fluorocarbon RF Etch Plasmas: Density Measurements Using Microwave Resonance and the Photodetachment Effect | 235 |
| M. Haverlag, A. Kono, G.M.W. Kroesen and F.J. de Hoog | |
| Biased Electron Cyclotron Resonance Chemical-Vapor Deposition of Silicon Dioxide Inter-Metal Dielectric Thin Films | 255 |
| P. Shufflebotham, M. Weise, D. Pirkle and D. Denison | |
| TEOS-Based Oxides: Deposition Dependent Properties | 269 |
| M. Saran and I. Emesh | |
| Plasma Enhanced Chemical Vapor Deposited Silicon and Silicon Dioxide Films for Indium Phosphide MISFET Technology | 285 |
| M. Shokrani and V.J. Kapoor | |
| Physical and Electrical Properties of Silicon Nitride and Oxynitride Films Prepared by Plasma Enhanced CVD | 301 |
| J. Vuillod | |
| Preparation and Properties of PECVD Silicon Nitride Films from SiH₄ + NH₃ and/or NF₃ and SiF₄+ NH₃ Gas Mixtures | 319 |
| C. Gómez-Aleixandre, O. Sanchez and J.M. Albella | |
| Bonding Configuration and Defects in Glow-Discharge Amorphous SiN_x:H Films Deposited at 300°C and 500°C | 335 |
| S. Hasegawa, Y. Amano, L. He, T. Inokuma and Y. Kurata | |
| Doped Glasses for ULSI-Technology: Integration of Molecular Engineering and Plasma-CVD | 359 |
| H. Treichel, J. v. Tomkewitsch and O. Spindler | |

| | |
|---|-----|
| Growth Processes and Defect Densities in Hydrogenated Amorphous Silicon Alloys | 381 |
| J. Robertson | |
| Sputter Deposition of Thin Films for High Mobility Poly-Si TFT Fabrication | 387 |
| T. Serikawa | |
| Ion Assisted Thin Film Growth in Dual Microwave/Radio Frequency Plasmas | 405 |
| L. Martinu and M.R. Wertheimer | |
| High Powered Pulsed Plasma Enhanced Deposition of Thin Film Semiconductor and Optical Materials | |
| I.P. Llewellyn, K.J.A. Sheach and R.A. Heinecke | 421 |
| Plasma-Enhanced Chemical Vapour Deposition of Coatings in the System Ti-B-N | 439 |
| J. Laimer, H. Karner, H. Störi and P. Rödhammer | |
| Plasma-Enhanced Metalorganic Chemical Vapor Deposition for High Temperature Superconducting Thin Film | |
| K. Ebihara and T. Ikegami | 457 |
| Low Pressure and Low Temperature Synthesis of Diamond Films Using Magneto-Microwave Plasma CVD | |
| J. Wei, H. Kawarada and A. Hiraki | 465 |
| Thermal Plasma Chemical Vapor Deposition | |
| J.V.R. Heberlein and E. Pfender | 477 |
| Thermally Sprayed Coatings for Electrical and Electronic Applications | |
| L. Pawlowski and P. Fauchais | 497 |
| ECR Plasma Etching Technology for ULSI | |
| S. Samukawa | 521 |
| Evaluation of Substrate Degradation in Plasma Etch Processes Using Thermal Wave Analysis | |
| M. Engelhardt | 541 |
| Plasma Etching of Patterned Tungsten | |
| S. Franssila | 565 |
| Microwave Plasma Oxidation of Silicon | |
| S. Kimura | 583 |
| Hydrogen Interaction with Disordered Silicon | |
| S. Ashok and K. Srikanth | 603 |
| Damage Assessment of Dry Etched III-V Semiconductors for Nanoelectronics | |
| R. Cheung | 619 |
| Reactive Ion Beam Etching for Microcavity Surface Emitting Laser Fabrication: Technology and Damage Characterization | |
| A. Matsutani, T. Tadokoro, F. Koyama and K. Iga | 641 |
| Alkane Plasma Etching of Gallium Arsenide | |
| V.J. Law, M. Tewordt, S.G. Ingram and G.A.C. Jones | 659 |
| Effects of ECR-Plasma Excitation in GaAs MBE Growth | |
| T. Shibata, N. Yamamoto, N. Kondo, Y. Nanishi and M. Fujimoto | 689 |
| Plasma Treatment of Polymers for Improved Adhesion Properties | |
| S. Nowak and O.M. Küttel | 705 |
| Study of Dry Development in Terms of Resist and Development Method | |
| N. Abe and T. Motoyama | 727 |
