## Preface

### Thermal Helium Desorption Spectrometry (THDS) as a Tool for the Study of Vacancies and Self-Interstitials

A. van Veen 3

### The Study of Point Defects in Metals by Perturbed Angular Correlation and the Mössbauer Effect

R. Sielemann 25

### On the Applicability of Rate Equations to Describe Defect Concentrations

W. Schüle 51

### The Rôle of Radiation Damage in BCC Metals in the Point-Defect-Model Controversy

W. Frank and A. Seeger 57

### The Nature of the Stage-III Defect in Nickel

A. Seeger and H. Kronmüller 65

### Muon Spin Relaxation Study of Defect Reactions in Electron-Irradiated Nb, Ta, and Al

D.M. Herlach, K.-. Döring, N. Haas, K. Fürderer, M. Gladisch, W. Jacobs, H.-. Mundiger, J. Rosenkranz, H. Orth, H.E. Schaefer, W. Schäfer, M. Schmolz, A. Seeger, K.-. Arnold and T. Aurenz 71

### Vacancies and Vacancy-Impurity Interactions in Metals Studied by Positrons

P.J. Hautojärvi 81

### The Interpretation of High-Temperature Experiments on Metals in Terms of Defect Concentrations

K. Differt, A. Seeger and W. Trost 99

### Vacancy Generation in Nearly Perfect Aluminum Single Crystals

T. Kino, A. Fujiwara, K. Mizuno and Y. Deguchi 105

### Positron Lifetime Spectroscopy and Trapping at Vacancies in Aluminium

H.E. Schaefer, R. Gugelmeier, M. Schmolz and A. Seeger 111

### Thermal Vacancies in the Noble Metals Cu, Ag, Au and in Pt Studied by Positron Lifetime Spectroscopy

H.E. Schaefer, W. Stuck, F. Banhart and W. Bauer 117

### Vacancy Formation in Thermal Equilibrium in Ferromagnetic Iron and Cobalt Studied by the Spin Rotation of Positive Muons

K. Fürderer, K.-. Döring, M. Gladisch, N. Haas, D.M. Herlach, J. Major, H.-. Munding, J. Rosenkranz, W. Schäfer, L. Schimmele, M. Schmolz, W. Schwarz and A. Seeger 125

### Migration and Formation of Vacancies in $\alpha$ -Iron

L. De Schepper, G. Knuyt, L.M. Stals, D. Segers, L. Dorikens-Vanpraet, M. Dorikens and P. Moser 131

### Temperature Dependence of Positron Trapping Rate in Quenched Gold and Cadmium

Y. Shirai, J. Takamura and K. Furukawa 137

### Vacancy Formation in Molybdenum and Tungsten Investigated by Positron Lifetime Measurements

R. Ziegler and H.E. Schaefer 145

### Monte Carlo Evaluation of the Migration Rate for Vacancy Diffusion in Solids

G. De Lorenzi, G. Jacucci, M. Marchese and C.P. Flynn 149

### Effects of a Positron on the Migration of a Vacancy and a Divacancy in Metals

O. Takai and M. Doyama 155

### Interactions between Point Defects and Migration Energies of Trivacancies in Metals

O. Takai and M. Doyama 161

### Positron Studies of the Recovery Behaviour of Quenched and Deformed Gold

P. Beasley, A. Alam and R.N. West 169

### Positron Studies of Vacancy Migration Behaviour in Quenched Nickel

P. Beasley, R.N. West and A. Alam 175

### Lattice Vacancies in Nickel Introduced by Electron Irradiation, Quenching and Cyclic-Deformation

M. Kiritani, M. Konno, T. Yoshiie and S. Kojima 181

|                                                                                                                                                                                                 |     |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Studies on the Vacancy Mobility in <math>\alpha</math>-Iron by High-Voltage Electron Microscopy (HVEM)</b><br>F. Phillipp                                                                    | 187 |
| <b>A Positron Annihilation Study of Electron Irradiated Antimony</b><br>N. de Diego, C. Hidalgo and P. Moser                                                                                    | 193 |
| <b>Vacancy Migration Enthalpy in Tungsten at High Temperatures</b><br>J.N. Mundy, S.T. Ockers and L.C. Smedskjaer                                                                               | 199 |
| <b>Vacancy Migration in Cadmium and Zinc Studied by the PAC Method</b><br>M. Iwatschenko-Borho, R. Schmitzer, H. Föttinger, F. Meyer and W. Witthuhn                                            | 205 |
| <b>Stationary Non-Equilibrium Vacancies during Thermotransport</b><br>R. Kossak and T. Hehenkamp                                                                                                | 211 |
| <b>Properties of Self Interstitials in Transition and Rare-Earth Metals</b><br>F. Ono and H. Maeta                                                                                              | 219 |
| <b>Configuration and Dynamics of Single Interstitials in Molybdenum</b><br>J. Marangos, W. Mansel and D. Wahl                                                                                   | 225 |
| <b>On the Migration of Interstitial Defects in Irradiated Cubic Metals</b><br>P. Lucasson, F. Maury and A. Lucasson                                                                             | 231 |
| <b>Interpretation of the <math>f^{-1}</math> Noise in Irradiated Metals in Terms of One-Dimensionally Migrating Defects</b><br>A. Seeger, H. Stoll and W. Frank                                 | 237 |
| <b>Investigation of the Resonant Vibration Modes of Self Interstitial Atoms in Al by Diffuse Inelastic Neutron Scattering</b><br>R. Urban, P. Ehrhart, W. Schilling, H.R. Schober and H. Lauter | 243 |
| <b>Defect-Induced Magnetic Relaxations and their Recovery in Electron-Irradiated <math>\alpha</math>-Iron</b><br>M. Hirscher, B. Schwendemann, W. Frank and H. Kronmüller                       | 249 |
| <b>Orientation Dependence of Internal Friction in Stage I<sub>E</sub> and Stage III of Electron-Irradiated High-Purity <math>\alpha</math>-Iron</b><br>J. Wolf and H. Kronmüller                | 255 |
| <b>Recovery of Irradiation Induced Defects at Low Temperatures in Nb and Ta Studied by Internal Friction</b><br>T. Arai, H. Mizubayashi, S. Okuda, M. Okumura and S. Seki                       | 261 |
| <b>Long-Range Migration of Self-Interstitials Studied in Niobium by Dislocation Pinning and Resistivity Recovery</b><br>J. Lauzier, J. Hillairet, J. Baur, J. Petzold, G. Funk and H. Schultz   | 267 |
| <b>Direct Observation of Uncorrelated Long-Range Migration of Self-Interstitial Atoms in Ordered Alloys</b><br>J. Aidelberg and D.N. Seidman                                                    | 273 |
| <b>Atomic Jump Processes in Crystals</b><br>C.P. Flynn                                                                                                                                          | 281 |
| <b>Anomalous Self-Diffusion in BCC IVB Metals and Alloys</b><br>C. Herzig and U. Köhler                                                                                                         | 301 |
| <b>Potential and Limits of Nuclear Methods in Diffusion Studies</b><br>W. Petry and G. Vogl                                                                                                     | 323 |
| <b>Point Defects and Atomic Diffusion in Metallic Glasses</b><br>Y. Adda, G. Brebec, R.P. Gupta and Y. Limoge                                                                                   | 349 |
| <b>Diffusion Mechanisms and Thermal-Equilibrium Defects in Silicon and Germanium</b><br>W. Frank and N. Stolwijk                                                                                | 369 |
| <b>Exact Theory of Jump Frequency and Isotope Effect Factor for Vacancy Diffusion in FCC Crystals</b><br>M. Marchese and C.P. Flynn                                                             | 389 |
| <b>Stochastic Rate Theory for Jumps of Atomic Defects and Interpretation of Self-Diffusion in Metals</b><br>R. Bauer                                                                            | 397 |
| <b>New Diffusion Mechanism for High Temperature Diffusion in Solids</b><br>N.V. Doan and Y. Adda                                                                                                | 403 |
| <b>Phenomenological Coefficients for Atomic Transport via Point Defects</b><br>A.B. Lidiard                                                                                                     | 409 |

|                                                                                                                                                                                       |     |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Divacancy Contributions to the Impurity Diffusion in Noble Metals: The Temperature Function of the Isotope Effect</b><br>G. Neumann                                                | 413 |
| <b>Nuclear-Magnetic-Resonance Study of Self-Diffusion in Aluminium</b><br>S. Dais, R. Messer and A. Seeger                                                                            | 419 |
| <b>On the Diffusion of 3d-Elements in Aluminium</b><br>D.L. Beke, I. Gódný, G. Erdélyi and F.J. Kedves                                                                                | 425 |
| <b>Diffusion of Gold in Copper over a Wide Range of Temperature</b><br>S. Fujikawa, M. Werner, H. Mehrer and A. Seeger                                                                | 431 |
| <b>NMR Study of Aluminium Diffusion in Solid Noble Metal: Al Alloys</b><br>B. Günther, O. Kanert and H. Kolem                                                                         | 437 |
| <b>Lattice and Grain-Boundary Diffusion in of <math>^{121}\text{Te}</math> in Silver after Radioisotope Implantation at the Isolde</b><br>J. Geise, H. Mehrer, C. Herzig and G. Weyer | 443 |
| <b>Atomic-Defect Mechanisms for Diffusion in Refractory BCC Metals</b><br>R.W. Siegel, J.N. Mundy and L.C. Smedskjaer                                                                 | 451 |
| <b>SIMS Study of the Isotope Effect and Diffusion of Chromium in Tungsten Single Crystals</b><br>S.M. Klotsman, G.N. Tatarinova and A.N. Timofeyev                                    | 457 |
| <b>Direct Evidence for Self-Diffusion in <math>\beta</math>-Titanium via Vacancies</b><br>T. Flottmann, W. Petry, G. Vogl and A. Heiming                                              | 463 |
| <b>PAC Studies of the Fast Diffuser <math>^{100}\text{Pd}</math> in Lead</b><br>M. Deicher, G. Grübel, G. Kopp and E. Recknagel                                                       | 469 |
| <b>Ni Diffusion in Zr and Zr Alloys</b><br>G.M. Hood and R.J. Schultz                                                                                                                 | 475 |
| <b>Fast Impurity Diffusion of Co and Fe in <math>\beta</math>-Zr and <math>\beta</math>-Zr-Alloys</b><br>C. Herzig, J. Neuhaus, K. Vieregge and L. Manke                              | 481 |
| <b>Anomalous Fast Diffusion of Fe in <math>\beta</math>-Zr-Fe Alloys, a Mössbauer Study</b><br>Y. Yoshida, W. Miekeley, W. Petry, R. Stehr, K.H. Steinmetz and G. Vogl                | 487 |
| <b>Solvent Diffusion in <math>\alpha</math>-Nickel-Carbon Alloys</b><br>C. Köstler and T. Hehenkamp                                                                                   | 493 |
| <b>Radiation-Enhanced Diffusion in Aluminium - 4.5 at.% Zinc</b><br>Y.G. Zhang and I.P. Jones                                                                                         | 499 |
| <b>Determination of Gold Diffusion Coefficients during the Precipitation of Pb-Au Super-Saturated Solid Solutions</b><br>M. Kherraz, A. Menai, J. Bernardini and G. Moya              | 505 |
| <b>Diffusion and Ion Mixing in Amorphous Alloys</b><br>H. Hahn, R.S. Averback, F. Ding, C. Loxton and J. Baker                                                                        | 511 |
| <b>Study of Point Defects in Non Crystalline Alloys by High Temperature Mass Transport Experiments</b><br>Y. Limoge                                                                   | 517 |
| <b>Diffusion in Amorphous Metallic Alloys</b><br>J. Horváth, K. Pfahler, W. Ulfert, W. Frank and H. Kronmüller                                                                        | 523 |
| <b>Investigations on Self- and Interdiffusion in Liquid Metals</b><br>G. Froberg, K.H. Kraatz and H. Wever                                                                            | 529 |
| <b>Interstitial Diffusion of Metallic Solutes in Irradiated Alloys</b><br>K.-. Robrock                                                                                                | 537 |
| <b>Data Analysis of Damage Rate and Annealing of Radiation Defects, Based on Solving of Kinetics Equations</b><br>I.E. Podchinenov and I.S. Trakhtenberg                              | 557 |
| <b>Rate-Theory Simulation of the PAC-Recorded Isochronal Recovery of Defects in Irradiated Metals</b><br>J. Golczewski, W. Frank and K. Maier                                         | 563 |
| <b>On the Formation of Highly Symmetric Impurity-Vacancy Clusters in Ion-Implanted FCC Metals</b><br>G. Lindner and G. Weyer                                                          | 569 |
| <b>Exafs Study on Electron Irradiated Dilute Al (Zn)</b><br>T. Bolze and J. Peisl                                                                                                     | 575 |

|                                                                                                                                                                                                                                              |     |
