

# Table of Contents

## Preface

<b>Femtosecond Time-Resolved Microscopy of Laser-Induced Morphology Changes</b>	1
D. von der Linde	
<b>Low Temperature Deposition and Crystallization of Silicon by Means of Laser Techniques</b>	7
M. Hirose	
<b>Femtosecond-Pulse Laser Microstructuring of Semiconducting Materials</b>	17
W. Kautek and J. Krüger	
<b>Modification of Foreign Atom Concentrations and Profiles in Silicon and Si<sub>1-x-y</sub>Ge<sub>x</sub>C<sub>y</sub> Alloys by Laser Chemical Etching</b>	23
J. Boulmer, A. Desmur, B. Bourguignon, J.-. Ozenne, R. Laval, A. Aliouchouche, D. Débarre and J.-. Budin	
<b>Properties of Recrystallized Amorphous Silicon Prepared by XeCl Excimer Laser Irradiation</b>	29
I. Ulrych, K.M.A. El-Kader, V. Cháb, J. Kocka, P. Prikryl, V. Vydra and R. Cerný	
<b>Kinetics of Laser-Induced Synthesis and Crystallization of Thin Semiconductors Films</b>	35
K. Kolev and L.D. Laude	
<b>Surface Patterning and Thin-Film Formation by Pulsed-Laser Ablation</b>	41
D. Bäuerle, E. Arenholz, J. Heitz, S. Proyer, E. Stangl and B. Luk'yanchuk	
<b>Laser Patterning of CuInSe<sub>2</sub>/Mo/SLS Structures for the Fabrication of CuInSe<sub>2</sub> Sub Modules</b>	53
L. Quercia, S. Avagliano, A. Parreta, E. Salza and P. Menna	
<b>UV-Excimer Laser Ablation Patterning of II-VI Compound Semiconductors</b>	59
P.H. Key, D. Sands and F.X. Wagner	
<b>Fabrication and Characterisation of N<sup>+</sup> Doped Laser Crystallised Polysilicon</b>	67
E. Al-Nuaimy, J.M. Marshall, T.E. Dyer, A.R. Hepburn and J.F. Davies	
<b>Pulsed Laser Ablation: A Method for Deposition and Processing of Semiconductors at an Atomic Level</b>	73
J.J. Dubowski	
<b>Vacuum Ultraviolet Deposition of Silicon Dielectrics</b>	81
I.W. Boyd	
<b>Conditions for Heterophase Junction Formation in Laser Deposited PbTe Films</b>	93
V. Gaydarova	
<b>High-Quality Narrow-Gap Thin Films Produced by Quasi-Continuous-Wave IR-Laser-Assisted Evaporation</b>	99
S.V. Plyatsko and Y.S. Gromovoj	
<b>Laser-Induced Etching of Si Surfaces; the Effect of Weak Background Light</b>	105
H. Grebel and T. Gayen	
<b>Gas-Dynamic Effects in Laser Pulse Sputtering of Aluminium</b>	109
A. Peterlongo, A. Miotello and R. Kelly	
<b>Laser Deposited Phthalocyanine- and Fullerene-Based Photovoltaic Cells</b>	117
A.I. Shevalevskii, V.P. Poponin and L.L. Larina	
<b>Synthesis of β-FeSi<sub>2</sub>-Films by Pulsed Laser Deposition</b>	123
M. Panzner, H. Mai, B. Schöneich, B. Selle, H. Lange, W. Henrion, T. Wittke, A. Lenk, A. Teresiak and R. Gröttschel	
<b>Complex Semiconductor Compound Targets for Pulsed Laser Deposition</b>	129
H. Dittrich, M. Klose, M. Brieger, R. Schäffler and H.W. Schock	
<b>Pulsed Laser Deposition and Characterization of CuInSe<sub>2</sub> Thin Films for Solar Cell Applications</b>	135
R. Schäffler, M. Klose, M. Brieger, H. Dittrich and H.W. Schock	
<b>Laser Characterization of Semiconductors</b>	141
M. Stutzmann	
<b>Silicon Surface Nonlinear Optics</b>	153
C. Jordan, G. Marowsky, R. Buhleier, G. Lüpke, E.J. Canto-Said, Z. Gogolak and J. Kuhl	

<b>Mapping of Defect-Related Silicon Properties with the ELYMAT Technique in Three Dimensions</b>	
J. Carstensen, W. Lippik and H. Föll	159
<b>Laser Examined AlGaAs-Solar Cells with Wide-Gap Tunneling-Thin Cap Layers</b>	
V.M. Andreev, V.P. Kvostikov, V.R. Larionov and V. Rumyantsev	165
<b>Use of Photoinduced Microwave Reflection for the Non-Destructive Characterization of Solar Cell Materials and Device Structures</b>	
J.M. Borrego	171
<b>Photothermal Deflection Spectroscopy on Amorphous Semiconductor Heterojunctions and Determination of the Interface Defect Densities</b>	
F. Becker, R. Carius, J.-. Zettler, J. Klomfass, C. Walker and H. Wagner	177
<b>Summary Abstract: Laser Surface Photovoltage Spectroscopy - A New Tool for Determination of Surface State Distributions and Properties</b>	
L. Kronik, L. Burstein, E. Fefer, M. Leibovitch and Y. Shapira	183
<b>Photorefractive Two Wave Mixing and Steady State Photocarrier Gratings for Semiconductor Characterization</b>	
B. Smandek, Y. Ding, V. Hagemann, S. Gohlke, A. Wappelt and R. Wendt	185
<b>A Novel Contactless Approach for Accurate Measurements of Electron-Hole Recombination Lifetime</b>	
G. Breglio, A. Cutolo, P. Spirito and L. Zeni	191
<b>Raman Studies of Doped Poly-Si Thin Films Prepared by Pulsed Excimer Laser Annealing</b>	
A. Compaan, M.E. Savage, U. Jayamaha, T. Azfar and A. Aydinli	197
<b>Near Infrared Quasi-Elastic Light Scattering Spectroscopy of Electronic Excitations in III-V Semiconductors</b>	
B.H. Bairamov, I.P. Ipatova, G. Irmer, J. Monecke, V.K. Negoduyko, V.A. Voitenko and V.V. Toporov	203
<b>Laser Pulsed Induced Microwave Conductivity and Spectroscopic Ellipsometry Characterization of Helium and Hydrogen Plasma Damage of the Crystalline Silicon Surface</b>	
H.C. Neitzert, N. Layadi, P. Roca i Cabarrocas, R. Vanderhaghen and M. Kunst	209
<b>Laser Diagnostics of InSb Surface</b>	
G.V. Beketov and A.I. Liptuga	215
<b>Contactless Characterization of Semiconductors Using Laser-Induced Surface Photo-Charge Voltage Measurements</b>	
A. Abbate, P. Rencibia, O. Ivanov, G. Masini, F. Palma and P. Das	221
<b>Narrowing of Photoluminescence Line from Single Quantum Well under High Excitation Levels</b>	
D.G. Revin and V.Y. Aleshkin	227
<b>Resonance Raman Spectroscopy of Langmuir-Blodgett Films from Metallo-Phthalocyanines</b>	
L.L. Larina, N.N. Melnik, V.P. Poponin, O.I. Shevaleevskii and A.A. Kalachev	231
<b>Raman and Nonlinear Light Scattering from Undersurface Layers of Ion Implanted Silicon Crystals</b>	
V. Gorelik	237
<b>Raman Study of "Boson Peak" in Amorphous Silicon: Dependence on Hydrogen and Carbon Content</b>	
M. Ivanda, I. Hartmann, F. Duschek and W. Kiefer	243
<b>Structural Investigation of Microcrystalline Silicon</b>	
P. Hapke, M. Luysberg, R. Carius, F. Finger and H. Wagner	249
<b>Recombination Lifetime in Silicon from Laser Microwave Photoconductance Decay Measurement</b>	
C.H. Ling, H.K. Teoh, W.K. Choi, T.Q. Zhou and L.K. Ah	255
<b>Investigation of Electronic Transport in Semiconductor Junctions by Photoinduced Laser Beam Deflection</b>	
P. Grunow, R. Schieck and M. Kunst	259
<b>Nondestructive and Contactless Evaluation of Electrical and Thermal Properties of Thin Semiconducting Layers</b>	
H.D. Geiler	265
<b>Diagnostics of Semiconductor Surface by Laser-Induced Photovoltage</b>	
B. Pohoryles and A. Morawski	273

<b>Characterization of the M. O. S. Structure by the Surface Photoelectrical Voltage Method</b>	279
B. Akkal, Z. Benamara, M. Chellali, H. Sehil and B. Gruzza	
<b>Optical Second-Harmonic Generation (SHG) on Semiconductor Electrodes by Means of Femtosecond and Nanosecond-Pulse Lasers</b>	285
W. Kautek, N. Sorg and J. Krüger	
<b>Optical and Electrical Properties of Semiconducting Thin Films Near the Deposition Substrate</b>	291
J. Ebothe	
<b>Crystalline Silicon Materials and Solar Cells</b>	297
J. Knobloch and A. Eyer	
<b>The Use of Lasers in the Fabrication of High-Efficiency Silicon Solar Cells</b>	311
C.B. Honsberg and M.A. Green	
<b>A Laser System for Silicon Solar Cell Processing: Design, Setup and Operation</b>	319
L. Pirozzi, U.B. Vetrella, M. Falconieri and E. Salza	
<b>Light and Electron Beams Scanning of Solar Cells</b>	325
S. Mil'shtein, B. Bakker, S. Iatrou, D. Kharas and R.O. Bell	
<b>Characterization of Textured Transparent Conductive Oxides for Thin Film Solar Cell Applications</b>	331
J. Wallinga, J. Daey Ouwers, R.E.I. Schropp and W.F. van der Weg	
<b>Application of Steady-State Photocarrier Grating Technique for Determination of Ambipolar Diffusion Lengths in Cu (In, Ga) (S, Se)<sub>2</sub> - Thin Films for Solar Cells</b>	337
S. Zweigart, R. Menner, R. Klenk and H.W. Schock	
<b>Laser Raman Scattering Characterization of A<sup>3</sup>B<sup>5</sup> Compounds and Photovoltaic Structures</b>	343
V.M. Andreev, M.V. Cherotchenko, L.B. Karlina, A.M. Mintairov, V.P. Khvostikov and S.V. Sorokina	
<b>Resonant Raman and Photoluminescence of CdTe Films for PV Using Diode Lasers</b>	349
A. Fischer, A. Compaan, A. Dane and A. Aydinli	
<b>Laser-Aided Measurements of Electric Fields on III-V Semiconductor Structures Using Modulation Spectroscopy: Solar Cell P-N Junctions and [111] Strained Layer Superlattices</b>	355
R.G. Rodrigues, K. Yang, L.J. Schowalter and J.M. Borrego
