

Table of Contents

Preface

Diffusion in Metals: An Overview

D. Lazarus 1

Solvent Diffusion in Dilute B.C.C. Alloys

R.P. Agarwala 15

Atom Movement in Lead and Lead Tin Solders

H.B. Huntington and C.K. Hu 29

Grain Boundary Diffusion

M. Mohan Rao and S. Ranganathan 43

Diffusion and Defects in Silver Halides

A.L. Laskar 59

Subsurface Effects in Ionic Crystals

L. Slifkin 75

Point Defects and Diffusion Mechanisms in the Monoxides of the Iron-Group Metals

N.L. Peterson 85

The Role of Vacancies and Self-Interstitials in Impurity Diffusion in Silicon

R.B. Fair 109

Interdiffusion in Thin Films

K.N. Tu 133

Ionic and Molecular Transport in Beta- and Beta"-Alumina

J.B. Bates 135

Fast Proton Transport in Solids

S. Chandra 153

Diffusion in Metals - A Phenomenological Approach

G.P. Tiwari 171

Recent Developments in the Theory of Rate Processes

G. Jacucci and M. Toller 187

Monte Carlo Calculation of Correlation and Vacancy Wind Effects in Diffusion

G.E. Murch 199

Molecular Dynamics Studies of Structural Transformation in Solids

A. Rahman 211

Radiation Induced Diffusion and Solute Segregation

R.A. Johnson 223

Short Range Diffusion during Phase Transformations

S. Banerjee 239

Special Aspects of Diffusion in Polycrystalline and Amorphous Metallic Thin Films at Low Temperatures

D. Gupta 257

Diffusion Studies Using Neutrons

B.A. Dasannacharya 269
