

Table of Contents

Preface

Early Detection of Hydrogen-Induced Stress Corrosion Cracking Using Micromagnetic Test Methods

M.A. Lang, I. Altpeter and G. Dobmann 1

The Development of Nondestructive Evaluation (NDE) for Monitoring the Embrittlement in Nuclear Reactor Pressure Vessels

M. Blaszkiewicz 9

Evaluation of Digitized Signals from a Steel Cable Flaw Detector

O. Lesnák 17

Ferromagnetic Surface Layers Testing with Depth Resolution Using a Priori Knowledge

V. Vengrinovich and S. Zolotarev 25

Barkhausen Noise Energy Measurement Method for Characterizing the Ferromagnetic Ratio of Alloys

I. Mészáros, M. Káldor and B. Hidasi 31

Peculiarities of Connection between Mechanical Properties and Residual Magnetization of Articles of Different Sizes

S.G. Sandomirskii 39

Nondestructive Measurement of Grain Size in Steel Plates by Using Magnetic Coercive Force

M. Yoshino, H. Tanabe, T. Sakamoto, N. Suzuki and Y. Yaji 45

Detecting the Tendency to Chilling in Series-Manufactured Cast-Iron Components Using Micromagnetic Test Procedures

M. Kröning, I. Altpeter and U. Laub 55

Nondestructive Determination of the Transition from the Elastic into Microplastic State

L. Keller and P. Stanek 63

Overview of Microwave NDE Applied to Thick Composites

R. Zoughi, S. Ganchev and G.W. Cariveau 69

Characterization of Green Ceramics by Microwaves and Ultrasound

R. Schneider, U. Netzelmann and M. Kröning 77

Non-Destructive Moisture Measurement Using Microwaves

F. Thompson 85

Models for Microwave Nondestructive Testing of Materials

N. Ida and J.S. Wang 93

Acoustics of Wood

V. Bucur 101

Stress Wave Nondestructive Evaluation of Logs to Predict Structural Product Quality

R.J. Ross, K.A. McDonald, D.W. Green and K.C. Schad 109

Durability Assessment of Polymer Matrix Composite Materials

G.L. Hagnauer, A.W. Gutierrez and J.D. Kleinmeyer 115

Damage Monitoring during Monotonic Tensile Loading of Quasi-Isotropic Carbon Epoxy Laminates

D. Tsamtsakis, M. Wevers and P. De Meester 125

Measurement of Dislocation Density by Residual Electrical Resistivity

M. Kocer, F. Sachslehner, M. Müller, E. Schafler and M.J. ZEHETBAUER 133

Anisotropy of Young Modulus and Technological Properties

R. Fiedler and J. Zeman 141

Residual Stress Depth Profiles of Ausrolled 9310 Gear Steel

C.M. Paliani, K.J. Kozaczek and R.A. Queeney 147

Neutron Diffraction Residual Stress Measurement at NIST

H. Prask and P.C. Brand 155

Localized Stress Measurement of Aluminum Alloy with Acoustic Microscope

M. Okade and K. Kawashima 163

Acoustoelastic Determination of Stresses in Steel Using Rayleigh Ultrasonic Waves

T. Berruti and M.M. Gola 171

The Eddy Current Technique for Determining Residual Stresses in Steels M. Blaszkiewicz, L. Albertin and W. Junker	179
Recent Developments in Non-Destructive Characterization of Aerosols by Synchrotron Radiation C. Landron	187
Nondestructive Measurement of Grain Size in Steel Plate by X-Ray Diffraction F. Ichikawa, M. Okuno, M. Okamoto and F. Tanaka	195
X-Ray Diffraction Characterization of Thin Superconductive Films K.J. Kozaczek, G.W. Book, T.R. Watkins and W.B. Carter	203
X-Ray Backscatter Tomography: NDT Potential and Limitations C.F. Poranski, E.C. Greenawald and Y.S. Ham	211
An X-Ray Sensitive CCD Camera System and Its Application to the X-Ray Diffractometric Investigation on Area Selective Semiconductor Epitaxy F. Fandrich and R. Köhler	219
Determination of the Elastic Behaviour of Carbon-Reinforced Carbon Materials Using Laser-Ultrasound and Theoretical Modeling M. Paul, B. Haberer, A. Hoffmann, M. Spies and W. Arnold	227
Elastic Moduli Measurements of SiC Reinforced Alumina at High Temperatures Using Laser-Ultrasonics A. Moreau and F. Taheri	235
Absorption Measurements on Creep Damaged Samples Using the Reverberation Technique P. Kalyanasundaram, J. Reszat and M. Paul	243
Noncontact Alternatives to Laser Detection of Ultrasonic Signals T.W. Murray, D.A. Oursler and J.W. Wagner	251
Nickel-Base Superalloys Characterized by SLAM after Long Term Heating V.A.M. Luprano, M.F. De Riccardis and G. Montagna	259
Microhardness and Raman Spectroscopy for Characterization of Fullerite Single Crystals M. Haluska, M.J. ZEHETBAUER, M. Hulman and H. Kuzmany	267
Very Near Field Optics: A Frontier Technology J.B. Goodell	275
Characterization of Thermal Degradation of Stainless Steel with Ultrasonic Velocities and Backscattering Noise K. Kawashima, T. Isomura and S. Ohta	283
Nondestructive Inspection of Turbine Blades with Lock-In Thermography D. Wu, G. Zenzinger, W. Karpen and G. Busse	289
Parameters Estimation in Photothermal Measurements with Photodeflectional Detection R. Bukowski, J. Bodzenta, J. Mazur and Z. Kleszczewski	295
Thermoacoustic Vibrometry for In-Situ Monitoring of Processes J. Stanullo, M.L. Lyamshev and G. Busse	303
Thermal-Wave Imaging: A Non-Destructive Technique to Characterize the Electromigration on Al Alloy A. Brun, M. Marty, H. Roede, C. Gounelle and F. Giroux	309
Residual Stress Distributions in the Rim of a Steam Turbine Disk Using the L_{CR} Ultrasonic Technique D.E. Bray, N. Pathak and M.N. Srinivasan	317
Nondestructive Evaluation of Nonconductive Cylindrical Nozzle in Pulsewise Excited Quasi-Stationary Electric Field Y. Bulbik	325
Non-Destructive Thickness Determination of Metallic Coatings Using Ultrasonic Rayleigh Waves J.F. Coste, F. Lakestani and W.J. Vortrefflich	335
Nondestructive Evaluation of Material Parameters Using Neural Networks U. Fiedler, M. Kröning and W.A. Theiner	343
How Calcareous Layers Affect Ultrasonic Thickness Gaging R. Di Giunta, L. Goglio and M.M. Gola	349
Review of Inspection Qualification Programme and RRT Results L. Horáček and J. Zdárek	357

Characterization of Metal Surface by Means of Two-Dimensional Fractal Analysis S. Horiyata, M. Satoh, H. Kitagawa and T. Tamiya	365
Comparison of Dynamic Photoelastic Visualization of Ultrasound with Parallel Computations R.D. Huber, K.E. Simmonds, R.S. Schechter, R.B. Mignogna and P.P. Delsanto	373
Ultrasonic Characterization of Repair Paste Bonds with Metals M. Josko	379
Structural Characteristics of Powder Developers: Methods of Measurements N.P. Migoun	387
Main Physical Characteristics of Liquid Phase Developers P. Prokhorenko, A. Kornev and I. Stoicheva	389
The Estimation of Elastic Modulus of Metallic Materials by Dynamic Indentation Method V.A. Rudnitsky and V.V. Djakovich	391
Ultrasonic Characterization of Burrs in Aluminum Pressure Castings E. Schneider, L. Oesterlein and D. Bruche	397
Ultrasonic Characterization of Texture in Aluminum Rolled Products E. Schneider and L. Oesterlein	405
Application of Magnetic Barkhausen Effect for Evaluation of Stresses and Structure of Ferromagnets V. Vengrinovich, V. Busko, A. Vishnevsky and Y. Denkevich	411
Delayed Cracking in Automotive Windshields S.T. Gulati, H.E. Hagy and J.F. Bayne	415
Double-Pumped Conjugators and Photo-Induced EMF Sensors: Two Novel, High-Bandwidth, Auto-Compensating, Laser-Based Ultrasound Detectors D.M. Pepper, P.V. Mitchell, G.J. Dunning, S.W. McCahon, M.B. Klein and T.R. O'Meara	425
Lock-In Vibrothermography Applied for Nondestructive Evaluation of Polymer Materials J. Rantala, D. Wu and G. Busse	433
Photothermal Investigation of Silicon Wafers with Diamond-Like Coating J. Bodzenta, J. Mazur, R. Bukowski and Z. Kleszczewski	439
High Resolution Photothermal Imaging of Metal Matrix Composite Interface F.C. Chen, U. Netzelmann, M. Disque and M. Kröning	447
Nondestructive Testing of Coatings B. Köhler, B. Bendjus and T. Vetterlein	455
Evolved Heat as a Fatigue Characterization Parameter N. Rajic, Y.C. Lam and A.K. Wong	463
Comparison of Absolute Sensitivity Limits of Various Ultrasonic and Vibration Transducers C.M. Fortunko and E.S. Boltz	471
Behaviour of Concrete Observed by Acoustic Emission Measurement P. Maliszkievicz	479
Crack Closure during Cyclic Fatigue in MG-PSZ Ceramic as Detected by Acoustic Emissions M.J. Hoffmann, S. Wakayama, T. Kishi, Y.W. Mai and M. Kawahara	487
Elastic and Anelastic Behaviour of Zirconium Polycrystals Z. Trojanová, P. Lukáč and P.P. Pal-Val	495
Stress Relaxation of Short Fiber Reinforced Mg Metal Matrix Composites after Thermal Cycling J. Kiehn, W. Riehemann and K.U. Kainer	503
Detection of Internal Stresses in Metal Matrix Composites by Stress Relaxation Measurements W. Riehemann	511
Amplitude-Dependent Damping and Acoustoplastic Effect in Crystals A.B. Lebedev	519
Evaluation of Dilatancy in Rock for Forecasting of Burst Prone Zones in Mines V.A. Mansurov and V.A. Anikolenko	527
Kinetic Approach to the Nondestructive Monitoring of Rock Failure V.A. Anikolenko and V.A. Mansurov	535

Energy - Frequency Distribution of Acoustic Emission from Loaded Rock Samples T. Lokajíček, R. Prikryl and V. Rudajev	541
Acoustic Emission in Amorphous Metals A. Vinogradov and A. Leksovskii	549
Acoustic Emission as a Tool for Monitoring Electrical, Electromagnetic and Thermal Effects during the Brittle Cracking I. Malecki and J. Ranachowski	557
Acoustic Emission Analysis of Grain Boundary Effect on Plastic Deformation of Bicrystals A. Vinogradov, S. Hashimoto, S. Miura, A. Vikarchuk and M. Nadtochiy	565
Recent Developments in Real-Time Acousto-Ultrasonic NDE Technique to Detect & Monitor Various Damage Modes under Compressive Load A. Tiwari and E.G. Henneke II	573
Tip Location Determination of Exposed and Filled Cracks Using Microwaves C. Huber, S. Ganchev and R. Zoughi	581
Computer Simulation of Acoustic Waves Propagation in Elastically Anisotropic Materials H. Yamawaki and T. Saito	589
A Study of Lamb Wave Interaction with Defects in Sheet Materials Using a Differential Fibre-Optic Beam Deflection Technique R.J. Dewhurst and B.A. Williams	597
Observation of Internal Defect in Functionally Gradient PSZ-Ni by Ultrasonic Imaging N. Sarlis and S. Sumi	605
Preliminary Evaluation of the Potential and Limitations of Microwave NDI Methods for Inspecting Graphite Composites R. Zoughi, C. Lebowitz and S. Lukes	611
Damping in Magnesium Matrix Composites P. Lukáč, Z. Trojanová, W. Riehemann and B.L. Mordike	619
Internal Friction Characterization of Metal Matrix Composites L. Parrini and R. Schaller	627
Electrical Resistometry of Mg-Based Microcrystalline Alloys and Mg-Based Composites P. Vostrý, I. Stulíková, J. Kiehn, M. Šamatová, K.U. Kainer and F.M. Knoop	635
A Study of the Crystal Growth Rate of Potassium Sulphate for Cooling Crystallization in an Ultrasonic Field J. Hofmann and V. Roubík	643
Determination and Monitoring of Through Hole Diameters Using Acoustic Diffraction T.P. Berndt and R.E. Green, Jr.	649
Microwave Dielectric Characterization of Low Density Glass Fibers with Resin Binder N. Qaddoumi, S. Ganchev and R. Zoughi	657
Nondestructive Quality and Process Control in Injection Moulding Polymer Manufacture with Microwaves L. Diener and G. Busse	665
Acousto-Ultrasonic Damage Evaluation of Steel-Belted Radial Tires H.L.M.d. Reis and K.A. Warmann	671
Materials Characterization of Powder Metallurgy Products Using Acousto-Ultrasonics G.L. Workman and J.L. Walker	679
Process Integrated Nondestructive Testing of Laser-Hardened Components R. Kern, R. Meyer, W.A. Theiner and B. Valeske	687
Nondestructive Characterization of Cure Enhancement by High Power Ultrasound of Carbon Epoxy Composites T.M. Whitney and R.E. Green, Jr.	695
Diffraction Techniques in Engineering Applications K.J. Kozaczek, C.R. Hubbard, T.R. Watkins, X.L. Wang and S. Spooner	703
Materials Characterization with Cold Neutrons H. Prask	711
Nondestructive Morphological Characterization of Latent and Etched Ion Tracks in PETP by SANS F. Haeussler, M. Hempel, W. Birkholz, M. Kröning and H. Baumbach	719

Characterization of Microstructure of Plastically Deformed and Thermally Treated Carbon Steel by Means of Positron Annihilation Life-Time Spectroscopy in Comparison with Micromagnetic Methods	
N. Meyendorf, B. Somiesky, R. Krause, I. Altpeter and M. Gessner	727
Positron Annihilation Measurements in Zirconium at High Temperatures	
R. Král, G. Krexner and V. Gröger	735
Dislocation Density Measurement and Positron Annihilation	
V. Gröger, T. Geringer, W. Pichl, G. Krexner, I. Novotný and I. Procházka	743
Nondestructive Materials Characterization for Historic Conservation	
R.A. Livingston	751
Nondestructive Measurement of Grain Size in Steel Plate by Ultrasonic Attenuation	
M. Yamano, F. Ichikawa, M. Okuno, N. Suzuki and Y. Iizuka	759
The Evaluation of Integrity of Ceramic-Metal Joints and Ceramic Coatings by C-Mode Acoustic Microscopy	
P. Kauppinen, H. Jeskanen, L. Heikinheimo, M. Siren and P. Auerkari	767
Ultrasonic Characterization of Degradation in Lead Magnesium Niobate (PMN) Smart Materials	
J. Bernstein, J.B. Spicer, J.W. Wagner and A.P. Ritter	775
Measurement of Adhesion Strength Using Nonlinear Acoustics	
S.U. Fassbender, M. Kröning and W. Arnold	783
Next Generation On-Line Ultrasonic Testing System, Using Real-Time Chirp Pulse Compression Processing	
M. Yoshino, R. Okuno, A. Nagamune and K. Nishifuji	791
An Automatic Ultrasonic Testing System for the Butt Weld Zone of Gas Pipe Lines	
H. Yamada, H. Yamaji, T. Hyoguchi and T. Udagawa	799
The Ultrasonic Testing of Welding in Plastics	
N. Gil, G. Konovalov, A. Mayorov and P. Prokhorenko	807
Negative Elastic Constants in Intermediate Valent $\text{Sm}_x\text{La}_{1-x}\text{S}$ Determined by Brillouin Scattering	
U. Schärer and P. Wachter	811
Estimation of Parametric Models for Double Transmission Experiments on a Viscoelastic Plate	
D. Zhou, L. Peirlinckx and L. Van Biesen	817
Internal Friction in Magnesium and Magnesium Calcium Alloys Prepared by Rapid Solidification	
Z. Trojanová, P. Lukáč, S. Kraft, W. Riehemann and B.L. Mordike	825
Qualifying Indentation Fracture Toughness Testing by Ultrasonics	
F. Bergner and B. Köhler	831
New Digital Techniques for Precise Measurement of Surface Wave Velocity with Acoustic Microscope	
M. Okade, T. Hasebe, T. Kawai and K. Kawashima	839
Estimation of Ultrasonic Source Distributions of Electroacoustic Transducers	
D. Zhou, L. Peirlinckx, M. Lumori and L. Van Biesen	847
A New Approach to Ultrasonic Image Reconstruction	
M. Yamano and S.R. Ghorayeb	855
Waveform Mapping of Piezoelectric Transducer Impulse Responses for Multi-Transducer Pattern Recognition-Based Ultrasonic NDE Systems	
A.L. Bartos, T.J. Gill, Jr. and T. Lyon	863
