

Table of Contents

Preface

Double Layer Dynamics and Colloid Stability J. Lyklema	1
Interface as a Region of Dynamic Interactions J. Haber	17
Reaction Dynamic Studies by Pulsed Field Desorption J.H. Block	43
Rheo-Optics of Dilute Dispersions T.G.M. Van de Ven	59
Viscoelastic Properties of Concentrated Suspensions T.F. Tadros	87
Ferrofluids-Preparation, Properties, Application N. Buske and H. Sonntag	111
Colloid Interactions J. Gregory	125
Measurement and Calculation of Solvation Forces in Thin Films between Two Solid Bodies P. Belouschek, S. Maier, M. Suppa, U. Sattler and D. Lorenz	145
Mass Transfer to and from Interfaces Z. Adamczyk	167
Dynamics of Thin Liquid Films Studied by Laser Light Scattering J.G.H. Joosten	191
The Influence of Rheological Properties on Bubble Vibration and Interfacial Motion G. Kretzschmar, K. Lunkenheimer and R.D. Miller	211
Interfacial Chemistry and Preparation of Supported Oxide Catalysts H. Knözinger	223
Crystallographie and Electronic Structure of Metal Aggregates in Relation with Their Chemisorptive Properties A. Renouprez	243
Reverse Osmosis Separation of Solutions by Fine-Porous Membranes N.V. Churaev	259
Colloid Science Aspects of Mechanical Process Engineering H.J. Schulze	275
The Dielectric Properties of Tetrachloromethane and some Aliphatic Alcohols in Thin Layers between Two Titanium Surfaces G. Peschel	293
An Assesment to Error Analysis in Thermodynamic Measurements Using Gas-Solid Chromatography J.J. Comor and M.M. Kopečni	303
The Balloon Effect - A Quantum Chemical Model of Elementary Steps in Heterogeneous Chemical Reactions between Simple Gases and Solid Surfaces H.J. Müller, C. Opitz and J. Boer	325
Average and Local Surface Energies of Solids; New Mechanism of Surface Relaxation J. Ziolkowski	329
Hydration of Aliphatic Aldehydes in Micellar Solutions W. Knoche, V.R. Hanke and E. Dutkiewicz	335
Shape Transitions in the Aqueous Phase of Surfactant-Alcohol-Water Systems I. Vikholm, S. Backlund, H. Hoiland and K. Veggeland	339
Synthesis and Properties of the Sulfur Analogs of N-Hexyltetraoxyethyleneglycols A. Sokolowski, B. Byrczyk and J. Beger	343
Adsorption Kinetics of Surface-Chemically Pure N-Alkyl Dimethyl Phosphine Oxides R.D. Miller, K. Lunkenheimer and K.H. Schano	347
Quantitative Criteria for Judging the State of Surface-Chemical Purity K. Lunkenheimer and R.D. Miller	351

Effectiveness of Purification Techniques in Producing Model Colloids K.-. Lerche and G. Kretzschmar	355
Droplet Clustering in Microemulsions A.M. Cazabat, D. Chatenay, P. Guering and W. Urbach	359
Mixed Surface Films at a Hydrocarbon-Water Interface C.S. Vassilieff, N.D. Denkov and I.B. Ivanov	363
Colloidal Metal Sulfide Particles of Extremely Small Dimensions Produced in Reversed Micelles P. Lianos and J.K. Thomas	369
The Model of Mesitylene Removal from Its Emulsion K.B. Medrzycka	377
The Influence of Inorganic Ions Valency on the Efficiency of Pseudocumene Flotation K.B. Medrzycka and W. Zwierzykowski	381
The Adsorption of 2-Hydroxy-5-Alkylbenzophenone Oximes and Their Intermediates at the Aqueous/Organic Interface and the Mechanism of Copper Extraction J. Szymanowski and K. Prochaska	385
The Effect of Additives on the Electrical Conductance of Aerosol OT/ H₂O /Dodecane System E. Dutkiewicz and B.H. Robinson	389
The Effect of Polymer Bridging on the Flocculation Kinetics of Silver Iodide Sol F. Csempesz, S. Rohrsetzer and K. Marton	393
Fluctuation in the Kinetics of Diffusion Controlled Aggregation A. Molski	397
Settling Velocity of a Polymer Coated Particle. Model Experiments and Theory K. Malysa, J.H. Masliyah, G. Neale and T.G.M. Van de Ven	401
Blocking Effects in Particle Deposition K. Malysa, T. Dabros and T.G.M. Van de Ven	405
Direct Measurements of Particle Deposition from Flowing Suspensions Z. Adamczyk, J. Czarnecki, B. Siwek and M. Zembala	409
The Concentration Effect of Aerosol OT on the Dispersion Stability and Zeta-Potential in Non-Aqueous Systems J. Kosacz	413
Effect of the Adsorption of Nonhydrolyzed Polyacrylamide on the Electric Properties of Kaolinite Particles and the Stability of Their Suspensions T. Radeva, I.B. Petkanchin, P. Varoqui and S. Stoylov	417
Electric Surface Properties and Stability of Alpha-Fe₂O₃ Aggregates in Aqueous Suspensions I.B. Petkanchin and K.D. Streb	421
Electrical Double Layer at Alumina/Electrolyte Interface W. Janusz and J. Szczypa	427
The Dependence of the Volta Potential of Active Carbon on the Amount of Oxygen Chemically Bonded at Its Surface Z. Szegłowski and A. Swiatkowski	431
The Volta Potentials of Electrochemical Systems with Solid and Liquid Phases Z. Koczorowski and I. Zagorska	435
The Investigation of Hexadecyltrimethylammonium Thiocyanatocobaltate/II/ on Copper Surface H. Buczak and Z. Szegłowski	439
The Influence of Solvent Nature on the Change in Volta Potential in Adsorption Process of N-Tridecylamine on Copper Surface H. Biczal and Z. Szegłowski	443
Electrocapillarity in the Model Mercury Flotation A. Pomianowski and G. Para	447
Ionomolecular Complexes, Adsorption and Mercury Floatability in Solutions of Weak Organic Electrolytes A. Pomianowski, J. Rodakiewicz-Nowak and G. Para	451
Adsorption of Acetone from KPF6 Methanol + Acetone System at the Air/Solution and the Mercury/Solution Interface A. Muszalska and J. Jastrzebska	455

Adsorption of Thiourea at Mercury from Acetone and Ethanol Solutions M. Jurkiewicz-Herbich and J. Jastrzebska	459
Kinetics of Adsorption of a Colloid Sufactant at Mercury Electrode-Solution Interface M.K. Kaisheva	463
XPS Study of TiO₂ Surfaces Modified by Immersion in Aqueous Solutions G. Munuera, A.R. Gonzalez-Elipe, J.P. Espinos and J.A. Navio	467
States of Adsorption of Dinitrogen and Dioxygen on Titanium Dioxide (Rutile) Studied by Dynamic Methods J.A. Navio, T. Gonzalez-Carreno and R.I. Bickley	471
Interfacial Reactions in the Solid State: Theoretical and Experimental Investigations on V₂O₅-TiO₂ A. Vejux, E. Bordes and P. Courtine	475
Surface Chemistry of TiO₂-Supported MO_x Systems with Catalytic Interest M. del Arco, M.J. Holgado, C. Martin and V. Rives	479
Flow Adsorption Microcalorimetry M.A. Groszek	483
Calorimetric Effects of Adsorption at Solid/Solution Interfaces W. Rudzinski and J. Zajac	487
Calorimetric Studies for the Influence of the Substituted Groups of Some Adsorptives to the Adsorption in the Solid-Liquid Interface R. Zimmermann, H.A. Schneider and G. Wolf	493
Adsorption of Polyacrylamide and Poly/Acrylamide-Co-Acrylic/Acid on Silver Iodide Particles W. Nowicki and G. Nowicka	497
Influence of Chemical Character of Polymer Active Carbon on Adsorption from Gas and Liquid Phase H. Jankowska, A. Swiatkowski and J. Goworek	501
Interaction of Humic Acid and Humate with Montmorillonite: Adsorption and/or Coaggregation E. Tombácz, M. Gilde, I. Abrahám and F. Szántó	505
Correlation between Transportation of Oleic Acid Droplets onto Germanium Surface and Floatability J. Mager, J. Lekki and J. Drzymala	509
Surface Hydration of Minerals Covered with Surfactants P. Staszczuk	513
Effect of Surface Oxidation on Floatability and Electrokinetic Properties of Low-Ranks Coals E. Malysa and J. Stachurski	517
Surface Free Energy and Floatability of Minerals E. Chibowski and L. Holysz	521
XPS and Electrochemical Investigations of the Surface Oxidation of Non-Stoichiometric Cuprous Sulphide T. Czeppe and P. Nowak	525
Complete Wetting of Smooth and Rough Glass Surfaces A.M. Cazabat and M.A. Cohen Stuart	529
On the Linearity of the Wetting Tension - Surface Tension Dependence I. Pászli	533
Surface Free Energy Changes in the Graphite/n-Hexadecane System B. Bilinski and W. Wójcik	537
Study of the Equilibrium Penetration of Water-Soluble Species into Insoluble Monolayers D. Vollhardt	541
Hydration Forces between EO-Covered Interfaces in Thin Films H.J. Müller	547
Foam Films, Stabilized with Insoluble Monolayers, Applied from the Gas Phase D. Exerowa, R. Cohen and A. Nikolova	551
On Mechanism of Dynamic Stability of Wet Foams K. Malysa, K. Lunkenheimer and R.D. Miller	555

Tangential Forces due to Surface Roughness J. Czarnecki, T. Dabros and P. Warszynski	559
Electrochemical Studies of Stoichiometry Changes of Cu_{2-x}S Grains in Acid CuSO_4 Solutions W. Barzyk, P. Nowak and A. Pomianowski	565
Competition between "Chemical" and "Corrosion" Mechanisms of Xanthate Sorption on Chalcocite, Cu_2S W. Barzyk and A. Pomianowski	569
Dynamic Behaviour of Selected Nonionic Surfactant Films J. Haber, J. Pawelek and M. Polanska	573
Mixing Processes in Binary Monolayers Induced by the Spreading Solvent W. Rettig and H.-. Dörfler	577
