

Table of Contents

Elements of Thermodynamics for the Understanding and Design of Crystal Growth Processes P. Rudolph	1
Flow-Dynamics and Morphological Stability D.T.J. Hurle	27
Step and Surface Roughening - An Introduction A.A. Chernov	57
Step Kinetics by One-Dimensional 'Nucleation' A.A. Chernov	71
Subsurface Ordering and Kinetic Coefficient for Melt Growth A.A. Chernov	79
Melt Growth of Semiconductors G. Müller	87
Melt Growth of Semiconductor Crystals in Microgravity Conditions K.W. Benz and A. Cröll	109
Large-Scale Numerical Modeling of Continuum Phenomena in Melt and Solution Crystal Growth Processes J.J. Derby, K. Edwards, Y.I. Kwon, J.C. Rojo, B. Vartak and A. Yeckel	119
Modeling of Growth Processes in Epitaxial Reactors S. Carrà, C. Cavallotti and M. Masi	135
Principles of VPE and MOVPE and Applications N. Lovergine	153
Crystal Growth and Epitaxy from Solutions I. Fundamentals of Growth from Solutions C. Klemenz and H.J. Scheel	175
Crystal Growth and Epitaxy from Solutions II. Practical Aspects of Growth from Aqueous Solutions and from High-Temperature Solutions H.J. Scheel	191
Crystal Growth and Epitaxy from Solutions III. Special Topics of Growth from Solutions H.J. Scheel	201
Molecular Beam Epitaxy and Low-Dimensional Structures S. Franchi and A. Bosacchi	207
Morphological Stability in Molecular Beam Epitaxial Growth A. Pimpinelli	223
Protein Crystallization: Specific Phenomena and General Insights on Crystallization Kinetics F. Rosenberger	241
Rapid Solidification in Silicon S.U. Campisano	257
Some Aspects of Crystal Growth of Minerals A. Baronnet	269
Structural Defects in Crystals and Techniques for Their Detection H. Klapper	291
