|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Quantum Transport and Minimum Switching Voltage in a Field-Effect Transistor</b><br>M. Willander, Y. Fu and O. Nilsson                                                                                                                            | 3   |
| <b>New Features of Spatial-Temporal Dynamics of Bloch Oscillations</b><br>M. Dignam, K. Köhler, K. Leo, K. Litvinenko, F. Löser, V.G. Lyssenko, M. Sūdžius and G. Valušis                                                                            | 11  |
| <b>Nonharmonic Bloch Oscillations in GaAs/AlGaAs Superlattices</b><br>K. Litvinenko, K. Köhler, K. Leo, F. Löser and V.G. Lyssenko                                                                                                                   | 17  |
| <b>Wigner Paths for Quantum Transport in Semiconductors</b><br>P. Bordone, R. Brunetti, M. Pascoli, A. Bertoni and C. Jacoboni                                                                                                                       | 21  |
| <b>DX Center Breakdown in High Electric Fields</b><br>A. Dargys, N. Žurauskienė, E. Goovaerts, C. Van Hoof and G. Borghs                                                                                                                             | 25  |
| <b>High-Speed Switching of Double-Barrier Resonant-Tunneling Light-Emitting Diodes Investigated by Picosecond Electroluminescence Measurements</b><br>I. Romandić, N. Žurauskienė, E. Goovaerts, C. Van Hoof and G. Borghs                           | 29  |
| <b>Electrooptical Phenomena in Tunnel-Coupled Quantum Wells in Longitudinal Electric Field</b><br>L.E. Vorobjev, V.L. Zerova, I.E. Titkov, D.A. Firsov, V.A. Shalygin, V.N. Tulupenko and E. Towe                                                    | 33  |
| <b>Optical Phenomena under Hole Heating and Real Space Transfer in p-Type InGaAs/GaAs MQW Heterostructures</b><br>V.Y. Aleshkin, A.A. Andronov, A.V. Antonov, D.M. Gaponova, V.I. Gavrilenko, D.G. Revin, B.N. Zvonkov, I.G. Malkina and E.A. Uskova | 37  |
| <b>Multiminiband Transport in Superlattices: Effects, Description and Prospect for the Terahertz Bloch Oscillator - A Laser without Inversion</b><br>A.A. Andronov and I.M. Nefedov                                                                  | 41  |
| <b>Hot Electron FIR Emission and Absorption in GaAs/AlGaAs QW</b><br>L.E. Vorobjev, S.N. Danilov, D.V. Donetsky, V.L. Zerova, Y.V. Kochegarov, D.A. Firsov, V.A. Shalygin, G.G. Zegrya and E. Towe                                                   | 45  |
| <b>Spectral Functions for Ultra-Fast Phenomena and High Field Transport in Semiconductors</b><br>L. Rota and L. Reggiani                                                                                                                             | 49  |
| <b>Mobility Edge in Nondegenerate Semiconductor with Random Potential of Charged Impurities</b><br>M.S. Kagan, E.G. Landsberg and N. Zhdanova                                                                                                        | 53  |
| <b>Optical Probing of Ultrafast Devices</b><br>H.G. Roskos, T. Pfeifer, H.-. Heiliger, T. Löffler and H. Kurz                                                                                                                                        | 59  |
| <b>Ultrafast Spectroscopy of Semiconductor Devices</b><br>P. Borri, W.W. Langbein and J.M. Hvam                                                                                                                                                      | 67  |
| <b>Coherent Exciton and Biexciton Nonlinearities in Semiconductor Nanostructures: Effects of Disorder</b><br>W. Langbein, P. Borri and J.M. Hvam                                                                                                     | 73  |
| <b>Coherent and Incoherent Aspects of the Coupled Exciton-Phonon System</b><br>V.M. Axt, K. Siantidis, M. Herbst, T. Kuhn, S. Grosse, M. Koch and J. Feldmann                                                                                        | 79  |
| <b>High Speed Optoelectronic Devices for Optical to Millimeter Wave Conversion</b><br>J.P. Vilcot, V. Magnin, J. Harari, M. Fendler and D. Decoster                                                                                                  | 87  |
| <b>Picosecond Switching due to Electron Tunneling and Avalanche in a GaAs/Al<sub>0.34</sub>Ga<sub>0.66</sub>As Diode</b><br>A. Geizutis, A. Krotkus, A. Reklaitis and M. Asche                                                                       | 95  |
| <b>Dense Electron-Hole Plasma Effects on Energy Relaxation in Highly Excited Polar Semiconductors</b><br>S. Juršėnas, G. Kurilčik and A. Žukauskas                                                                                                   | 99  |
| <b>Carrier-Carrier Interaction and Fast Intersubband Scattering in Wide GaAs Quantum Wells</b><br>L. Rota, M. Hartig, S. Haacke, P.E. Selbmann and B. Deveaud                                                                                        | 103 |

|                                                                                                                                                                                                                                                                                                       |     |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Ultrafast Optical Processes in Novel Phosphate Glasses Doped with CdSe Quantum Dots</b><br>K.V. Yumashev, A.M. Malyarevich, N.N. Posnov, I.A. Denisov, V.P. Mikhailov and A.A. Lipovskii                                                                                                           | 107 |
| <b>Nondestructive Characterisation of MOVPE-Grown CdTe and ZnTe Epilayers by Picosecond and Nanosecond 'Excite-Probe' Techniques</b><br>E. Gaubas, V. Mizeikis, L. Bastienė, K. Jarašiūnas, N. Lovergine, A.M. Mancini, P. Prete and L. Subačius                                                      | 111 |
| <b>Influence of Growth Defects on Carrier Lifetime and Transport in Semiinsulating GaAs Studied by Transient Light-Induced Grating Technique</b><br>V. Mizeikis, K. Jarašiūnas, V. Gudelis and M. Sūdžius                                                                                             | 115 |
| <b>Z-Scan Measurements of Transient and Stationary Optical Nonlinearities in Semiconductor-Metal Nanocomposites</b><br>R. Adomavičius and A. Krotkus                                                                                                                                                  | 119 |
| <b>Measurement of Low Repetition Rate Picosecond Laser Pulse Parameters</b><br>A. Ozols, J. Porins, A. Kristins and G. Ivanovs                                                                                                                                                                        | 123 |
| <b>Monte Carlo Simulation of Shot-Noise Suppression in Multiple Tunneling Transport</b><br>L. Reggiani and A. Reklaitis                                                                                                                                                                               | 129 |
| <b>Shot-Noise Suppression in Nondegenerate Conductors</b><br>T. González                                                                                                                                                                                                                              | 139 |
| <b>Hydrodynamic Modeling of Spatial Cross-Correlation of Conduction Current Fluctuations</b><br>P. Shiktorov, J.C. Vaissière, L. Varani, J.P. Nougier, E. Starikov, V. Gružinskas, T. González, J. Mateos, D. Pardo and L. Reggiani                                                                   | 147 |
| <b>A Novel Hydrodynamic Modeling of Noise Spectra under Constant Voltage Operation</b><br>L. Varani, P. Shiktorov, J.C. Vaissière, J.P. Nougier, E. Starikov, V. Gružinskas and L. Reggiani                                                                                                           | 151 |
| <b>Dependence of Electron Energy Relaxation on Lattice Strain in InGaAs 2DEG Channels</b><br>A. Matulionis, V. Aninkevičius, J. Liberis, I. Matulionienė and J. Berntgen                                                                                                                              | 155 |
| <b>Hydrodynamic Modeling of Transport and Noise Phenomena in Bipolar Two-Terminal Silicon Structures</b><br>G. Ferrante, M. Zarcone, E. Starikov, P. Shiktorov, V. Gružinskas, L. Varani and L. Reggiani                                                                                              | 159 |
| <b>CAD-Oriented, Physics-Based Large- and Small-Signal Noise Analysis of Bipolar Semiconductor Devices</b><br>F. Bonani, S.D. Guerrieri, G. Ghione and M. Pirola                                                                                                                                      | 163 |
| <b>Hyperchaos in the Arrays of Mean-Field Coupled Oscillators</b><br>A. Čenys, A. Tamaševičius and A.N. Anagnostopoulos                                                                                                                                                                               | 167 |
| <b>Small Signal Amplification Caused by Non-Linear Properties of Compensated Germanium</b><br>S. Bumelienė                                                                                                                                                                                            | 171 |
| <b>Hot-Electron Noise in a GaAs Planar-Doped Barrier Diode: Experiment and Monte Carlo Simulation</b><br>J. Liberis, V. Gružinskas, A. Matulionis, P. Sakalas, R. Šaltis, E. Starikov, P. Shiktorov and B. Szentpáli                                                                                  | 175 |
| <b>Electron Mobility and Subband Population in Quantum Wells</b><br>J. Pozela, K. Požela, A. Namajūnas and V. Jucienė                                                                                                                                                                                 | 181 |
| <b>Spontaneous Interlevel Emission from Quantum Dot and Quantum Well Laser Structures</b><br>L.E. Vorobjev, D.A. Firsov, V.A. Shalygin, V.N. Tulupenko, Y.M. Shernyakov, A.Y. Egorov, A.E. Zhukov, A.R. Kovsh, P.S. Kop'ev, I.V. Kochnev, N.N. Ledentsov, M.V. Maximov, V.M. Ustinov and Z.I. Alferov | 189 |
| <b>Recombination Dynamics of Unthermalised Excitons in Quantum Well Structures of II-VI Semiconductors</b><br>M. Godlewski                                                                                                                                                                            | 197 |
| <b>Spin Polarized Transport in 1D and 2D Semiconductor Heterostructures</b><br>A. Bournel, P. Dollfus, P. Bruno and P. Hesto                                                                                                                                                                          | 205 |
| <b>Klein-Gordon Equation for Quantum Heat Transport in Semiconductor</b><br>M. Kozłowski and J. Marciak-Kozłowska                                                                                                                                                                                     | 213 |
| <b>Metastable Thermal States in Semiconductor Double Barrier Structures</b><br>M. Kozłowski, J. Marciak-Kozłowska and Z. Mucha                                                                                                                                                                        | 217 |
| <b>Population Inversion and Intraband IR Lasing under Hot Electron Intervalley Transfer in GaAs-AlAs Like MQW Heterostructures</b><br>V.Y. Aleshkin, A.A. Andronov and E.V.
