

# Table of Contents

## Preface

### Neutron Diffraction Studies of Magnetic Materials

W.B. Yelon 1

### X-Ray and Neutron Analysis of Magnetism in Reduced Dimension Systems

D. Givord, M. Bonfim, S. David, A. Fontaine, W. Neubeck, J. Rothman, C. Vettier and J. Vogel 11

### X-Ray Magnetic Scattering Studies at the LNLS

C. Giles 21

### Investigation of the Spin-Density-Wave and Charge-Density-Wave in Antiferromagnetic Cr and Cr-0.2 at %V Using X-Ray Diffraction

P.C. de Camargo, A.J.A.d. Oliveira, C. Giles, F. Yokaichiya and C. Vettier 33

### EXAFS Characterization of Cobalt Nanoparticles Embedded in a Copper Matrix

J.C. Cezar, M.C.L. Martins, D.Z. Cruz, F.C.S.d. Silva, M. Knobel and H. Tolentino 38

### Application of the Preisach Model of Hysteresis

G. Bertotti 43

### Study of Reversible and Irreversible Magnetization Processes Using the Moving Preisach Model

D.R. Cornejo and F.P. Missell 53

### Study of Thermally Activated Phenomena in Nanocrystalline Soft Magnetic Materials

V. Basso, M. LoBue, C. Beatrice, P. Tiberto and G. Bertotti 59

### Magnetic Multilayers: Interlayer Coupling in Fe/Cr/Fe

S.M. Rezende, C. Chesman, M.A. Lucena, M.C. deMoura, A. Azevedo and F.M.d. Aguiar 64

### Ferromagnetic Resonance in Co hcp and fcc Single Crystal Films on MgO

V. Santos, A.A.R. Fernandes, E.E. Fullerton and C.A. Ramos 76

### Magnetic Properties of Ti/Fe Double Layers Grown on MgO(100) by DC Magnetron Sputtering

J.R. Fermin, A. Azevedo, B. Li, F.M.d. Aguiar and S.M. Rezende 81

### Crystallographic and Magnetic Characterization of CoCr Thin Films

E.F. Chinaglia and I.C. Oppenheim 86

### Structural and Magnetic Properties of Sm/Fe Thin Films

H.J. Santos, F.A. Pinheiro, L.C. Sampaio, A.Y. Takeuchi, D.C. Ramos, R.A. Simão, C.A. Achete and M. Cremona 91

### Hysteresis and Interactions in Nanoparticulate Fe Films

J.M. González, M.I. Montero, L. Vázquez, J.M. Martín Gago, D. Givord, C. de Julián and K. O'Grady 96

### Spin Wave Propagation in Thin Ferromagnetic Films on Vicinal Antiferromagnetic Substrates

A.L. Dantas and A.S. Carriço 101

### Near Field Optics and Magnetism

Y. Souche, M. Schlenker, R. Raphel and L. Alvarez-Prado 105

### Blue/Green/Red LED Based TMOKE

A.P.B. Tufaile, A. dos Santos, Y. Souche and V. Novosad 115

### Low Temperature Magnetic Characterization of Ferromagnetic Films by TMOKE

A.P.B. Tufaile and A. dos Santos 120

### Colossal Magnetoresistance in Manganites: Role of the Electronic Phase Segregation

M.R. Ibarra and J.M. De Teresa 125

### Raman Scattering in CMR Manganites

E. Granado, N.O. Moreno, A. García, J.A. Sanjurjo, C. Rettori, I. Torriani, S.B. Oseroff, J.J. Neumeier, K.J. McClellan, S.-. Cheong and Y. Tokura 134

### Simultaneous Measurements of Resistance and Elastic Modulus in $\text{La}_{2/3}\text{Ca}_{1/3}\text{MnO}_3$

A.A. Ghilarducci, H.R. Salva, R.D. Sánchez and C. Vázquez 139

### Transport and Magnetic Properties in $\text{La}_{0.67}\text{Ca}_{0.33}\text{MnO}_3$ Thick Films

C. Hart, O. Arés and R. Escudero 144

### Unconventional Properties of $\text{Ln}_{2-x}\text{Ce}_x\text{CuO}_{4-y}$ (Ln=Pr, Nd, Sm, Eu) Compounds

R.F. Jardim 149

|                                                                                                                                                                                                                                                                                                                                                                         |     |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Effects of Oxygen on the Phase Diagram of <math>\text{La}_{1.85}\text{Sr}_{0.15}\text{Cu}</math></b><br>P.N. Lisboa Filho, S.M. Zanetti, E.R. Leite and W.A. Ortiz                                                                                                                                                                                                   | 159 |
| <b>Raman-Scattering and Weak-Ferromagnetism Studies in <math>\text{Eu}_{2-x}\text{Pr}_x\text{CuO}_4</math></b><br>P.G. Pagliuso, E. Granado, J.A. Sanjurjo, C. Rettori, I. Torriani, D.L. Rao, S.B. Oseroff, J. Sarrao and Z. Fisk                                                                                                                                      | 164 |
| <b>Investigating Giant Magnetoresistance in Granular Alloys by Experiments and Simulations</b><br>M. Knobel, E.F. Ferrari and F.C.S.d. Silva                                                                                                                                                                                                                            | 169 |
| <b>Magnetic Characterization of Granular <math>\text{CuFeNi}</math> Alloys</b><br>C.S. Martins, H.R. Rechenberg and F.P. Missell                                                                                                                                                                                                                                        | 179 |
| <b>Magnetization Processes of Small <math>\gamma\text{-Fe}_2\text{O}_3</math> Particles in Nonmagnetic Matrix</b><br>V. Masheva, M. Grigorova, J.E. Schmidt and M. Mikhov                                                                                                                                                                                               | 184 |
| <b>Anomalous Remanence of Granular <math>\text{CoCu}</math></b><br>J. Geshev, A.D.C. Viegas and J.E. Schmidt                                                                                                                                                                                                                                                            | 189 |
| <b>Modelling of Giant Magnetoimpedance from 1 Hz to 10 GHz</b><br>A. Yelon, D. Ménard, M. Britel and P. Ciureanu                                                                                                                                                                                                                                                        | 194 |
| <b>Highly Asymmetric Giant Magnetoimpedance</b><br>F.L.A. Machado, A.R. Rodrigues, A.A. Puça and A.E.P.d. Araujo                                                                                                                                                                                                                                                        | 202 |
| <b>Hysteretic Behavior and Anisotropy Fields in the Magneto-Impedance Effect</b><br>M. Vázquez, J.P. Sinnecker and G.V. Kuryanskaya                                                                                                                                                                                                                                     | 209 |
| <b>Domain Wall Oscillations in GMI Configuration</b><br>L.G.C. Melo and A. dos Santos                                                                                                                                                                                                                                                                                   | 219 |
| <b>Creep-Induced Magnetic Anisotropy of Amorphous Ribbons Studied by Magneto-Impedance and Magnetic Resonance</b><br>L. Kraus, A.N. Medina, F.G. Gandra, M. Knobel and V. Hašlar                                                                                                                                                                                        | 224 |
| <b>Influence of Induced Anisotropy and Magnetostriction in the Magnetoimpedance and Its Aftereffect in <math>\text{CoFeSiB}</math> Amorphous Ribbons</b><br>K.R. Pirota, J. Schoenmaker, M.L. Sartorelli, M. Knobel, J. Gutiérrez and J.M. Barandiarán                                                                                                                  | 229 |
| <b>Role of Soft Magnetic Properties on the Sensitivity of the Giant Magneto-Impedance Effect</b><br>H. Chiriac, T.A. Óvári, C.S. Marinescu and M. Knobel                                                                                                                                                                                                                | 234 |
| <b>Temperature Distribution in a Joule Effect Annealed Amorphous Glass-Covered Wire</b><br>H. Chiriac, M. Knobel and T.A. Óvári                                                                                                                                                                                                                                         | 239 |
| <b>Stress Dependence of Switching Field in Ultra-Thin Amorphous Wires</b><br>A.F. Cobeño, P. Aragonese, J.M. Blanco, L. Dominguez, A. Zhukov, V. Larin and J. González                                                                                                                                                                                                  | 244 |
| <b>Relationship between Structural and Magnetic Properties of Soft Nanocrystalline Materials</b><br>N. Murillo, J. González and J.M. González                                                                                                                                                                                                                           | 249 |
| <b>Anisotropic Magnetoresistance in <math>\text{Co-Ni}</math> Multilayers and Giant Magnetoimpedance Effect in Amorphous Wires</b><br>A. Hernando, C. Prados, P. Crespo and M. Vázquez                                                                                                                                                                                  | 254 |
| <b>Physics of Nanocrystalline Magnetic Materials</b><br>M. Dahlgren and R. Grössinger                                                                                                                                                                                                                                                                                   | 263 |
| <b>Investigation of Interaction Effects in a Nanocrystalline <math>\text{Nd}_2\text{Fe}_{14}\text{B}+\alpha\text{Fe}</math> Composite System</b><br>O.V. Billoni, S.E. Urreta and L.M. Fabietti                                                                                                                                                                         | 273 |
