

Table of Contents

Preface

Atomic Scale Mechanisms of Strengthening of Nitrogen Steels V.G. Gavriljuk	3
Atomic Interaction and Distribution of Nitrogen and Carbon Atoms in Binary Fe-N and Fe-C Alloys A. Sozinov, A.G. Balanyuk and V.G. Gavriljuk	13
Nitrogen Effect on Lattice Dynamics of FCC Fe-Cr-Mn (Ni) Austenitic Alloys S. Danilkin, A. Beskrovni and E. Jadrowski	19
Theoretical and Experimental Investigation of the Thermodynamic and Kinetic Nitrogen Absorption by Liquid Alloys G.M. Grigorenko, Y.M. Pomarin and V.Y. Orlovsky	25
The Neutron-Spectroscopy Proof of the Strong Cr-N Interactions in Nitrogen Stainless Steels V.V. Sumin, G. Chimid, T. Rashev and L. Saryivanov	31
Effect of Nitrogen Alloying on Elastic Coefficients of Austenitic Stainless Steel J. Tervo, A. Tarasenko and H. Hänninen	41
Distribution of Interstitial Impurities and their Diffusion Parameters in High-Nitrogen Steels Studied by Means of Internal Friction Y. Jagodzinski, S. Smouk, A. Tarasenko and H. Hänninen	47
Influence of the Flux Composition and State of the Gas Atmosphere over the Kinetics of Nitrogen Absorption by Steels and Alloys at the Arc Slag Remelting B.I. Medovar, L.B. Medovar, V.Y. Saenko, Y.M. Pomarin and A.V. Chernets	53
Phase Transformations in Iron-Nitrogen Martensites; Role of Elastic Strain Energies A. Böttger and E.J. Mittemeijer	61
Precipitates in Tempered Stainless Martensitic Steels Alloyed with Nitrogen, Carbon or Both V.G. Gavriljuk and H. Berns	71
Solubility of Nitrogen in Liquid Iron-Carbon Alloys A.G. Svjazin, V.E. Kindop and T. El Gammal	81
Modification of the Stainless Steel Database for High Manganese, Chromium and Nitrogen Contents J.A. Cotton, R.D. Knutsen and B. Sundman	89
Nitriding of Steel Powder-Thermodynamic Calculations and Experiments K. Frisk	95
Tempering of Iron-Carbon-Nitrogen Martensites: (Re) Distribution of Interstitial Atoms A. Böttger, P.J. Warren, G.D.W. Smith, M.J. van Genderen, S.J. Sijbrandij and E.J. Mittemeijer	103
Precipitation Sequences in Austenitic Fe-22Cr-21Ni-6Mo-(N) Stainless Steels S.J. Kim and T.H. Lee	109
Modeling Thermodynamics of Fe-N Phases: Characterisation of $-Fe_2N_{1-z}$ M.I. Pekelharing, A. Böttger, M.A.J. Somers, M.P. Steenvoorden, A.M. van der Kraan and E.J. Mittemeijer	115
Thermodynamic Calculation of Stacking Fault Energy and its Effect on Fcc→Hcp Phase Transformation in Nitrogen Alloyed Stainless Steels I. Yakubtsov, A. Ariapour and D.D. Perovic	121
Equilibrium Constant and Nitrogen Activity and the Parameters of Interaction $e_N^{(N)}$, $r_N^{(N)}$, $e_{Mn}^{(N)}$ in High Nitrogen Steels of Fe-Cr-Mn-N Type A.G. Svjazin, J. Siwka and T. Rashev	131
Effect of Nitrogen on the Response of Martensitic Stainless Steels to Rapid Heat Cycles W. Kaluba, R. Taillard and J. Foct	137
Precipitation in a High Nitrogen Superaustenitic Stainless Steel S. Heino, M. Knutson-Wedel and B. Karlsson	143
Current and Future Applications of High Nitrogen Steels G. Stein, I. Hucklenbroich and H. Feichtinger	151
High Nitrogen Martensitic Steel for Critical Components in Aviation I. Hucklenbroich, G. Stein, H. Chin, W. Trojahn and E. Streit	161

P 2000 - a New Austenitic High Nitrogen Steel for Power Generating Equipment G. Stein, I. Hucklenbroich and M. Wagner	167
New Industrial Applications of HNS C.A.P. Rennhard	175
Applications of Nitrogen-Alloyed Stainless Steels J. Sundvall, J. Olsson and B. Holmberg	181
Development of Commercial Nitrogen-Rich Stainless Steels M. Liljas and J.O. Nilsson	189
Investigation of Microstructure and Properties of a Chromium-Rich Austenitic Material with High Nitrogen Content P.D. Portella, M. Köhler and M. Renner	201
Effect of Structural Factors on the Mechanical Properties of High Nitrogen Austenitic Steels N. Nakamura, T. Tsuchiyama and S. Takaki	209
Principles of Alloy Design in High Nitrogen 12 % Chromium Steels A. Göcmen, P. Ernst and P. Holmes	215
Development of High Nitrogen Steels at Böhler Edelstahl GmbH Kapfenberg J. Bernauer, G. Lichtenegger, G. Hochörtler and H. Lenger	227
Solid State Alloying by Plasma Nitriding and Diffusion Annealing Treatment for Austenitic Stainless Steel C.E. Pinedo, J. Vatauvuk, S.D.d. Oliveira and A.P. Tschiptschin	233
Properties of Cold Worked High Nitrogen Chromium-Based Alloys H.J.C. Speidel, P.J. Uggowitzer, P. Ernst and M.O. Speidel	241
Alloy Design for Suppressing Eutectoid Reaction in High Nitrogen Austenitic Steels S. Takaki, N. Nakamura and H. Goto	249
Chromium-Manganese Stainless Steels with Nitrogen Content up to 2.10 wt% C. Andreev and T. Rashev	255
Melting of High Nitrogen Steels H. Feichtinger and G. Stein	261
The Influence of Niobium and Vanadium on the Microstructure and Mechanical Properties of a High Nitrogen Stainless Steel J.A. Cotton, R.D. Knutsen and C.I. Lang	271
Influence of the Counter-Pressure Casting on the Macrostructure of High Nitrogen Steel Industrial Blocks N. Andreev and T. Rashev	281
Nitrogen Recovery from Mn Nitrides in Steel Melts Y.E. Lee and R.J. Fruehan	289
Gas Porosity Defects in Duplex Stainless Steel Castings R. Arola, J. Wendt and E. Kivineva	297
The Effect of Nitrogen Alloying on Stellite 21 Cobalt Chromium Molybdenum Biomedical Implant Alloy: Processing and Microstructure W. Karlsen	303
Interaction of Nitrogen with Dislocations Studied by Means of Amplitude-Dependent Internal Friction Y. Jagodzinski, S. Smouk, A. Tarasenko and H. Hänninen	309
Small-Angle Neutron Scattering in Austenitic Fe-18Cr-10Mn-16Ni-0.5N and Fe-21Cr-10Mn-17Ni-0.5C Steels V.M. Nadutov, L.A. Bulavin and V.M. Garamus	315
Mössbauer Effect and Neutron Scattering in Austenitic High Nitrogen Steel Fe-19Cr-19Mn-0.9N V.M. Nadutov, V.M. Garamus and A.K. Islamov	321
Strengthening of Nitrogen-Containing Maraging Steels L.M. Kaputkina, V. Prokoshkina and D.Y. Uluntsev	327
Mössbauer Surface Analysis of Nitrogen Ion Implanted Austenitic and Ferritic Steels C. Cordier-Robert, A.M. Kliauga and J. Foct	333
Simulation of the Crystallization and Structure of Ferro Alloys Containing Nitrogen V. Manolov, A. Yotova, S. Bijev and T. Rashev	341

Theoretical and Technological Principles of Controlling Properties in Nitrogen-Containing Structural Steels	
L.M. Panfilova, L.A. Smirnov and A.A. Filippenkov	347
The Problems of High-Nitrogen Steels Production	
A.G. Svjazin, S.P. Efimenko and L.M. Kaputkina	353
HNS Steelmaking Process Using Thermal Plasma in a Ceramic Crucible	
J. Siwka, A.G. Svjazin, J. Jowsa and W. Derda	359
Investigation of the Non-Metallic Inclusions in a High Nitrogen Steel Block Cast by Counter-Pressure	
N. Andreev, T. Rashev and S. Popov	365
Refining of High Nitrogen Steels in a Closed Pressure Vessel	
W. Derda	371
The Gas Blow-Holes Forming in Nitrogen Iron Alloys and Steels during their Crystallization	
A.G. Svjazin, J. Siwka, Z. Skuza and A. Hutny	377
Nitrogen Control in AOD Converter	
P. Kupari and P. Hooli	385
High-Strength Single Crystals of Austenitic Stainless Steels with Nitrogen Content: Mechanisms of Deformation and Fracture	
Y.I. Chumlyakov, I.V. Kireeva, H. Sehitoglu, E.I. Litvinova, E.G. Zaharova and N.V. Luzginova	395
Anisotropy of Fracture Toughness of Austenitic High Nitrogen Chromium-Manganese Steel	
A.I. Balitskii, M. Diener, R. Magdowski, V.I. Pokhmurskii and M.O. Speidel	401
Dynamic Strain Aging of Austenitic High Nitrogen Cr-Ni and Cr-Mn Steels	
R. Ilola, M. Kemppainen and H. Hänninen	407
Mechanical Behaviour of Aged and not Prestrained High Nitrogen Austenitic Stainless Steels	
R. Taillard, F. Vanderschaeve and J. Foct	413
Effect of Cold Working and Aging on High Temperature Deformation of High Mn Stainless Steel	
M. Yoshikawa, R. Matsuki, Y. Habara and H. Aoyama	421
The Effect of Nitrogen on the Mechanical Behaviour of Cold-Worked Austenitic Stainless Steel Rod	
R.B. Dailly and A. Hendry	427
Nitrogen Alloyed 9-12% Chromium Steels with a Mertensitic-Austenitic Microstructure	
U.E. Klotz, C. Solenthaler, P.J. Uggowitzer, M.O. Speidel and P. Ernst	437
Martensitic High Nitrogen Steel for Applications at Elevated Temperature	
H. Berns, C. Escher and W.-. Streich	443
Low Cycle Fatigue of High Nitrogen Austenitic Stainless Steel Single Crystals	
J. Chumlyakov, J.B. Vogt, E. Tchepele, J. Foct and I.V. Kireeva	449
Grain Boundary Strengthening in Austenitic Nitrogen Steels	
V.G. Gavriljuk, H. Berns, C. Escher, N.I. Glavatskaya, A. Sozinov and Y.N. Petrov	455
Study of Solid Solution Hardening Nature of Austenitic Steels with Various Nitrogen Content	
E. Kozlov, N. Koneva, A.V. Plevkov and T.V. Cherkasova	461
Investigation of Physical-Mechanical Properties and Structural Stability of the Nitrogen-Free and Nitrogen-Containing Austenitic Alloys of Fe-Cr-Mn System at Cryogenic Temperatures	
G.N. Grikurov, I.B. Baratashvili, N.P. Antropov, Y.I. Rusinovich and I.P. Galounenko	467
Corrosion Properties of HNS	
H. Hänninen	479
The Influence of Nitrogen Alloying on the Pitting and Crevice Corrosion of Austenitic and Duplex Stainless Steels	
R.F.A. Jargelius-Pettersson, J. Flyg and S. Wessman	489
Influence of Metallurgical and Chemical Variables on the Pitting Corrosion Behaviour of Nitrogen-Bearing Austenitic Stainless Steels	
U. Kamachi Mudali, S. Ningshen, A.K. Tyagi and R.K. Dayal	495
On the Crevice Corrosion Behaviour of Nitrogen Bearing Austenitic Stainless Steels	
A.A. Ono, T. Sinohara and S. Tsujikawa	503

The Influence of Tungsten (W) on Properties in High Nitrogen Stainless Steels J.Y. Jonsson, L. Wegrelius, S. Heino, M. Liljas and R. Östberg	511
Corrosion Behaviour of Solution Nitrided Stainless Steels H. Berns, U. Eul, E. Heitz and R.L. Juse	517
Influence of Hydrogen on Material Behaviour of High Nitrogen Austenitic Stainless Steel M. Uhlemann, M.F. Shehata and K. Mummert	523
Pitting and Intergranular Corrosion Resistances of Nitrogen Ion Implanted Type 304 Stainless Steel U. Kamachi Mudali, T. Sundararajan, K.G.M. Nair and R.K. Dayal	531
Long Term Strength of High Nitrogen Steels in Water and Chloride Solutions A.I. Balitskii	539
Stress Corrosion Cracking Susceptibility of Nitrogen Alloyed Stainless Steels in 50% CaCl₂ Solution H. Leinonen and H. Hänninen	545
Effect of Nitrogen Ion Implantation on the Corrosion Resistance of Titanium Modified Type 316L Stainless Steel in Comparison with Argon and Oxygen Ion Implantation T. Sundararajan, U. Kamachi Mudali, K.G.M. Nair and M. Subbaiyan	553
Improvements in Localized Corrosion Resistance of Nitrogen Ion Implanted Type 316L Stainless Steel Orthopaedic Implant Devices K.M. Veerabadran, U. Kamachi Mudali, K.G.M. Nair and M. Subbaiyan	561
Nitrogen Bearing Austenitic Stainless Steels for Surgical Implants A.P. Tschitschin, C.H. Aidar, F.B. Neto and N. Alonso-Falleiros	569
An Experimental and Theoretical Study of Nitrogen Flux in Stainless Steel TIG Welds S. Hertzman and S. Wessman	579
Recent Developments on the Weldability of a New High Nitrogen Stainless Steel M. Harzenmoser, C. Rennhard, M. Hereth and M. Diener	591
Welding of High Nitrogen Superaustenitic and Superduplex Stainless Steels V. Gross, H. Heuser and T. Ladwein	597
The Role of Nitrogen in Improving Pitting Corrosion Resistance of High-Alloy Austenitic and Duplex Stainless Steel Welds M. Vilpas and H. Hänninen	603
Comparison of Welding Behaviour of SUS316L Steel by Gas Tungsten and Gas Metal Arc Processes in High Pressure Nitrogen Atmosphere O. Kamiya and Y. Kikuchi	609
The Effect of Hydrogen and Cooling Rate on the Mechanical and Corrosion Properties of SAF 2507 Duplex Stainless Steel Welds J.D. Kordatos, G. Fourlaris and G. Papadimitriou	615
Mechanical Characteristics of High Nitrogen Contained Weld Metal Based on 316L Stainless Steel Y. Kikuchi, O. Kamiya and H. Kobayashi	621
Powder Metallurgically Produced High Nitrogen Steels J. Liimatainen	629
High Nitrogen Corrosion Resistant Austenitic Stainless Steels Produced by HIP P/M Processing G.O. Rhodes and W.B. Eisen	635
Powder Metallurgy High Nitrogen Stainless Steel F.S. Biancaniello, R.D. Jiggetts, R.E. Ricker and S.D. Ridder	649
Nitrogen Alloying of Steel Powder Using Ammonia Gas in the Fluidised Bed J. Virta and S.P. Hannula	655
Nickel-Free High Nitrogen Austenitic Stainless Steels Produced by Metal Injection Moulding P.J. Uggowitzer, W.-. Bähre, H. Wohlfromm and M.O. Speidel	663
Effect of Nitrogen Content on Precipitation during Isothermal Annealing of P/M High Nitrogen Austenitic Stainless Steels J. Romu and H. Hänninen	673
Mechanical Properties and Corrosion Resistance of PM High Nitrogen Stainless Steel Consolidated by Hot Extrusion T. Isomoto, H. Ikeda, T. Kouda, K. Ichii and T. Oishi	681

Amorphization and Nanoscale Refinement of High Nitrogen Containing Fe-Based Crystalline Materials by Mechanical Alloying H. Ogawa, K. Omuro and H. Miura	687
Nitrogen Addition to bcc-Fe by Attrition Milling J. Rawers, R. Krabbe and D.C. Cook	695
Hot-Press Compaction of High Nitrogen Containing Austenitic Stainless Steel Powders Mechanically Alloyed K. Omuro, H. Miura and H. Ogawa	701
Preparation of High Nitrogen Cr-Ni and Cr-Mn Stainless Steel Powders by Mechanical Alloying and their Compositional Dependence of Austenitizing H. Miura, H. Ogawa and K. Omuro	707
Mössbauer and Small-Angle Neutron Scattering Study of Fe-Powder Mechanically Alloyed in Nitrogen and Argon Gas Environment V.M. Nadutov, V.M. Garamus and J. Rawers	715
Metallurgy of Nitrogen Absorption Process in High Cr Steels S. Takaki and N. Nakamura	723
Micromechanisms of Fatigue in High Nitrogen Duplex Steels O.B. Pedersen	733
Wear Properties of HNS J. Tervo	743
Microstructural Stability and Mechanical Properties of a High Nitrogen Super Duplex Stainless Steel J.O. Nilsson, P. Kangas, T. Karlsson and A. Wilson	751
Characterization of Fe-C/N Steel J. Rawers and P.J. Uggowitzer	757
Shape Memory Training and Properties of Fe-Mn-Based High Nitrogen Steels O. Söderberg, P. Yakovenko, K. Ullakko, V.G. Gavriljuk and V.K. Lindroos	763
Nitrogen Content and Orientation and Their Relation to Slip Activity, Twinning and Crack Formation during Cold Rolling of Austenitic Single Crystals N. Akdut, J. Keichel and J. Foct	769
The Hot Workability of CromaniteTM, a High Nitrogen Austenitic Stainless Steel J.N. Tarboton, L.M. Matthews, A. Sutcliffe, C.M.P. Frost and J.P. Wessels	777
Recrystallisation in High Nitrogen Alloyed Super Duplex Stainless Steel J. Keichel, G. Gottstein and J. Foct	785
Diagrams of Dynamic Recrystallization of Austenitic Stainless Steels with Nitrogen L.M. Kaputkina, S.P. Efimenko, S.V. Dobatkin, E.M. Leschinskaya, V.M. Panovko and M.A. Kazakov	793
Effect of Structure - Texture Evolution on Cold Work Hardening Caused by Rolling of Nitrogen Cr-Ni-Mn Austenitic Steels N.I. Glavatskaya	799
A Comparative Study of the Mechanical, Magnetic and Microstructural Characteristics of Modified SAF 2205 and 2507 Type Duplex Austenitic-Ferritic Stainless Steel G. Fournalis, M.G. Maylin and T. Gladman	805
Low Cycle Fatigue of High Nitrogen Duplex Stainless Steels J.B. Vogt, K. Massol and J. Foct	811
Structural Evolution of a 2205 Duplex Stainless Steel between 500°C and 800°C and Pitting Corrosion Resistance J.D. Kordatos, G. Fournalis and G. Papadimitriou	817
Magnetic Domain Imaging and Mechanical/Magnetic Property Characterisation of a 2507 Type Duplex Austenitic-Ferritic Stainless Steel G. Fournalis, M.G. Maylin and T. Gladman	823
Quantative Assessment of Intermetallic Phase Precipitation in a Super Duplex Stainless Steel Weld Metal Using Automatic Image Analysis A. Gregori, J.O. Nilsson and F. Bonollo	829
Structure and Properties of Chromium Nickel Dual Phase Nitrogen Steel after Solidification, Plastic Working and Heat Treatment L.M. Kaputkina, V. Prokoshkina, A.G. Svjazin, J. Siwka, D.Y. Uluntsev and V.E. Kindop	835
