

Table of Contents

Preface

Phase Transformations Research - A Success Story in Progress

H.I. Aaronson 1

Interface Stability and Evolution of Microstructures

R. Trivedi 45

Liquid to Solid Transition

T.V. Ramakrishnan 57

Eutectic Solidification

J.A. Sekhar and A.M. Sriramamurty 69

Symmetry and Phase Transitions

G. Venkataraman 81

Ferroelastic Phase Transitions

V.K. Wadhawan 91

On Clustering and Ordering Instabilities in FCC Solid Solutions

U.D. Kulkarni, S. Banerjee and R.V. Krishnan 111

Electron Microscopy and Electron Diffraction Studies of Phase Transformations and Phase Stability

S. Amelinckx, G. Van Tendeloo and J. Van Landuyt 123

The Mechanism of HCP-FCC Martensitic Transformation: A Diffraction Approach

S. Lele and D. Pandey 143

Polytypic Transitions

P. Krishna and M.T. Sebastian 157

Amorphous to Crystalline Phase Transformations

S. Ranganathan and C. Suryanarayana 173

Phase Transformation Studies of Metallic Glasses by Resistivity and Mössbauer Spectroscopy

A.K. Bhatnagar, B.B. Prasad and R. Jagannathan 187

Viscosity of Glass Forming Melts and its Temperature Dependence

K.S. Dubey and P. Ramachandrarao 193

Precipitate Nucleation

G.W. Lorimer 199

The Massive Transformation: A Critical Review

E.S.K. Menon and H.I. Aaronson 211

The Role of Interfaces in Diffusional Growth

K. Chattopadhyay 231

Active Eutectoid Decomposition in Zirconium Base Alloys

P. Mukhopadhyay 247

TEM Studies on the Precipitate Morphology in Quenched and Aged Al-2wt % Ge Alloy

G.N. Subbanna and N. Kishore 261

Morphology of Discontinuous Coarsening in Fe-Zn Alloys

G.T. Parthiban and S.P. Gupta 267

Heterogeneous Precipitation of the γ'' Phase in Inconel 625

M. Sundararaman and P. Mukhopadhyay 273

On the Stability of Precipitating Phases in Nickel Base Superalloys

A.K. Jena 281

The Kinetics of some Pressure-Induced Transformations

A.K. Singh 291

Structural Transition of Amorphous Alloys at High Pressures

H. Iwasaki 307

Phase Stability in the Diffusion Zone

G.B. Kale, S.K. Khera and R.V. Patil 319

Application of HVEM in Phase Transformation Research

K.H. Westmacott and U. Dahmen 325

Radiation-Induced Order-Disorder Transformations	335
K. Urban, S. Banerjee and J. Mayer	
Radiation Induced Instability and its Influence on the Decomposition of a Concentrated Alloy	353
C. Abromeit and K. Krishan	
Irradiation Induced Decomposition in CuNiFe Alloys	359
R. Poerschke, H.W. Gölling, W. Wagner and H. Wollenberger	
Applications of Magnetic Resonance and Mossbauer Effect in Phase Transitions	365
R. Vijayaraghavan and L.C. Gupta	
Positron Annihilation Study of Precipitation in Al-22 at. % Zn Alloy	379
A. Bharathi, C.S. Sundar and M. Vijayalakshmi	
Stress Induced Martensitic Transformations	387
R.V. Krishnan	
Martensitic Transformation and Precipitation Reactions in a Cu-9.9 wt% Al Alloy	399
E. Mohandas, D. Sundararaman, P. Kuppusami and V. Seetharaman	
Analysis of Binary Phase Diagrams	405
S.S. Balakrishna and A.K. Mallik	
New Experimental Techniques for Studies on Liquid-Solid Phase Equilibria	419
S.P. Garg, Y.J. Bhatt and R. Venkataramani	
Precipitation and Ordering Reactions in Interstitial Alloys	433
V. Seetharaman and D. Sundararaman	
Calculation of Liquidus Lines in Compound Forming Systems	449
P. Ramachandrarao and S. Lele	
Subject Index	455
