## Preface

|                                                                                                                                                                                                                                         |     |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Compositions, Structure and Glass-Forming Ability of Bulk Glassy Alloys</b><br>A. Inoue and A. Takeuchi                                                                                                                              | 1   |
| <b>Crystallization of Fe-Based Amorphous Alloys Studied In-Situ Using Synchrotron Radiation</b><br>D.S. dos Santos and D.R. dos Santos                                                                                                  | 13  |
| <b>Rapidly Solidified Bulk Al Alloys from a New Centrifugal Force Casting</b><br>R.A. Mesquita, D.R. Leiva, A. Le Moulec, A.R. Yavari and W.J. Botta Filho                                                                              | 21  |
| <b>Quasicrystalline Al-Based Alloys by Physical Laser Deposition</b><br>J. Copola, F. Audebert and S. Duhalde                                                                                                                           | 27  |
| <b>Mechanical Alloying of <math>Mg_{50}Ni_{50}</math> under Hydrogen</b><br>A.L.M. Costa, S.F. Santos, W.J. Botta Filho and T.T. Ishikawa                                                                                               | 33  |
| <b>Electrodeposition of Amorphous Fe-Cr-P-Ni-C Alloys. Morphological and Structural Characteristic</b><br>C.A.C.d. Souza, I.A. Carlos and E.D. Bidoia                                                                                   | 39  |
| <b>Formation of Novel Microstructures by Spray Deposition Process</b><br>C.S. Kiminami, C. Bolfarini and W.J. Botta Filho                                                                                                               | 45  |
| <b>Chemical Synthesis and Characterization of a Nanometric <math>Fe_{50}Ni_{50}</math> Alloy</b><br>R. Bolsoni, V. Drago and E. Lima Jr                                                                                                 | 51  |
| <b>Nanosize <math>Ni_{0.7}Zn_{0.3}Fe_2O_4</math> Powders Prepared by Combustion Synthesis, Sintering and Characterization</b><br>A.C.F. de Melo Costa, E. Tortella, M.R. Morelli and R.H.G.A. Kiminami                                  | 57  |
| <b>Ceramic Processing of Nanometric Powders Obtained by Reactive Milling</b><br>E.M.J.A. Pallone, V. Trombini, W.J. Botta Filho and R. Tomasi                                                                                           | 65  |
| <b>Preparation of Zinc Oxide Nanopowder by Freeze-Drying</b><br>F.F. Machado, E.J. Fodran, M.J. Kaufman and R.H.G.A. Kiminami                                                                                                           | 71  |
| <b>Processing of Barium Hexaferrite by High Energy Milling</b><br>P.I. Paulin Filho and R.R. Corrêa                                                                                                                                     | 77  |
| <b>Miscibility and Morphology of PVDF/P(VDF-TrFE) Blends</b><br>L.M.P. Pinheiro, M.R. Chaud, R. Gregório Filho and P.A.P. Nascente                                                                                                      | 83  |
| <b>Poly(Ethylene Terephthalate)-Organoclay Nanocomposites: Morphological Characterization</b><br>L.F. Boesel and L.A. Pessan                                                                                                            | 89  |
| <b>Microstructural Characterization of Spray Deposited Al-Y-Ni-Co-Zr Alloy and Al-Y-Ni-Co-Zr + <math>SiC_p</math> Metal Matrix Composite</b><br>C.R.M. Afonso, C.S. Kiminami, C. Bolfarini and M.J. Kaufman                             | 95  |
| <b>The “Big-Cube” Phase Found in Zr-Cu-Al-Ni Easy Glass Forming Alloys</b><br>M.F.d. Oliveira, M.J. Kaufman, W.J. Botta Filho and C.S. Kiminami                                                                                         | 101 |
| <b>Planar Waveguides Based on Nanocrystalline and <math>Er^{3+}</math> Doped <math>SnO_2</math></b><br>R.R. Gonçalves, M. Ferrari, A. Chiasera, M. Montagna, E.A. Moraes, L.V.A. Scalvi, C.V. Santilli, Y. Messaddeq and S.J.L. Ribeiro | 107 |
| <b>Microstructure and Magnetic Properties of Co Films on Si: Thickness and Roughness Dependence</b><br>H.B. de Carvalho, M.J.S.P. Brasil, M. Knobel and M.A. Cotta                                                                      | 111 |
| <b>Magnetic and Magnetotransport Properties of Nanostructured Magnetic Materials</b><br>M. Knobel, J.C. Denardin and A.L. Brandl                                                                                                        | 117 |
| <b>On the Magnetic Properties of Mechanothesized and Ball-Milled Spinel Ferrites</b><br>G.F. Goya and H.R. Rechenberg                                                                                                                   | 127 |
| <b>Some Design Considerations on Industrial Applications of Amorphous and Nanocrystalline Alloys</b><br>B.A. Luciano, M.K.A. Guimarães and W.B. de Castro                                                                               | 133 |
