

Table of Contents

Preface

Materials Science or Materials Design

- P. Bárczy 1

Pulsed Laser Deposition of Bioglass Coatings on Dental Implants

- G. Czél, R. Teghil and D. Janovszky 9

Examination of Formability of Cast Aluminium Alloy

- Á. Csizmazia and E. Halbritter 15

Laser Surface Treatment of Steels

- G. Králik, P. Fülöp, B. Verő and D. Zsámbók 21

Fatigue Crack Propagation Limit Curves for Different Metallic and Non-Metallic Materials

- J. Lukács 31

Laser Alloying of the Surface Layer of Al4.5Cu1Si Alloy with TiC and WC Particles

- J. Sólyom, A. Roósz, I. Teleszky and B. Sólyom 37

The Effect of Bath Al Content and Surface Roughness on Zinc Coating Properties

- A. Szabó and É. Dénes 45

Research and Development of New Martensitic Steels

- I. Artinger and Z. Rózsavölgyi 51

Development of New Coating Materials using a Laser Rapid-Alloy-Prototyping-Technique

- R. Colaço and R. Vilar 57

Stereological Characterisation of Wide Steel Strip Microstructures after Normalising and Thermomechanical Rolling

- Z. Csepeli and Z. Gácsi 63

Microwave-CVD Diamond Protective Coating for 3D Structured Silicon Microsensors

- H. Csorbai, P. Fürjes, G. Hárs, C. Dücső, I. Bársóny, E. Kálmán and P. Deák 69

Test Analysis of Enhanced Lightweight Aluminium Materials

- P. Détári and Á. Németh 75

Image Measurements of Curing Polymers and a Cross-Ply Laminate

- V. Gonda, C.J. Liu, C. van't Hof, L.J. Ernst and I. Koppány 79

Nanotechnology at Present and its Promise for the Future

- K. Havancsák 85

Dynamic Models of Silicone Rubbers Based on the Synthesis Method

- A. Huba and L. Molnár 95

Modern Multi-Phase Steels for the Automotive Industry

- K. Hulka 101

Magnetic and Structural Evolution of Finemet during Special Recrystallization

- R. Juhász, S. Szabó, L. Daróczi, M. Kis-Varga and D.L. Beke 111

Effect of Additives on the Properties of Al_2TiO_5 Ceramics

- T. Korim and I. Kotsis 117

Effect of Explosive Compaction on Microstructure and the Physical Properties of Ceramic Superconducting Materials Produced by Different Techniques

- I. Kotsis, M. Enisz, A. Szalay, I. Vajda and A.G. Mamalis 121

Properties of High-Density Amorphous Carbon Films Deposited by Laser Ablation

- G. Kováč, H. Csorbai, G.Z. Radnóczki, G. Vida, Z. Pászti, G. Pető and A. Karacs 127

Solidification of Al-4wt.-%Cu Alloy under Non-Steady-State Conditions

- J. Kovác, A. Roósz and Z. Gácsi 133

Modern Soft Magnetic Materials

- H.K. Lachowicz 139

Development of Monotectic Surface Layers by CO_2 Laser

- M. Svéda, A. Roósz, J. Sólyom, Á. Kovács and G. Buza 147

Porosity Shrinkage in the Al/SiC Composite

- K. Tomolya, Z. Gácsi and T. Pieczonka 153

Investigation of the Limit Curve of the Deformability of Hypereutectic AlSiNi Alloy

- T. Törköly and G. Ziaja 159

Hypereutectic RS/PM Al-Si-X Alloys	165
G. Ziaja and V. Stefániay	
A Comprehensive Study of Oxide Layers Formed during the Elaboration of Low Alloy and Electrotechnical Steel Sheets	175
É. Dénes and M. Kovács	
Investigation of Creep Microcavities by Scanning Electron Microscope	183
L. Dévényi and T. Biro	
EDS-Analysis of Intermetallic Precipitation in Thermally Aged SAF 2507 Type Superduplex Stainless Steel	189
J. Dobránszky and P.J. Szabó	
Effect of the Enamel Firing Thermal Cycle on the Microstructure and the Hydrogen Permeability of Enamel-Grade Steels	195
A. Fauszt, B. Verő, R. Takács, Á. Horváth and H. Schneider	
Metallographic Aspects of Surface-Treated Steels by using Laser Technology	201
E. Réka Fábián, P. Boross, B. Verő and P. Fülöp	
Thermal Fatigue Test of Laser Surface Treated Rollers	207
P. Fülöp, Z. Csepeli, O. Szabados and B. Verő	
The Application of Digital Image Processing to Materials Science	213
Z. Gácsi	
Comparison of the Properties of Galvanised Welded Joints Produced by Different Methods	221
B. Göblyös, S. Kőszegi and P. Varjas	
Characterization of the Microstructure of Severely Deformed Titanium by X-Ray Diffraction Profile Analysis	229
J. Gubicza, I.C. Dragomir, G. Ribárik, Y.T. Zhu, R. Valiev and T. Ungár	
An Absolute Scale for the Cohesion Energy of Pure Metals	235
G. Kaptay, G. Csicsovszki and M.S. Yaghmaee	
AFM and SEM: Competing or Complementary Techniques?	241
E. Kálmán, P.M. Nagy, Á. Csanády, K. Papp, H. Csorbai, C. Hunyadi and J. Telegdi	
Investigation of Bainitic Transformation of Austempered Ductile Iron (ADI)	253
G. Kozsely and F. Tranta	
Correlations between Fretting Situation and the Contact Resistivity of Electrical Connections	261
L. Kuzsella, P. Bárczy, S. Foutry and P. Kapsa	
Investigation of the Relationships between Material Properties and Processing Parameters of Boron Micro-Alloyed Quenched and Tempered Steels	267
J. Lőrinczi, G. Králík, M. Kovács and Á. Horváth	
Micromagnetic Measurements and their Applications	275
I. Mészáros	
Deforming Texture Effect on Phase Transformation in Stainless Steels	281
E. Nagy, V. Mertinger, F. Tranta and J. Sólyom	
Connection between the Results of the Low-Cycle Fatigue and the Fatigue Crack Growth Tests	289
G. Nagy and J. Lukács	
The Combined Application of Nanoindentation and Scanning Probe Microscopy to Materials Sciences	297
P.M. Nagy, A. Csanády, B. Verő, G. Pálinkás and E. Kálmán	
Theoretical Analysis of Hydrogen Permeation and Entrapment Kinetics	305
L. Péter, B. Almási, B. Verő and H. Schneider	
The Role of an Anisotropy of the Elastic Moduli in the Determination of the Elastic Limit Value	311
J. Prohászka and J. Dobránszky	
A Phenomenological Method for the Prediction of Damage Accumulation Processes under Varying External Conditions	317
T. Réti and T. Kovács	
Thermodynamics-Based Semi-Empirical Description of the Liquidus Surface and Partition Coefficients in Ternary Al-Mg-Si Alloy	323
A. Roósz, J. Farkas and G. Kaptay	

Diagnostic Method for the Determination of Refractory Lining Thickness of High Temperature Equipment	
I. Szűcs, Á.B. Palotás, N. Hegman, I. Réz, M. Barth and L. Papp	329
Material Structural Aspects of Micro-Scale Chip Removal	
M. Takács and B. Verő	337
Nondestructive Material Evaluation by Novel Electromagnetic Methods	
G. Vértesy and A. Gasparics	343
Modelling of a Specific Bone Replacement Material	
I. Bagi and P.B. Béda	353
Simulation of Recrystallization by Cellular Automaton Method	
P. Barkóczy, A. Roósz and J. Geiger	359
A Virtual LD-Steel-Converter	
M.Z. Benkő and G. Kaptay	365
A Dynamic Model of Ceramic Particle-Solidification Front Interaction	
Á. Borsik, K.K. Kelemen and G. Kaptay	371
Simulation of Rod Rolling to Improve Cold Heading Qualities	
B. Buchmayr	377
A Simplified Semi-Empirical Method to Select the Processing Parameters for Laser Clad Coatings	
L. Costa, I. Felde, T. Réti, Z. Kálazi, R. Colaço, R. Vilar and B. Verő	385
Analysis of the Effect of Casting Parameters on Continuous Steel Casting	
G. Fehérvári, M. Réger and B. Verő	395
Virtual Fracture Surfaces	
Z. Gácsi and G. Sárközi	405
Nanostructure Analysis of Complex Materials using Two-Dimensional Small Angle X-Ray Scattering	
H.F. Jakob, K. Erlacher and P. Fratzl	411
Interfacial Criteria for Producing Metal Matrix Composites and Ceramic Particle Stabilized Metallic Foams	
G. Kaptay	419
Principal Outcomes of the EC Thematic Network on Modelling Tools for the Forging Industry	
C.S. Kirk and A.N. Bramley	425
Variability of Diffusion Coefficients in the Analysis of Heterogeneous Welded Joints	
C.S. Kirk, A. Balogh, L. Béres and A.R. Mileham	431
Finite Element Simulation of Multi-Pass Equal Channel Angular Pressing	
G. Králík, Z. Széles and D. Malgyn	439
Modelling of Heat Transfer in Continuous Casting	
S. Louhenkilpi	445
The 'In Situ' Investigation of Solidification	
C. Pólska, Z. Gácsi and M. Réger	455
Characterizing the Inner Structure of Continuously Cast Sections by Using a Heat Transfer Model	
M. Réger and S. Louhenkilpi	461
Topological Characterization of 2D Finite Cellular Systems	
T. Réti and K. Böröczky	471
Numerical Simulation of Dendrite Arm Coarsening in the Case of Ternary Al Alloys	
V. Rontó and A. Roósz	483
The Solubility of Nitrogen and Nitrides in Ternary Liquid Iron Alloys. The Limits of the 'Solubility Product' Concept	
M.S. Yaghmaee and G. Kaptay	491
