

# Table of Contents

## Preface

### Modelling Interfacial Energies in Metallic Systems

G. Kaptay 1

### Advanced Materials Science Applied in the Restoration of Outdoor Bronze Statues

I.E. Sajó, G. Buza, W. Madarassy and E. Kálmán 11

### Advanced Structural Steels in the Hungarian Steel Industry

B. Verő, D. Zsámbók, Á. Horváth, J. Dobránszky, L. Kopasz and J. Hirka 23

### Surface Modification of Silicon Nitride Ceramics

C. Balázsi, F. Wéber and P. Arató 33

### Interaction between a Titanium-Containing Molten Salt and an Alumina Plate

P. Baumli, J. Sytchev, Z.H. Göndör and G. Kaptay 39

### Superficial Remelting of Cast Iron by Laser Radiation

G. Buza, Z. Kálazi, E. Kálmán and J. Sólyom 45

### Tribological Properties of Laser Processed Fe-Cr-C Alloys

R. Colaço and R. Vilar 53

### Basalt Fiber Reinforced Hybrid Polymer Composites

T. Czigány 59

### Combination of CVD Diamond and DLC Film Growth with Pulsed Laser Deposition to Enhance the Corrosive Protection of Diamond Layers

H. Csorbai, G. Kovách, G. Pető, P. Csíkvári, A. Karacs and E. Kálmán 67

### Wear of the Tungsten Electrode at the TIG Arc-Spot Welding of Dissimilar Metals

J. Dobránszky, S. Bella and I. Kientzl 73

### Investigation of Notch Sensitivity and Blade Breakage of Bandsaw Blade Steels

J. Dobránszky, A. Magasdi and J. Ginsztler 79

### Dynamic Analysis of Silicone Elastomers

A. Huba, L. Molnár, A. Czmerk and T. Fischl 85

### The Role of Niobium in Cold Rolled TRIP Steel

K. Hulka 91

### Crystallization of $\text{Fe}_{40}\text{Ni}_{40}\text{B}_{16}\text{Si}_4$ Amorphous Alloy

D. Janovszky, J. Sólyom, A. Roósz and L. Daróczi 103

### Fatigue Crack Growth Tests on Carbon Fibre Reinforced Aluminium Matrix Composites

R. Karcagi and J. Lukács 111

### Magnetic and Structural Properties of Ferrimagnetic Bioceramics

A.C. Kis, T. Leventouri and J.R. Thompson 117

### Formation and Characterization of Electric Contacts on CVD Diamond Films Prepared by Ion Implantation

G. Kovách, H. Csorbai, G. Dobos, A. Karacs and G. Pető 123

### Experimental Investigations of the Al 6082 Alloy Subjected to Equal-Channel Angular Pressing

G. Králícs, D. Malgyn and A. Fodor 129

### Some Experiences of Tribological, Microstructural and Mechanical Investigation of Post Heat Treated SiAlON Ceramics

M.M. Berkes, J.B. Kiss, L. Kuzsella and P. Arató 135

### Carbon Nanotubes – on the Eve of Success?

K. Niesz, I. Vesselényi, D. Méhn, Z. Kónya and I. Kiricsi 141

### Intercalation of Lithium Into Graphite as the First Step to Produce Carbon Nano-Tubes in an Electrochemical Way

J. Sytchev, N. Borisenko and G. Kaptay 147

### Border Surface Changes on the Edge of the Castings with Nodular Graphite

K. Szocs and M. Vaida 153

### Copper Coating by Electroless Process for Aluminium Matrix Composite

K. Tomolya, Z. Gácsi and Á. Kovács 159

### Modelling of Filtration of Aluminium Melt Through Porous Pressed Filtering Sheets

B. Varga 165

<b>Producing of Singlecrystal from Heusler Alloy</b>	171
Z. Veres and A. Roósz	
<b>Study of the Isothermal Phase Transformations in Duplex Stainless Steels by EBSD Method</b>	177
T. Berecz and P.J. Szabó	
<b>Effect of Thermo-Mechanical Fatigue on the Microstructure of Steels</b>	183
T. Bíró and P.J. Szabó	
<b>Fatigue Crack Growth Tests on Glass Fibre Reinforced Polymer Matrix Composite</b>	189
Z. Csomós and J. Lukács	
<b>Thermogravimetric and Metallographic Investigation of the Oxidation of Steels for Enamelling</b>	195
A. Fauszt, B. Verő and É. Dénes	
<b>Effect of the Microstructure of Al-Killed Low Carbon Enamel-Grade Steel Sheets on Hydrogen Permeability</b>	201
E.R. Fábián, B. Verő and L. Dévényi	
<b>Stereological Characterisation of Steel Wide Strip Microstructures</b>	207
Z. Gácsi and Z. Csepeli	
<b>Investigation of Wear Process by a Gradient Method</b>	213
T. Kovács and L. Dévényi	
<b>Temporary Corrosion Protection of Galvanised Steel by Coatings Containing Cerium, Yttrium and Lanthanum</b>	219
S. Kőszegi, I. Felhősi, F.H. Kármán and E. Kálmán	
<b>Tribological Properties of SiC Structural Materials</b>	225
L. Kuzsella and P. Bárczy	
<b>Complex Magnetic Investigation of Ferritic Stainless Steel</b>	231
I. Mészáros	
<b>Investigation of Thermomechanical Treated Austenitic Stainless Steel</b>	237
E. Nagy, V. Mertinger, F. Tranta and J. Sólyom	
<b>Assessment of Methods in Girth Welds of Steel Pipelines</b>	243
G. Nagy, J. Lukács and I. Török	
<b>Investigation of Stick-Slip Effects in Wet Friction Drive Elements</b>	249
G. Polt, T. Sebestyén, A. Pauschitz and F. Franek	
<b>Tribological Investigations of Parts Sintered and Coated by Laser Beam</b>	255
T. Sebestyén, G. Buza, F. Franek, J. Takács, Z. Kálazi, A. Pauschitz and L.S. Tóth	
<b>Discontinuous Creep Behaviour of 15Mo3 Type Steel</b>	261
P.J. Szabó	
<b>Effect of Monotonic and Cyclic Deformation on the IQ-Maps of Austenitic Stainless Steel</b>	267
P.J. Szabó and I. Szalai	
<b>Role of Dilatometry in Development of Multiphase Steels</b>	273
M. Takács and B. Verő	
<b>Development and Evaluation of a Microscopic Method for Determination of Adhesion Strength</b>	279
G. Tolnai, P.M. Nagy, Z. Keresztes, P. Lucz and E. Kálmán	
<b>Reactor Pressure Vessel Integrity in Light of the Evolution of Materials Science and Engineering</b>	287
P. Trampus	
<b>Application of WFS for Simultaneous Work Function and Secondary Electron Emission Measurement on Ba Covered Tungsten</b>	293
G. Vida, I. Beck, V.K. Josepovits and M. Győr	
<b>Modeling the Infiltration of Liquid Metals Into Porous Ceramics</b>	297
T. Bárczy and G. Kaptay	
<b>Investigation of Processes Evolving during Thin Film Production by Laser Surface Modification</b>	303
P. Boross, Z. Kálazi, O. Verezub and B. Verő	
<b>Analysis of Literature Models on Viscosity of Binary Liquid Metallic Alloys on the Example of the Cu-Ag System</b>	309
I. Budai, M.Z. Benkő and G. Kaptay	
<b>Simulation of Phase Transformations in Steel Parts Produced by Laser Powder Deposition</b>	315
L. Costa, R. Vilar, T. Réti, R. Colaço, A.M. Deus and I. Felde	

<b>Comparing of the Processes of the Isothermal Phase Transformations of the Material Type 50 CrV 4 Using Different TTT Diagrams and Applying FEM Based Phase Elements</b>	321
Z. Dudás	
<b>Calculation of Solidification during Continuous Casting and its Experimental Verification</b>	329
G. Fehérvári	
<b>Numerical Methods for Safeguarding the Performance of the Quenching Process</b>	335
I. Felde, T. Réti, S. Segerberg, J. Bodin and S. Sarmiento	
<b>Simulation of Precipitation of Compounds from Solid Solution by Joined Finite Difference and Cellular Automaton Methods</b>	341
J. Geiger, A. Roósz and P. Barkóczy	
<b>Experimental Study of Heat Transfer in Hot Rolling and Continuous Casting</b>	347
J. Horský, M. Raudenský and M. Pohanka	
<b>Quantitative Validation of Microstructure Simulation in Case of Unidirectionally Solidified Al-Si Alloys</b>	355
J. Kovác, J. Szőke, T. Samu and A. Roósz	
<b>Dimensions of Lifetime Management</b>	361
J. Lukács	
<b>Chaotic Phenomena in Fast Plastic Deformation (in the Case of Cutting)</b>	369
Z. Pálmai	
<b>Macrostructure Prediction of CC Slabs</b>	375
M. Réger, B. Verő, H. Kytönen, S. Louhenkilpi and Á. Szélíg	
<b>Topological Characterization of Finite Cellular Systems Represented by 4-Dimensional Polytopes</b>	381
T. Réti and K. Böröczky	
<b>A Possible Extension of the Aboav-Weaire Law</b>	389
T. Réti and I. Zsoldos	
<b>Laser Transformation Hardening of Different Steels and 3D Modelling of Their Temperature Distribution</b>	399
R. Rowshan and M.K. Baán	
<b>Numerical Modeling and Simulation in Sheet Metal Forming Academic and Industrial Perspectives</b>	407
M. Tisza	
<b>Stability of SiC in Al-Rich Corner of Liquid Al-Si-Mg System</b>	415
M.S. Yaghmaee and G. Kapta	
<b>Simulation of Continuous Casting Tundish</b>	421
S. Vapalahti and S. Louhenkilpi	
<b>Penetration Dynamics of Solid Particles into Liquids High-Speed Experimental Results and Modelling</b>	429
O. Verezub, G. Kapta, T. Matsushita and K. Mukai	
<b>Fabrication of Hot Pressed C/Si<sub>3</sub>N<sub>4</sub> Nanocomposites</b>	435
C. Balázsi, F.Ç. Şahin, M.E. Cura, A. Yesilcubuk, O. Addemir and F. Wéber	
<b>Acetabular Cup Deformation and Strength Improvement by Physical Crosslinking</b>	441
G. Czél and G. Zsoldos	
<b>Partial Electron Beam Hardening of Cast Iron Camshafts</b>	447
Á. Csizmazia, T. Réti, M. Horváth and I. Oláh	
<b>Evolution of the Microstructure of Al 6082 Alloy during Equal-Channel Angular Pressing</b>	453
J. Gubicza, G. Krallies, I. Schiller and D. Malgyn	
<b>Nanocrystalline Soft Magnetic Cores in Applications</b>	459
R. Juhász, S. Szabó, Z. Kátai, F. Bakos and D.L. Beke	
<b>Influence of Tin-Chloride Pretreatment on Mirror Coating Adhesion</b>	465
A. Nagy and N. Hegman	
<b>A Comparative Examination of the Friction Coefficient of two Different Sliding Bearing</b>	471
M. Svéda, A. Roósz, G. Buza and L. Kuzsella	
<b>Excellent Magnetic Properties, Domain and Atomic Structure of Specially Heat Treated Finemet Type Materials</b>	477
S. Szabó, R. Juhász, L. Pogány, L. Daróczi and D.L. Beke	
<b>Mechanical Properties of Seals in High Pressure Sodium Lamp</b>	483
Z. Tóth, G. Steinbach and A. Juhász	

**Determination of Residual Stresses in Hot Extruded Rod**

T. Törköly, G. Ziaja and G. Viczián

489
