

Table of Contents

Preface

Modelling Interfacial Energies in Metallic Systems G. Kaptay	1
Advanced Materials Science Applied in the Restoration of Outdoor Bronze Statues I.E. Sajó, G. Buza, W. Madarassy and E. Kálmán	11
Advanced Structural Steels in the Hungarian Steel Industry B. Verő, D. Zsámbók, Á. Horváth, J. Dobránszky, L. Kopasz and J. Hirka	23
Surface Modification of Silicon Nitride Ceramics C. Balázsi, F. Wéber and P. Arató	33
Interaction between a Titanium-Containing Molten Salt and an Alumina Plate P. Baumli, J. Sytchev, Z.H. Göndör and G. Kaptay	39
Superficial Remelting of Cast Iron by Laser Radiation G. Buza, Z. Kálazi, E. Kálmán and J. Sólyom	45
Tribological Properties of Laser Processed Fe-Cr-C Alloys R. Colaço and R. Vilar	53
Basalt Fiber Reinforced Hybrid Polymer Composites T. Czigány	59
Combination of CVD Diamond and DLC Film Growth with Pulsed Laser Deposition to Enhance the Corrosive Protection of Diamond Layers H. Csorbai, G. Kovách, G. Pető, P. Csikvári, A. Karacs and E. Kálmán	67
Wear of the Tungsten Electrode at the TIG Arc-Spot Welding of Dissimilar Metals J. Dobránszky, S. Bella and I. Kientzl	73
Investigation of Notch Sensitivity and Blade Breakage of Bandsaw Blade Steels J. Dobránszky, A. Magasdi and J. Ginsztler	79
Dynamic Analysis of Silicone Elastomers A. Huba, L. Molnár, A. Czmerk and T. Fischl	85
The Role of Niobium in Cold Rolled TRIP Steel K. Hulka	91
Crystallization of Fe₄₀Ni₄₀B₁₆Si₄ Amorphous Alloy D. Janovszky, J. Sólyom, A. Roósz and L. Daróczy	103
Fatigue Crack Growth Tests on Carbon Fibre Reinforced Aluminium Matrix Composites R. Karcagi and J. Lukács	111
Magnetic and Structural Properties of Ferrimagnetic Bioceramics A.C. Kis, T. Leventouri and J.R. Thompson	117
Formation and Characterization of Electric Contacts on CVD Diamond Films Prepared by Ion Implantation G. Kovách, H. Csorbai, G. Dobos, A. Karacs and G. Pető	123
Experimental Investigations of the Al 6082 Alloy Subjected to Equal-Channel Angular Pressing G. Krallics, D. Malgyn and A. Fodor	129
Some Experiences of Tribological, Microstructural and Mechanical Investigation of Post Heat Treated SiAlON Ceramics M.M. Berkes, J.B. Kiss, L. Kuzsella and P. Arató	135
Carbon Nanotubes – on the Eve of Success? K. Niesz, I. Vesselényi, D. Méhn, Z. Kónya and I. Kiricsi	141
Intercalation of Lithium Into Graphite as the First Step to Produce Carbon Nano-Tubes in an Electrochemical Way J. Sytchev, N. Borisenko and G. Kaptay	147
Border Surface Changes on the Edge of the Castings with Nodular Graphite K. Szocs and M. Vaida	153
Copper Coating by Electroless Process for Aluminium Matrix Composite K. Tomolya, Z. Gácsi and Á. Kovács	159
Modelling of Filtration of Aluminium Melt Through Porous Pressed Filtering Sheets B. Varga	165

Producing of Singlecrystal from Heusler Alloy Z. Veres and A. Roósz	171
Study of the Isothermal Phase Transformations in Duplex Stainless Steels by EBSD Method T. Berecz and P.J. Szabó	177
Effect of Thermo-Mechanical Fatigue on the Microstructure of Steels T. Bíró and P.J. Szabó	183
Fatigue Crack Growth Tests on Glass Fibre Reinforced Polymer Matrix Composite Z. Csomós and J. Lukács	189
Thermogravimetric and Metallographic Investigation of the Oxidation of Steels for Enamelling A. Fauszt, B. Verő and É. Dénes	195
Effect of the Microstructure of Al-Killed Low Carbon Enamel-Grade Steel Sheets on Hydrogen Permeability E.R. Fábián, B. Verő and L. Dévényi	201
Stereological Characterisation of Steel Wide Strip Microstructures Z. Gácsi and Z. Csepeli	207
Investigation of Wear Process by a Gradient Method T. Kovács and L. Dévényi	213
Temporary Corrosion Protection of Galvanised Steel by Coatings Containing Cerium, Yttrium and Lanthanum S. Kőszegi, I. Felhősi, F.H. Kármán and E. Kálmán	219
Tribological Properties of SiC Structural Materials L. Kuzsella and P. Bárczy	225
Complex Magnetic Investigation of Ferritic Stainless Steel I. Mészáros	231
Investigation of Thermomechanical Treated Austenitic Stainless Steel E. Nagy, V. Mertinger, F. Tranta and J. Sólyom	237
Assessment of Methods in Girth Welds of Steel Pipelines G. Nagy, J. Lukács and I. Török	243
Investigation of Stick-Slip Effects in Wet Friction Drive Elements G. Polt, T. Sebestyén, A. Pauschitz and F. Franek	249
Tribological Investigations of Parts Sintered and Coated by Laser Beam T. Sebestyén, G. Buza, F. Franek, J. Takács, Z. Kálazi, A. Pauschitz and L.S. Tóth	255
Discontinuous Creep Behaviour of 15Mo3 Type Steel P.J. Szabó	261
Effect of Monotonic and Cyclic Deformation on the IQ-Maps of Austenitic Stainless Steel P.J. Szabó and I. Szalai	267
Role of Dilatometry in Development of Multiphase Steels M. Takács and B. Verő	273
Development and Evaluation of a Microscopic Method for Determination of Adhesion Strength G. Tolnai, P.M. Nagy, Z. Keresztes, P. Lucz and E. Kálmán	279
Reactor Pressure Vessel Integrity in Light of the Evolution of Materials Science and Engineering P. Trampus	287
Application of WFS for Simultaneous Work Function and Secondary Electron Emission Measurement on Ba Covered Tungsten G. Vida, I. Beck, V.K. Josepovits and M. Győr	293
Modeling the Infiltration of Liquid Metals Into Porous Ceramics T. Bárczy and G. Kaptay	297
Investigation of Processes Evolving during Thin Film Production by Laser Surface Modification P. Boross, Z. Kálazi, O. Verezub and B. Verő	303
Analysis of Literature Models on Viscosity of Binary Liquid Metallic Alloys on the Example of the Cu-Ag System I. Budai, M.Z. Benkő and G. Kaptay	309
Simulation of Phase Transformations in Steel Parts Produced by Laser Powder Deposition L. Costa, R. Vilar, T. Réti, R. Colaço, A.M. Deus and I. Felde	315

Comparing of the Processes of the Isothermal Phase Transformations of the Material Type 50 CrV 4 Using Different TTT Diagrams and Applying FEM Based Phase Elements Z. Dudás	321
Calculation of Solidification during Continuous Casting and its Experimental Verification G. Fehérvári	329
Numerical Methods for Safeguarding the Performance of the Quenching Process I. Felde, T. Réti, S. Segerberg, J. Bodin and S. Sarmiento	335
Simulation of Precipitation of Compounds from Solid Solution by Joined Finite Difference and Cellular Automaton Methods J. Geiger, A. Roósz and P. Barkóczy	341
Experimental Study of Heat Transfer in Hot Rolling and Continuous Casting J. Horský, M. Raudenský and M. Pohanka	347
Quantitative Validation of Microstructure Simulation in Case of Unidirectionally Solidified Al-Si Alloys J. Kovác, J. Szőke, T. Samu and A. Roósz	355
Dimensions of Lifetime Management J. Lukács	361
Chaotic Phenomena in Fast Plastic Deformation (in the Case of Cutting) Z. Pálmai	369
Macrostructure Prediction of CC Slabs M. Réger, B. Verő, H. Kytönen, S. Louhenkilpi and Á. Szélig	375
Topological Characterization of Finite Cellular Systems Represented by 4-Dimensional Polytopes T. Réti and K. Böröczky	381
A Possible Extension of the Aboav-Weaire Law T. Réti and I. Zsoldos	389
Laser Transformation Hardening of Different Steels and 3D Modelling of Their Temperature Distribution R. Rowshan and M.K. Baán	399
Numerical Modeling and Simulation in Sheet Metal Forming Academic and Industrial Perspectives M. Tisza	407
Stability of SiC in Al-Rich Corner of Liquid Al-Si-Mg System M.S. Yaghmaee and G. Kaptay	415
Simulation of Continuous Casting Tundish S. Vapalahti and S. Louhenkilpi	421
Penetration Dynamics of Solid Particles into Liquids High-Speed Experimental Results and Modelling O. Verezub, G. Kaptay, T. Matsushita and K. Mukai	429
Fabrication of Hot Pressed C/Si₃N₄ Nanocomposites C. Balázsi, F.Ç. Şahin, M.E. Cura, A. Yesilcubuk, O. Addemir and F. Wéber	435
Acetabular Cup Deformation and Strength Improvement by Physical Crosslinking G. Czél and G. Zsoldos	441
Partial Electron Beam Hardening of Cast Iron Camshafts Á. Csizmazia, T. Réti, M. Horváth and I. Oláh	447
Evolution of the Microstructure of Al 6082 Alloy during Equal-Channel Angular Pressing J. Gubicza, G. Krallics, I. Schiller and D. Malgyn	453
Nanocrystalline Soft Magnetic Cores in Applications R. Juhász, S. Szabó, Z. Kátai, F. Bakos and D.L. Beke	459
Influence of Tin-Chloride Pretreatment on Mirror Coating Adhesion A. Nagy and N. Hegman	465
A Comparative Examination of the Friction Coefficient of two Different Sliding Bearing M. Svéda, A. Roósz, G. Buza and L. Kuzsella	471
Excellent Magnetic Properties, Domain and Atomic Structure of Specially Heat Treated Finemet Type Materials S. Szabó, R. Juhász, L. Pogány, L. Daróczi and D.L. Beke	477
Mechanical Properties of Seals in High Pressure Sodium Lamp Z. Tóth, G. Steinbach and A. Juhász	483
