

Table of Contents

Preface

Structure of Thin Physisorbed Layers

L.W. Bruch 1

Metals in Intimate Contact

J.R. Smith and J. Ferrante 21

Chemical Trends of Schottky Barriers

J.D. Dow, O.F. Sankey and R.E. Allen 39

Phase Transitions in the Laplacian Roughening Model

D.A. Bruce 51

Interfacial Phase Diagrams and Equilibrium Crystal Shapes

M. Wortis 69

The Selection Principle of Dendritic Solidification the Snowflake Problem

E. Ben-Jacob 73

Crystals Defects in Curved Three-Dimensional Space

J.P. Straley 93

Microscopic Structure of Two-Dimensional Electron Glass

P.K. Kalia and P.D. Vashishta 99

Phase Transitions in Crystalline Polymers

P. Taylor 105

The Elastic Properties of Random Networks

M.F. Thorpe 125

Some Remarks on Diffusion on Fractals

H. Nakanishi 129

Nature of Electronic Wave Functions in Disordered Systems

C.M. Soukoulis and E.N. Economou 145

Defect Simulation and Supercomputers

A.B. Kunz 155

Quantum Simulations of Small Electron-Hole Complexes

M.A. Lee, R. Kalia and P.D. Vashishta 165

Theory of Superconducting Arrays in a Magnetic Field

D. Stroud and W.Y. Shih 177

Electronic Structure of Alloy Semiconductors

L.C. Davis 197
