

Table of Contents

Modelling Strain Induced Precipitation of Niobium Carbonitride during Multipass Deformation of Austenite C.M. Sellars and E.J. Palmiere	3
A New Model for Interpass Softening Based on the Strain Hardening Rate Prior to Unloading J.J. Jonas and E.I. Poliak	15
A New Frontier in Microalloying: Advanced High Strength, Coated Sheet Steels A.J. DeArdo, J.E. Garcia, M.J. Hua and C.I. Garcia	27
Grain Refinement in Steels through Thermomechanical Processing P. Hodgson, H. Beladi and M.R. Barnett	39
Thin Slab Direct Rolling of Microalloyed Steels J.M. Rodriguez-Ibanez	49
High Performance Bainitic Steels H.K.D.H. Bhadeshia	63
Precipitation of Microalloy Carbo-Nitrides Prior, during and after γ/α Transformation S. Zajac	75
New Microalloyed Steel Applications for the Automotive Sector D.K. Matlock, G. Krauss and J.G. Speer	87
Microalloying of Cold-Formable Multi Phase Steel Grades W. Bleck and K. Phiu-On	97
Effect of High Temperature Deformation on the Hot Ductility of Nb Microalloyed Steel F. Zarandi and S. Yue	115
Analysis of Mn Effect on Recrystallization Kinetics in High Nb Steels H.S. Zurob, G. Zhu, S.V. Subramanian, G.R. Purdy, C.R. Hutchinson and Y. Bréchet	123
Influence of Ti on Static Recrystallization in Near Net Shape Steels M. Arribas, B. López and J.M. Rodriguez-Ibanez	131
Strain Induced Precipitation in Model and Conventional Microalloyed Steels during Thermomechanical Processing R.M. Poths, W.M. Rainforth and E.J. Palmiere	139
Recrystallisation Driving and Pinning Forces during Hot Rolling of a Low Nb-Microalloyed Steel M. Gómez and S.F. Medina	147
Microstructural Evolution of Two Medium Carbon Microalloyed Steels during Hot Forging Process A. Al Omar, A. Chenaoui, R. Dkiouak, J.M. Cabrera and J.M. Prado	155
Continuous Casting of Microalloyed Steels. Influence of Composition and Operational Parameters in Billet Surface Cracking G. Alvarez de Toledo, A. Arteaga and J.J. Laraudogoitia	163
Mechanism of Microstructural Banding in Hot Rolled Microalloyed Steels S. Cai and J.D. Boyd	171
Evidence of Strain-Induced Precipitation on a Nb- and N-Bearing Austenitic Stainless Steel Biomaterial E.J. Giordani, A.M. Jorge and O. Balancin	179
Aspects of Production Hot Rolling of Nb Microalloyed High Al High Strength Steels R.M. Skolly and E.I. Poliak	187
Modeling of the Resistance to Hot Deformation and the Effects of Microalloying in High-Al Steels under Industrial Conditions F. Siciliano and E.I. Poliak	195
Application of Deformation to Improve Hot Ductility in the Peritectic Steel A. Rezaeian, F. Zarandi, D.Q. Bai and S. Yue	203
Problems Associated with Modeling Interpass Softening during Industrial Hot Strip Rolling E.I. Poliak and J.J. Jonas	211
Modeling of the Microstructural Evolution and Mean Flow Stress during Thin Slab Casting/Direct Rolling of Niobium Microalloyed Steels F. Siciliano and L.L. Leduc	221

The Microstructure Evolution of Nb, Ti Complex Microalloyed Steel during the CSP Process	229
R.Z. Wang, C.I. Garcia, M.J. Hua, H.T. Zhang and A.J. DeArdo	
Vanadium Microalloyed Steel for Thin Slab Casting and Direct Rolling	237
Y. Li and T.N. Baker	
Optimization of Rolling Conditions in Nb Microalloyed Steel Processed by Thin Slab Casting and Direct Rolling Route: Processing Maps	245
P. Uranga, A.I. Fernández-Calvo, B. López and J.M. Rodriguez-Ibane	
Processing of Niobium Microalloyed API Grade Steel on a Thin Slab Plant	253
C. Klinkenberg and K.-. Hensger	
Development of X60/X70 Line Pipe Steels through EAF-Thin Slab Casting Technology at Ezz Flat Steel, Ain Sukhna, Egypt	261
G.M. Megahed, S.K. Paul, T.A. El-Bitar and F. Ibrahim	
The Development of Vanadium Containing Steels Suitable for Thin Slab Casting	269
P.S. Mitchell	
Effect of Nb and V in the Development of Texture and Plastic Strain Ratio in Low Carbon Microalloyed Steels Produced by A.S.T. Technology	279
C. Mapelli, R. Venturini and A. Guindani	
Development of CSP® Processed High Strength Pipe Steels	287
C.-. Reip, W. Hennig, J. Kempken and R. Hagmann	
Austenite Grain Size of Thin Slab and Its Influence on Direct Hot Strip Rolling of Nb Microalloyed Steel	295
H.T. Zhang, G. Pang, R.Z. Wang and C. Liu	
Microstructural Control and DWTT Toughness in Thick-Walled Nb-Ti-V Microalloyed Linepipe Steels	303
K.M. Banks	
Cr Influence on Steel Microstructure and Kinetics of Austenite Decomposition at Near-Bay Temperatures	311
A. Samoilov, Y. Titovets, N.Y. Zolotorevsky, G. Hribernig and A. Pichler	
Influence of Boron on Dynamic Recrystallization and Continuous Cooling Transformation of High Strength Interstitial Free Steels	321
S.I. Kim, D.J. Paik, Y.S. Lee and S.H. Choi	
Kinetics and Microstructural Aspects of the Coupling between Deformation at the Austenitic State and Ferrite Transformation in Carbon Steels	329
S. Lacroix, D. Quidort, Y. Bréchet, M. Véron, M. Kandel and T. Iung	
Contribution to the Understanding of Austenite Stability in a 12Cr-9Ni-4Mo Maraging Steel	339
D. San Martín, N.H. van Dijk, Y. Yagodzinskyy, E. Brück and S. van der Zwaag	
Microstructure Evolution in Fine-Grained Microalloyed Steels	347
K.R. Lottey and M. Militzer	
Factors Limiting the Achievable Ferrite Grain Refinement in Hot Worked Microalloyed Steels	355
E. Novillo, E. Cotrina, A. Iza-Mendia, B. López and I. Gutiérrez	
Processing and Stability of Ultrafine Grained Structures in Some Microalloy Steels	363
L.X. Pan, L.P. Karjalainen and M.C. Somani	
Study on Ferrite Intragranular Nucleation in a V-Microalloyed Steel	371
S.F. Medina, M. Gómez, J.I. Chaves, P.P. Gómez and P. Adeva	
In Situ X-Ray Diffraction Measurements of Deformation-Induced Austenite to Martensite Transformation in a Multiphase TRIP Steel	379
L. Zhao, N.M. van der Pers, J. Sietsma and S. van der Zwaag	
Characterisation and Quantification of Complex Bainitic Microstructures in High and Ultra-High Strength Linepipe Steels	387
S. Zajac, V. Schwinn and K.H. Tacke	
Austenite Decomposition in Low Carbon Steels with Microalloy Additions	395
G.R. Gomez, M. Bühler and T. Perez	
Modeling Ferrite Grain Size Distributions during the Transformation of Hot Worked Austenite	403
R. Zubialde, B. López and J.M. Rodriguez-Ibane	
Ferrite Grain Size Refinement in Vanadium Microalloyed Structural Steels	411
D. Hernandez, B. López and J.M. Rodriguez-Ibane	

The Kinetics of the Isothermal Bainite Formation in 1%C-1.5%Cr Steel	419
N.V. Luzginova, L. Zhao, A. Wauthier and J. Sietsma	
Multiphase Steels: Structure-Mechanical Properties Relationships in the Cold Rolled and Continuous Annealed Condition	
J.I. Verdeja, J.A. Pero-Sanz and J. Asensio	429
Development of High Performance Nb-Added Hot Rolled Bainitic Steels Presenting a TRIP Effect	
C. Georges, S. Godet and P.J. Jacques	437
TRIP-Assisted Multiphase Steels with Niobium Additions. Microstructures and Properties	
V. Andrade-Carozzo and P.J. Jacques	445
Effect of Niobium on the Phase Transformation Behavior of Aluminum Containing Steels for TRIP Products	
N. Fonstein, O. Yakubovsky, D. Bhattacharya and F. Siciliano	453
Transformation Induced Plasticity (TRIP) Effect Used in Forming of Carbon CMnSi Steel	
J. Kliber, B. Mašek, O. Zacek and H. Staňková	461
Advanced Metallic Structural Materials and a New Role for Microalloyed Steels	
M. Korchynsky	471
Precipitation Strengthening in a Low Carbon Nb-Microalloyed Steel	
D.Q. Bai, F. Hamad, J. Asante and S. Hansen	481
Effect of Heat Treatment and Microalloying on Toughness of Cast Low Carbon Steel	
D. Jandová and J. Kasl	489
Mechanical Properties of Low-Temperature Bainite	
C. Garcia-Mateo, F.G. Caballero and H.K.D.H. Bhadeshia	495
Improvement of Low Carbon Steel Properties through V-N Microalloying	
I.H.M. Ali, I.M. Moustafa, A.M. Farid and R.J. Glodowski	503
The Unique Features of Reinforcing Steel Microalloyed with Nitrogen and Vanadium	
L.M. Panfilova, L.A. Smirnov and P.S. Mitchell	511
Application of Niobium in Quenched and Tempered High-Strength Steels	
K. Hulka, A. Kern and U. Schriever	519
Influence of Composition and Processing Conditions on Mechanical Properties and Fish-Scale Resistance of Microalloyed Steels for Double-Face Vitreous Enamelling	
J. Schöttler, V. Flaxa and K. Hulka	527
Processing Low and Ultra-Low Carbon Bainitic Steels with Excellent Property Combinations	
P.P. Suikkanen, J. Kömi and L.P. Karjalainen	535
Thermomechanically Hot Rolled High and Ultra High Strength Steel Grades - Processing, Properties and Application	
M. Klein, H. Spindler, A. Luger, R. Rauch, P. Stiaszny and M. Eigelsberger	543
Development of Low Carbon Microalloyed Ultra High Strength Steels	
A. Ghosh, B. Mishra and S. Chatterjee	551
Application of Nb-O Affinity in Clean Steel	
M. Imagumbai, H. Kajioka and H. Takechi	559
Development of NbTiB Microalloyed HSLA Steels for High-Strength Heavy Plate	
H. Meuser, F. Grimpe, S. Meimeth, C.J. Heckmann and C. Träger	565
Development of Low Carbon Microalloyed Bainitic Steels for Structural Plate Applications	
D. Ormston, V. Schwinn and K. Hulka	573
Influence of Severe Accumulative Rolling in a Low Carbon Microalloyed Steel	
H.S. Sim, K.B. Lee, H.R. Yang and H. Kwon	581
Development of Process Technology for Vanadium Containing, High-Strength, Low-Carbon, Heavy Plate and Its Trial Manufacture	
B.Z. Belenky, L.A. Smirnov, I.M. Srogovich and P.S. Mitchell	589
Influence of Deformation and Coiling Temperature on Mechanical Properties of a High Strength Pipeline Steel	
A.M. Elwazri, D.Q. Bai, F. Siciliano and S. Yue	597
The Effect of Thermomechanical Processing on the Structure and Mechanical Properties of Ni, Nb and V-Bearing HSLA Steels	
G.E. Kodjasirov, R. Sulyagin, A. Rudskoy and C. Apostolopoulos	605

Characterisation of Bimodal Grain Structures and Their Dependence on Inhomogeneous Precipitate Distribution during Casting	613
D.J. Chakrabarti, C.L. Davis and M. Strangwood	
Characterization of the Interaction of the Interstitial Atoms with the Substitutional Atoms and with the Dislocations in Extra-Mild Steels through Coupled Use of Thermoelectric Power and Internal Friction Measurements	623
V. Massardier-Jourdan, E. Le Patézour, F. Thiery, N. Lavaire and J. Merlin	
Low Temperature Solubility Limit of Copper in Iron	631
M. Perez, F. Perrard, V. Massardier-Jourdan, X. Kleber, V. Schmitt and A. Deschamps	
Dual-Phase Steels Characterization Using Magnetic Barkhausen Noise Measurements	639
A. Hug-Amalric, X. Kleber, J. Merlin and H. Petitgand	
Application of Coercive Field Measurements to the Evaluation of Recovery and Recrystallization in Cold Rolled Interstitial Free (IF) Steel	647
A. Martínez-de-Guereñu, M. Oyarzabal, F. Arizti and I. Gutiérrez	
Characterization of the Residual Stresses in Plastically Deformed Ferrite-Martensite Steels Using Barkhausen Noise Measurements	655
X. Kleber, A. Hug-Amalric and J. Merlin	
FE-SEM Study of Fine Nb Precipitates in Carbon Extraction Replicas	663
R. Varano, A.M. Elwazri, F. Siciliano, D.Q. Bai, R. Gauvin and S. Yue	
Characterisation of Niobium Carbide and Carbonitride Evolution within Ferrite: Contribution of Transmission Electron Microscopy and Advanced Associated Techniques	669
E. Courtois, T. Epicier and C. Scott	
Characterization of Strain Induced Precipitation of Nb in Microalloyed Austenite Using Classical and Novel Techniques	677
C. Iparraguirre, A.I. Fernández-Calvo, B. López, C. Scott, A. Rose, W. Kranendonk, B. Soenen and G. Paul	
Effect of Processing Parameters on Precipitation Reactions Occurring in a Ti-Bearing IF Steel	687
R. Kuziak, H. Hartman, M. Budach and R. Kawalla	
Vanadium Carbide Dissolution during Austenitisation of a Model Microalloyed FeCV Steel	695
D. Acevedo Reyes, M. Perez, S. Pecoraro, A. Vincent, T. Epicier and P. Dierickx	
Discussion on the Rate Controlling Process of Coarsening of Niobium Carbonitrides in a Niobium Microalloyed Steel	703
D. San Martín, F.G. Caballero, C. Capdevila and C. García de Andrés	
A Thermodynamic Database for Fe-Cr-Mn-Ni-Ti-S-C-N System	711
K. Oikawa, H. Mitsui and K. Ishida	
Computer Simulation of C-N-V Precipitates Evolution Based on Local Concentration Fluctuations	719
J. Aldazabal and C. Garcia-Mateo	
Cleavage Initiation in Ti-V-N and V-N Microalloyed Forging Steels	729
M.J. Balart, C.L. Davis, M. Strangwood and J.F. Knott	
Effect of Pearlite Structure on the Mechanical Properties of Microalloyed Hypereutectoid Steels	737
A.M. Elwazri and S. Yue	
Optimisation of V/N Ratios and Stelmor Cooling for Electric Arc Furnace Steels Used in Galvanised High Tensile Strength Wire Applications	745
A. Wallace, A. Brownrigg, P. Hodgson, L. Frawley and W. Heath	
Gears and Springs in Niobium Microalloyed Steels for Automotive Applications	753
J. Mougin, P. Dierickx, D. Robat and J. Rofes Vernis	
Influence of Vanadium Microaddition on the Microstructure and Mechanical Properties of High Strength Large Diameter Wire-Rods	761
L. Mendizabal, A. Iza-Mendia, B. López and J.M. Rodriguez-Ibabe	
Grain Refinement by Rapid Transformation Annealing of Cold Rolled Low Carbon Steels	771
P. Álvarez, C. Lesch, W. Bleck, H. Petitgand, J. Schöttler and J. Gil Sevillano	
Parameters Influencing the Bake Hardenability of Microalloyed ULC Steels	779
W.A. Al Shalfan, J.G. Speer and D.K. Matlock	
Effect of Hot Band Grain Size on the Anisotropy of Warm Rolled Low Carbon Steels	787
M. Sánchez-Araiza, S. Godet, P.J. Jacques and J.J. Jonas	

Relationship between Microstructure and Texture Development during the Early Stages of Annealing in Warm Rolled Low Carbon Steels

I.B. Timokhina, J.J. Jonas, S.P. Ringer, S. Bulcock and E.V. Pereloma

795

Influence of Second Phase Particles on Recrystallisation of Cold-Rolled Low Carbon Microalloyed Steels during Isothermal Annealing

C. Capdevila, T. De Cock, C. Garcia-Mateo, F.G. Caballero and C. García de Andrés
