

Table of Contents

Developing a Nanowriter System: Simulation and Experimental Set-Up of a Plasmonic-Based Lens Design	
C.K. Lee, C.L. Lin, D.Z. Lin, T.D. Cheng, C.K. Chang, L.B. Yu and C.S. Yeh	1
Nanometrology – Nanopositioning- and Nanomeasuring Machine with Integrated Nanopobes	
G. Jäger, T. Hausotte, E. Manske, H.-. Büchner, R. Mastylo, N. Dorozhovets, R. Füßl and R. Grünwald	7
Study of a Miniature Air Bearing Linear Stage System	
K.C. Fan, R.H. Yen and C.C. Ho	13
Development of Micro Metal Forming Manufacturing System	
H.J. Lee, N.K. Lee, S.M. Lee, G.A. Lee and S.S. Kim	19
Development of a Drop-On-Demand Micro Dispensing System	
W. Feng, J.Y.H. Fuh and Y.S. Wong	25
Mechanisms of Heat Transfer in Rotary Shaft of Rotating Machine with Nano-Sized Particles Lubricant	
S.C. Tzeng, W.P. Ma, C.H. Liu, W.Y. Jywe and Y.C. Wang	31
Fabrication and Mechanical Properties of Glass Fiber/Epoxy Nanocomposites	
J.L. Tsai, J.C. Kuo and S.M. Hsu	37
Determination of Residual Resist Layer Thickness in E-Beam Lithography Based on Energy Dispersive X-Ray Spectrometer	
Y.C. Lee, C.Y. Chiu, C.P. Liu, F.B. Hsiao and C.H. Chen	43
Development of Pressure Technique of Brake Nanofluids from an Arc Spray Nanoparticles Synthesis System	
M.J. Kao, C.H. Lo, T.T. Tsung and H.M. Lin	49
Applications of LIGA on Micro-Punching Process for Metallic Materials	
C.T. Pan, P.J. Cheng, S.C. Shen, M.F. Chen, R.Y. Wang, M.C. Chou and T.C. Wu	55
Development of Finite Element Analysis Scheme for Micro Forming Using Grain Element and Grain Boundary Element	
T.W. Ku, J.K. Lee and B.S. Kang	61
Fabrication and Characterization of 3D Aspheric Microlenses with Arbitrary Surface Profiles Based on a Novel Excimer Laser Contour Scanning Method	
Y.C. Lee and C.Y. Wu	67
Highly Sensitive Infrared Temperature Sensor for CMOS Compatible Thermopiles	
C.A. Huang and C.H. Shen	73
Diamond Tip Cantilever for Micro/Nano Machining Based on AFM	
J.W. Park, D.W. Lee, N. Takano and N. Morita	79
Finite Element Analysis of Room Temperature Nanoimprint Lithography Process with Rate Dependent Plasticity	
J.H. Song, H. Huh, S.H. Kim and H.T. Hahn	85
Transducing Mechanical Forces Using a Polymer Optical Grating Sensor	
W.C. Chuang, C.T. Ho, Y.R. Lian, C.K. Chao, R.F. Shyu and W.C. Wang	91
Absorption of a Micro-Particle for Laser	
C.Y. Ho and M.Y. Wen	97
Using the Hot Embossing Technology to Fabricate the Movable Component on Polymer Material	
C.H. Chien and H.M. Yu	103
Effect of Sacrificial Layer Sizes and Fabrication Process on Deformation Caused by Residual Stress of Center-Anchored Circular Plate	
M.J. Lin and R.S. Chen	109
Micro-Anode Guided Electroplating (MAGE) Control System	
D.L. Lee, J.C. Lin, P.F. Kao and S.B. Jiang	115
Fabrication and Mechanical Properties of MWNTs/Phenolic Nanocomposites	
M.K. Yeh, N.H. Tai and Y.J. Lin	121
A Valveless Micro Impedance Pump Driven by PZT Actuation	
C.Y. Wen, C.H. Cheng, C.N. Jian, T.A. Nguyen, C.Y. Hsu and Y.R. Su	127

Length Effect on Formation of Metallic Patterns by Nanoimprinting Process – Molecular Dynamics Simulation	
M.C. Cheng, Y.L. Hsueh, H.Y. Chen and C.K. Sung	133
Two-Dimension Three-Atom Removal Model for (110) Plane Nanocutting of Defectless Crystals of Copper, Nickel and Silver in [001] Direction	
Z.C. Lin and W.F. Huang	139
Mechanical Characterization of Thin Films by the Capacitance-Voltage Measurement of Microstructures	
Y.C. Hu, W.H. Gau and W.H. Tu	145
Thermo-Mechanical Effect on Nanostructure Formation Using Atomic Force Microscopy	
J.R. Hsu, C.C. Hsiao, C.K. Sung and C.L. Hsu	151
Dynamic Characteristics in High Precision Non-Contact Machine Tool Spindles	
J.C. Su and B.W. Huang	157
Dynamic Model Based on Genetic Algorithms of Prediction for the Thermal Deformation of Machine Tools	
C.W. Chang, M.H. Chu, Y.W. Chen, S.Y. Chien and Y. Kang	163
Effects of Preload on the Thermal Behavior of an Oil/Air Lubricated Spindle	
C.H. Wu and Y.T. Kung	169
Injection Molding Measurement and Analysis of a Plastic Part with Changes in Thickness Dimensions and Material Types	
R.Y. Jou	175
Compensation Control of Cutting Tool Position in Machining Non-Axisymmetric Optic Mirror Surface	
Y.L. Zhang, Z.M. Zhou and X. Zhang	181
Measurement of Five DOF Motion Errors in the Ultra Precision Feed Tables	
Y.J. Oh, C.H. Park, J.H. Hwang and D.W. Lee	187
Investigation of Electron Beam Welding on AZ91D-F Extrusive Plates	
C.T. Chi, C.G. Chao, C.A. Huang and C.H. Lee	193
Study on Shrinkage of Injection Molding Biodegradable Materials	
Y.L. Cheng and Y.W. Lee	199
Study on the Predictive Model for Shear Strength in Laser Welding Stainless Steel	
W.T. Chien and S.W. Chang	205
Fabrication of Light Guiding Plate of Double-Side Hot-Embossing	
C.H. Chien and Z.P. Chen	211
Fabrication of Micro Components to Silicon Wafer Using EDM Process	
F.T. Weng, C.S. Hsu and W.F. Lin	217
A Study of Liquid Cooling Heat Sink Fabrication and Development in Notebook	
A.C. Wang, K.Z. Liang, C.C. Liu and C.K. Yang	223
Study on Optical Properties of Microstructure of Lightguiding Plate for Micro Injection Molding and Micro Injection-Compression Molding	
Y.K. Shen, H.J. Chang and C.T. Lin	229
Development of a Novel Micro Wire-EDM Mechanism for the Fabricating of Micro Parts	
C.S. Lin, Y.S. Liao and S.T. Chen	235
Predictive Modeling of Scuffing Performance of Gear Oil with MoDTC Using Response Surface Methodology	
Y.R. Jeng and S.J. Hwang	241
The Development of a Novel Optoelectronic Level	
W.Y. Jywe and C.J. Chen	247
A Fundamental Modeling Approach for Nano-Grinding of Silicon Wafers	
H.T. Young, H.Y. Huang and Y.J. Yang	253
A Fast Auto-Focusing Method for Laser Diode Machine	
K.C. Lee	259
Characterization of Polycrystalline Si Films Produced by ArF Excimer Laser Irradiation	
T.T. Chen and C.Y. Chang	265
Fabrication of Rolling Mold for a 200μm Microlens Array by 3D LIGA-Like Processes	
J.C. Tsai, K. Liu and H.H. Yang	271

Experimental Analysis for Low-Temperature Poly-Si Films Produced by Using the Excimer Laser Annealing Method Y.R. Chen and L.S. Chao	277
Modeling Analysis of Excimer Laser Crystallization of a-Si Films with Nanosecond Temperature Response C.H. Chang and L.S. Chao	283
Reliability Prediction for 95.5Sn3.9Ag0.6Cu Solder Bump and Thermal Design for Lead Free System in Package with Polymer-Based Material H.C. Hsu and W.M. Hung	289
Study on Indentation-Sliding Contact Conditions between Semiconductor Terminal and Electrically Testing Probes H. Saiki, Y. Marumo, L.Q. Ruan, R. Haraguchi and M. Moriyama	295
An Experimental Study on the Effects of Abrasive Particle Sizes on Polishing Phenomena Y.R. Jeng and P.Y. Huang	301
Parametric Investigation of Laser-Assisted Direct Imprint (LADI) Technique C.Y. Lin, Y.C. Lee, F.B. Hsiao and C.H. Chuang	307
Advanced Process Control Expert System of CVD Membrane Thickness Based on Neural Network M. Chang, J.C. Chen, J.W. Chang and J.S. Heh	313
On the Wire Sweep Experiments and Predictions of Gold Wire for Semiconductor Wirebonding Technology H.K. Kung and B.W. Huang	319
A Monte Carlo Model for Analyzing the Effects on Radiometric Temperature Measurement in Rapid Thermal Processor J.C. Tsao and C.C. Su	325
Design and Analysis of SCARA Substrate Transfer Robot for Semiconductor and FPD Processing Cluster Tools C.H. Yau, W.R. Jong and H.H. Wang	331
Nanosecond Time Resolution In Situ Optical Reflection and Transmission Measurements during XeF Excimer Laser Interaction with Amorphous Silicon Thin Films C.C. Kuo, W.C. Yeh, C.B. Chen and J.Y. Jeng	337
Three-Dimensional Micro-Flow Measurement in a Capillary with a Diode Laser Micro-Particle Image Velocimetry C.T. Pan, P.J. Cheng, Y.M. Hwang, M.F. Chen, H.S. Chuang and C.T. Yang	343
A New Concept of Optical Encoder Displacement Sensors: Gray Encoding Patterns and a Curve Fitting Method Y.F. Fu, L.H. Shyu, Y.T. Chen, W.Y. Jywe and C.H. Liu	349
An Investigation on the Application of Cryogenic Ball Milling to Ibuprofen Particle and Its Characteristics K.Y. Rhee, H.K. Cho and J.S. Hong	355
Automatic Full-Field 3-D Profilometry Using White Light Confocal Microscopy with DMD-Based Fringe Projection L.C. Chen, W.C. Kao and Y.T. Huang	361
Development of a Non-Contact Tool Setting System for Precision Diamond Turning C.L. Chao, T.A. Cheng, D.C. Lou and C.W. Chao	367
A Genetic Approach on the PID Control of VCM for Auto-Focusing Laser Probe J. Torng, K.C. Fan and T.F. Lu	373
Abbe Error-Free Test Equipment for Nanometer-Order Measurements Y.C. Wang, E. Manske, G. Jäger and W.Y. Jywe	379
Temperature Effect on Tensile Behavior of Helical Multi-Shell Gold Nanowires J.S. Lin, S.P. Ju, Y. Peng and W.J. Lee	385
Experimental and Numerical Investigation into Mixing Efficiency of Micromixers with Different Geometric Barriers C.Y. Lee, C. Lin, M.F. Hung, R.H. Ma, C.H. Tsai, C.H. Lin and L.M. Fu	391
Combined TiO₂/SnO₂ Material with Adding Pt by Sol-Gel Technology for Humidity Sensor W.Y. Chang, Y.C. Lin, W.W. Ke, Y.S. Hsieh and N.H. Kuo	397
Modal and Stability Analysis of a Micro-Beam Structure Actuated by Electrostatic Force H.H. Yoo, K.S. Jung and S.J. Moon	403

Experimental Investigation of High-Resolution Injection Technique in Microfluidic Chips Y.N. Wang, C. Lin, S.T. Wu, C.L. Chang, H.T. Chen, C.H. Tsai and L.M. Fu	409
Droplet Formation Studies for a Piezo-Actuated Micro-Injector A.S. Yang, C.H. Cheng, W.M. Tsai and F.C. Hsu	415
A Micropump for Droplet Ejection C.H. Cheng, S.C. Chen and Y.C. Lin	421
Valveless Micropumps with One or Two Piezoelectric Buzzers Z.H. Hong and S.F. Hwang	427
Computational Modeling of Micro-Fluid Flow in a Tubular Microchannel C.M. Lin, T.H. Fang and W.J. Chang	433
A Silicon Oxide Hard Coating Deposited on Flexible Substrate by TMS - PECVD System D.S. Liu, Y.K. Liao, C.Y. Wu, F.S. Juang and C.T. Lee	439
Three-Body Microcontact Model of Rough Surfaces and Its Application on Polishing of Wafer J.H. Horng, J.S. Lee and D.C. Du	445
An Improved Sensing-a-String-Hole Device with Learning Mode for the Frame of the Racket J.J. Jiang	451
Precise Riveting Systems Using Networked PLCs for Remote Monitoring and Control via the Internet H.C. Lin	457
Research and Development on Control System of Multicoil Inside Solidification Combined Winding Machine B. You, L. Ding, J.Z. Xu, Z.Z. Yu and D.L. Jia	463
Stiffness of HSK Tooling System in High Speed Machining G.C. Wang, S.L. Wang, W.G. Wu and C.G. Shen	469
Development of Real Time Monitoring System Using Controller Area Network R.W. Huang and H.W. Huang	475
Development of an Open Architecture CNC System for a Wire-EDM Machine M.T. Yan, C.W. Huang and C.J. Wang	481
Precision Positioning of Piezo-Actuated Stages Based on Feedback Control with GA Modeling C.J. Lin and S.Y. Chen	487
Electronic Circuit Simulation and Digital PC-Based Implementation of Dynamic MRR Optimization T.S. Lan, K.S. Hsu, T.T. Chu, L.J. Yeh and M.G. Her	493
A Time Optimized Process Planning System for Mold/Die Polishing J.J. Wang, B.H. Wu and J.K. Hou	499
A Model for Acquisition of Implicit Design Knowledge Based on KDD J.M. Li, J. Yao and Y.M. Liu	505
An Immune Algorithm for Least Cost Advanced Tolerance Design Problem T.C. Chen and T. Hsu	511
Optimization for the Maximum Rectangular Block from an Arbitrary Closed Region Using GA J.S. Tsai and C.C. Cheng	517
The Predicted Model of Surface Roughness in Resharpener End-Mill for Tool Grinder H.S. Lu, B.Y. Lee, C.T. Chung and Y.L. Liu	523
Auto-Tuning Digital Control Based on Parameters Identification and Disturbance Observer C.S. Chen and Y.R. Lee	529
A Web-Based Embedded Sequential Controller with USB 1-N Wireless I/O Modules Y.H. Sheu, W.J. Li, Y.C. Chen and J.Y. Yang	535
A Study on Fuzzy Logic Theory to Predict the Process Parameters in GMA Welding Process I.S. Kim, J.S. Son, H.H. Kim, I.J. Kim and B.Y. Kang	541
Automatic Polishing of Super Accuracy Mirror Mold with Free-Form Surface by Curvature Analysis M.J. Tsai, J.J. Fang and J.F. Huang	547

Nonlinear Recursive Formulation for Kinematic and Dynamic Analysis of Robotic Manufacturing Systems Y.L. Hwang	553
Thermal Contact Residual Stress Analysis of Elastic-Plastic Bilayer Micro-Cantilevers with Platinum Electrodes L.W. Chen, C.Y. Lee, C.H. Tsai and Y.C. Chen	559
Analysis for Repairing the Cracked PVC Pipe K.C. Lee, Y.C. Liang and C.C. Lin	565
Development of a 3D Cutter Compensation Postprocessor System for Multi-Axis Machining C.H. She and C.C. Chang	571
A Relative Method for Finite Element Nonlinear Structural Analysis J.H. Choi, D.S. Bae and H.J. Cho	577
Tool Path Planning for Edge Quality Enhancement in Planar Milling of Free Form Contours C.H. Chu	583
Dynamic Analysis of Rigid-Body Mechanisms Mounted on Flexible Support Structures — Planar Case H.K. Sun, C.G. Chen and Y.C. Shen	589
Parametric Study of Spherical Micro-Lens Array R.F. Shyu, C.T. Pan and S.C. Lin	595
193 Excimer Laser Machined Electromagnetic Optical Scanning Mirror for a Laser Projection Display C.H. Lin, T.K. Hou and D.C. Wen	601
Studies on CCD On-Line Detection in Curve Grinding Y.H. Zhang, H.Q. Tang, Q.L. Bu and D.J. Hu	607
Skew Ray Tracing and Sensitivity Analysis of Paraboloidal Optical Boundary Surfaces C.K. Sung and P.D. Lin	613
Process Reengineering of Collaborative Mold Design and Manufacturing – A System Engineering Evaluation Approach A.J.C. Trappey and T. Lu	619
Development of an Intelligent Virtual Reality System for High Speed Machining J.J. Sheu and T.C. Fu	625
Development of a Virtual Controller Integrating Virtual and Physical CNC Y.C. Kao, H.Y. Chen and Y.C. Chen	631
A Micromachine-Based Flow Cytometer Chip Integrated with Micro-Pumps/Valves for Multi-Wavelength Detection Applications C.M. Chang, S.K. Hsiung and G.B. Lee	637
A Fully Integrated System for Cell/Particle Sorting in a Microfluidic Device Utilizing an Optical Tweezing and DIP Recognition Approach Y.S. Chien, C.H. Lin, F.J. Kao and C.W. Ko	643
Operation Principle and Simulation of Loop-Type Microfluidic Biochips Y. Chang, Y.P. Chang and K.Y. Cheng	649
Synthesis of Au Nanoparticles@Mesoporous Silica Templated by Neutral Block Copolymers: Application in CO Oxidation Y.Q. Yeh, C.W. Yen, H. Lin, Y.C. Lin and T.C. Chang	655
Using Magnetic Nanoparticles to Enhance Gene Transfection on Magneto-Electroporation Microchips M. Li, Y.C. Lin and K.C. Su	661
Quantum Dots CdSe/ZnS-Loaded Poly(D,L-Lactide-Co-Glycolide) Nanoparticles: Physicochemical Characterization and Application C.H. Yang, K.C. Lin, Y.H. Chang and Y.C. Lin	667
Study on Thin Wall Injection Molding Formability and Property of Graphite-Polymer Composite Bipolar Plate for Proton Exchange Membrane Fuel Cell C.L. Hsu and K.M. Chang	673
Optimization of Parameters Affecting Tool Wear in Titanium Acetabulum Cup Forging R.S. Lee and J.L. Jou	679
Application of FSQP to Inverse Estimation of the Constitutive Constants and Friction Coefficient in the Nosing Process Y.H. Lu, F.H. Yeh and C.L. Li	685

Influence of Die Material upon Formability and Galling of Hot-Dip Galvanized Steel Sheets Y.L. Lin, H.S. Li and H.S. Hwang	691
Application of Streamline Method and ANFIS for Determination of Anisotropic Optimal Blank in Cylindrical Cup Drawing F.H. Yeh, M. Wu and Y.H. Lu	697
Computer Modeling of Extrusion by the Rigid-Plastic Hybrid Element Method Y.M. Guo	703
An Elasto-Plastic Finite Element Analysis of the Hat-Type Drawing Process of Sheet Metal T.C. Chen and Y.M. Huang	709
A Study on the Effects of Mass and Velocity Factor for the Dynamic-Explicit FEM in the Upsetting Process C.H. Liu	715
Size Effects on Sheet-Metal Formability for Miniature Parts Q.C. Hsu	721
A Study of Optimum Blank in the Deep Drawing Process of Square Cup with Flange by Using Adaptive Network Fuzzy Inference System C.L. Li, Y.M. Huang and Y.W. Tsai	727
A Finite Element Analysis for the Forging Process of Hollow Spur Gear T.S. Yang and Y.C. Hsu	733
The Hydroforming of Micro-Square Tubes With Non-Equal Section and Dendritic Shape Y.C. Hsu, T.S. Yang, J.L. Wu and Y.X. Chen	739
Constructing the Predictive Models of Friction Coefficient Using Cylindrical Compression Testing Y.C. Hsu, T.S. Yang, S.Y. Sung and S.Y. Chang	745
Effect of Process Parameters on Forming Limits Based on Fracture Energy Diagram in Cold Forging S.T. Wang and R.S. Lee	751
Identification of Plasticity Parameters of Metallic Coatings by Means of Depth-Sensing Micro-Indentation H. Hamasaki and F. Yoshida	757
Prevention of Seizure in Deep Drawing Using Plastic Die Y. Harada, T. Murao, K. Mori, N. Tsuchida and K. Fukaura	763
Predictions of the Minimum Amounts of Preforming in the Radial Extrusion of Tubular Components F.C. Lin and S.Y. Lin	769
Fatigue Life Prolongation of Carburized Steel by Means of Shot-Peening S. Haga, Y. Harada and H. Tsubakino	775
Springback Behavior of an Invar Sheet and Its Perforated Form Y.C. Lee and F.K. Chen	781
Experimental Research on Grind-Hardening of 65Mn Steel J.D. Liu, G.C. Wang, Z. Wang and S.T. Fan	787
Using Borer-Shape Electrode in Electrochemical Smoothing of Hole P.S. Pa and H.H. Cheng	793
Surface Finishing of Plastic Injection Mold Steel with Ball Burnishing and Spherical Polishing Processes on a Machining Center F.J. Shiou and J.T. Chiu	799
The Characteristic of Abrasive Particle in Chemical – Mechanical Polishing H.J. Tsai, C.C. Chang, Y.R. Jeng and S.L. Chen	805
The Optimal Cutting-Parameter Design of Heavy Cutting in Side Milling for SUS304 Stainless Steel C.K. Chang and H.S. Lu	811
Effect of Loading Rate on the Delamination Behavior of Carbon/Epoxy Laminated Composites S.R. Ha, K.Y. Rhee, H.J. Kim and D.H. Jung	817
Autoresonant Tuning and Control in Ultrasonic Vibration Assisted Drilling Process Y.C. Chen, Y.S. Liao and J.D. Fan	823
Joint Design and Fabrication for Mechanical Elastic Self-deformation Micro-Assembly Technology C.L. Kuo and J.D. Huang	829

The Use of the Taguchi-Grey Based to Optimize High Speed End Milling with Multiple Performance Characteristics S.J. Hwang, Y.L. Hwang and B.Y. Lee	835
Ultrasonic Welding of Aluminum and Silicon Wafer K.M. Shu and H.R. Shih	841
Laser Cutting Quality of the Ceramic Slabs X.Y. Wang, W.J. Xu, R.K. Kang and Y.D. Liang	847
Ultrasonic Aided Electrical Discharge Grinding of Hard Materials Using a Metal Matrix Composite Electrode H.R. Shih and K.M. Shu	853
The Effect of Spindle Speed Variation on Chatter Suppression in Rotating-Tool Machining C.J. Li, A.G. Ulsoy and W.J. Endres	859
A Pulse DC Plasma Deposited Resistor Process F.L. Wen, Y.L. Lo, C.H. Lin and S.C. Mou	865
Finite Element Analysis of the Hydro-Mechanical Punching Process J.H. Yoon, H. Huh, Y.S. Lee, S.S. Kim, E.J. Kim, H.J. Park, T.H. Choi and H.J. Lee	871
Spiral-Layer Machining for Making Thin-Wall Structures M.K. Yeung and P. Orban	877
Development of Manufacturing Strategy - Influence of Technology Orientation and Customer Orientation: An Empirical Study Approach M.L. Tseng, J.H. Chiang and A.S. Chiu	883
A New Knowledge Discovery Model for Extracting Diagnosis Rules of Manufacturing Process Y.C. Tsai, C.H. Cheng and J.R. Chang	889
The Optimum Selection of a Parting Line for an Injection Mould Using FEM Database Management and Application Techniques J.C. Lin, S.Y. Lin, K.S. Lee, M.F. Lu and C.M. Yen	895
Effects of Human Factors on Performance of Advanced Manufacturing Technology: An Empirical Examination J.B. Song, D.S. Dai, D.B. Wang and Y.Q. Song	901
Simulation and Analysis for Layout of Aerospace Sheet Metal Process with Lean Concept C.K. Huang, H.M. Chang and C.H. Lin	907
Reliability Study of Cutting Tool Based on the Reliability-Dependent Hazard Rate Function W.S. Lin	913
A Deterministic Model for a Manufacture System with an Advance Purchase Discount P.S. You and C.M. Su	919
Creative Design of Metal Can Crushers with Eight Links W.H. Hsieh and T.S. Chang	925
Geometric Design of the Pinion with Two Circularly Arrayed Cylindrical Teeth for Roller Drives T.S. Lai	931
Constraint-Based Multidisciplinary Collaborative Design Method of Gear Drive L. Chen, C.H. Gao and G.D. Jin	937
A Simple Parameter Calibration Method for a Novel Controllable Mechanical Metal Forming Press K. He and R. Du	943
The Analysis and Modeling for Nutation Drives with Double Circular-Arc Helical Bevel Gears B. Gu, L.G. Yao, G.W. Wei, Y.J. Cai and J.S. Dai	949
Nondestructive Disassembly System for White Board Marker T.S. Chang, W.H. Hsieh, Y.-. Hsieh and C.H. Yang	955
The Influence of Serration on a Shaving Cutter with a Pre-Designed Relief Portion S.L. Chang, U.D. Wu, J.K. Hsieh, C.H. Tseng, S.D. Cheng and K.R. Chang	961
3D Model Based Design for Control of a Mechatronic Machine Tools System C.Y. Chen and C.C. Cheng	967
Automatic Inspection of Pipe Using Non-Contact Guided-Wave Technique with Enhanced Mode-Selectivity K.Y. Jhang and H.M. Kim	973

A Theoretical and Experimental Study on Precision Controlling of Generated Path of an Elastic Linkage J.Q. Liu and C. Zhang	979
Study on Eccentricity and Minimum Geometrical Center Distance of the Eccentric Involute Gears Transmission J.G. Han and G.C. Wang	985
Geometry Modeling for Indexing Cams Based on Screw Theory and Product of Exponential Formula Z.Y. Chang, Y.H. Yang, C. Zhang, S.B. Ding, B. Zhang, D.S. Tan and C.T. Zhu	991
A Kalman Filter-Based Automatic Rotor Dynamic Balancing Scheme for Electric Motor Mass Production C.Y. Tseng, T. Shih and J. Lin	997
An Algorithm for the Kinematic Design of Gear Transmissions with High Reduction Ratio L.C. Hsieh, H.S. Lee and T.H. Chen	1003
An Intelligent Tool Post in a Lathe C.L. Wu and K.S. Wang	1009
Kinematic and Dynamic Analysis for Closed-Loop Flexible Manufacturing Systems Using Nonlinear Recursive Method Y.L. Hwang and S.J. Huang	1015
A Novel Parallel Hybrid Motorcycle Transmission K.B. Sheu, T.H. Hsu and Y.Y. Hsu	1021
Developing a Moving-Coil Actuator for Nano-Imprint Lithography System J.C. Renn, Y.A. Yang and C.S. Chan	1027
Effect of Process Parameters on Coating Quality in Surface Coating Processes M. Jou and C.C. Lo	1033
Stability Analysis of the New Repetitive Learning Controller for Cutting Systems M.G. Her, J.M. Chen and M.I. Ho	1039
An Investigation of Nanoscale Tribological Characteristics for Different Geometrical Sliding Systems Y.R. Jeng, C. Su and C.M. Tan	1045
Deformation Characteristics of Wood Structures under Compression K. Yamaguchi, M. Otsubo, Y. Motomura, Y. Marumo, H. Shiozaki and T. Kawase	1051
An Innovative Technology for Measuring The Dynamic Characteristics of Pressure Sensors H. Chang, M.J. Kao, T.T. Tsung and J.L. Wu	1057
Manufacturing of Cardiac Models Through Rapid Prototyping Technology for Surgery Planning Y.L. Cheng and S.J. Chen	1063
Micro Fabrication Design of a Planar Methanol Sensor S.H. Liang, C.H. Tsai and C.L. Hsu	1069
Preparation and Characterization of the Modified Carbon Nanotubes Enhanced Epoxy Resin Composites K.C. Lee, H.H. Yu, S.J. Hwang, Y.S. Li, M.H. Cheng and C.C. Lin	1075
Elastic Buckling Analysis of Die Fins during Extrusion Y.M. Hwang, C.Y. Wu and G.I. Shin	1081
A New Class of Structured Light Patterns for 3-D Imaging Systems Y.C. Hsieh	1087
A Molecular Dynamics Investigation into the Cooling Characteristics of Ni and Cu Alloys at High Pressure M.H. Su and H.C. Chen	1093
Approximating the Minimum-Bounding Box of a 3D Model with Minimum Spans for Flush Edges T.H. Lin	1099
The Inverse Prediction of the Geometry of a Two Dimensional Plate with a Rectangular Cavity C.R. Su and C.K. Chen	1105
An Interactive Web-Based Learning System for Manufacturing Technology Education M. Jou and H.W. Zhang	1111
Performance Measurement of Implementing Manufacturing Execution System K.Y. Chen	1117

Optimization of Component Placement Scheduling for SMT Assemblies C.H. Kuo, M.D. Jeng, J.J. Wing and T.H. Wang	1123
Vehicle Clustering Phenomenon in Automatic Materials Handling Systems in 300mm Semiconductor Manufacturing D.Y. Liao	1129
Diagnosability of Semiconductor Manufacturing Equipment Y.L. Wen, M.D. Jeng and Y.S. Huang	1135
Design and Implementation of Emulators for a Real-World Automated Manufacturing Systems Using Scenario Y.S. Huang, T.H. Chung and Y.L. Wen	1141
A Hierarchical Self-Organizing Neural Network for Automatic Wafer Defect Inspection C.Y. Chang and C.W. Chang	1147
Prognostics for Ball Bearing Based on Neural Networks and Morlet Wavelet R.Q. Huang, L.F. Xi, C.R. Liu and J. Lee	1153
Coordinated Motion Control of Large-Scale Transporter for Conveying Heavy Frame Components in Ship-Manufacturing Y.H. Li, L.M. Yang and G.L. Yang	1159
Accelerated Life Testing under Variable Synthetic Stresses for Hydraulic Pump S.P. Wang and J. Shi	1165
A CAD Idea of Braided Composite and Establishment of Its Relation Model Z.X. Jiao, X.D. Wang and G.P. Huang	1171
Performance Analysis of a Novel 6-DOF Parallel-Kinematics Machine with Decoupled Motion Characteristics G.L. Yang and Y.H. Li	1177
Comparison Study of Contouring Control Systems C.C. Peng and C.L. Chen	1183
Control of Micro Press Using Magnetic Actuating Platform C.L. Chen and K.S. Li	1189
PID Tuning Rules for First-Order Plus Integrator Systems J.C. Shen, H.K. Chiang and W.Y. Jywe	1195
Tracking Control of Automatic Pipe Cutting Robot with Magnetic Binder S.S. Rhim and S.G. Lee	1201
Study of Hole-Machining on Pyrex Wafer by Electrochemical Discharge Machining (ECDM) Y.S. Liao and W.Y. Peng	1207
Polishing Glass-Ceramic Based Rigid Disk S.Y. Chen, S.C. Lin and H.H. Cheng	1213
Study on Thin Diamond Wire Slicing with Taguchi Method P.L. Tso, B.H. Yan and C.H. Lo	1219
Chemical-Assisted Mechanical Polishing of Diamond Film on Wafer H.H. Cheng and C.C. Chen	1225
Surface Finish in Machining of Dental Ceramics H.H. Cheng, S.Y. Lin and W.T. Lei	1231
Combination of Spray Forming and Metal Powder Productions by the Internal Mixing Atomizer with a Substrate M.R. Wang, P.J. Chen, J.R. Yang, J.S. Chiu, T.C. Lin and T.S. Lai	1237
Precision-Limit Positioning of a Linear Motor Nano Drive System C. Hsieh, J. Lin, J.C. Huang and C.H. Chen	1243
Design, Fabrication and Study of Micro-Electrospray Chips T.S. Leu and C.H. Teng	1249
Model Support Algorithm in Powder Based Three Dimensional Printer W.H. Lai, C.I. Cheng, M.U. Huang and H.M. Chang	1255
Geometry Influence of Reflectors for Infrared Rapid Heating on Micro-Injection Molding P.C. Chang and S.J. Hwang	1261
Contour Controller Design for Two-Dimensional Stage System with Friction C. Hsieh, K.C. Lin and C.L. Chen	1267

Prediction of Critical Blank-Holding Force Criterion to Prevent Wrinkles in Axi-Symmetric Cup Drawing	
H.S. Yoon, S. Alexandrov, K.S. Chung, R.E. Dick and T.J. Kang	1273
A 3D Slab Method in Cold Strip Rolling	
H.B. Ren, A.K. Tieu, C. Lu and G. D'Alessio	1279
Modelling of Friction Coefficient in Cold Strip Rolling	
A.K. Tieu, H.T. Zhu, C. Lu, C. You, Z.Y. Jiang and G. D'Alessio	1285
Modelling of the Development of Initial Crack under Hot Rolling Condition	
J.N. Tang, A.K. Tieu and Z.Y. Jiang	1291
Convolute Cut-Edge Design with a New Anisotropic Yield Function for Earless Target Cup in a Circular Cup Drawing	
J.W. Yoon, R.E. Dick and F. Barlat	1297
An Upper Bound Solution for Upsetting of Two-Layer Cylinder	
G.Y. Tzou and S. Alexandrov	1303
A Study on Rotating Compression Forming of Ring Based on the Upper Bound Method	
H.H. Hsu and G.Y. Tzou	1309
Influence of Casting Speed on Temperature and Flow Fields in Molten Pool during Twin-Roll Strip Casting Process	
X.M. Zhang, Z.Y. Jiang, X. Liu, G.D. Wang, L.M. Yang and A.K. Tieu	1315
