Preface

The 12th International Symposium on Eco-Materials Processing and Design (ISEPD2011) was held on January 8-11, 2011 at the Empress Hotel, Chiang Mai, Thailand. The ISEPD2011 provided a forum where researchers were able to present the most advanced and new scientific findings and technological developments in the field of eco-materials processing and design. The aim of the symposium was to overview the current status and to foresee the future trends in the field of eco-materials processing and design for energy, environment and related materials.

There were 12 plenary lectures, and a number of invited lecturers and poster presentations participated in 11 different sessions. Many fruitful and exciting research achievements were presented in the symposium, both as the fundamental subjects and application uses, such as solar sustainable energy, fuel cells, photochemistry, porous materials, biomasses, and bio-inspired technology for developing microstructure on superior surface as well as bulk properties. This symposium provided a good chance for scientists to communicate and exchange their opinions and ideas among them.

We would sincerely appreciate the International Advisory Committee, Organizing Committee, plenary lectures, and all participants. We do hope that the manuscripts of the proceedings of all presentations at the ISEPD2011 will be accepted as an original and valuable contribution to the literature in the filed of eco-materials processing and design.

Organizing Committee

Symposium Chair
Somchai Thongtem, Department of Physics and Materials Science, Faculty of Science, Chiang Mai University, Thailand

General Chairs
Koichi Niihara, Nagaoka University of Technology, Japan
Kozo Ishizaki, Nagaoka University of Technology, Japan
Soo Wohn Lee, Sun Moon University, Korea
Yubao Li, Sichuan University, China

Honorary Chairs
Pongsak Angkasith, President of Chiang Mai University, Thailand
Sampan Singharajwarapan, Dean of Faculty of Science, Chiang Mai University, Thailand

Academic Committee
Byung Hee Hong, Sungkyunkwan University, Korea
Lian Gao, Shanghai Institute of Ceramics, China
Takashi Tomita, The University of Tokyo, Japan
Jing Sun, Shanghai Institute of Ceramics, China
Jae Sung Lee, Pohang University of Science and Technology, Korea
Osamu Takai, Nagoya University, Japan
Lei Jiang, Chinese Academy of Sciences, China
L.D. Yu, Chiang Mai University, Thailand
Feng Pan, Tsinghua University, China
