

Table of Contents

Preface

Thermodynamic Properties of the Surface Phase from Fused Salts to Water	
M. Abraham, M.-. Abraham and I. Ziogas	3
Complexes in Polyvalent Metal - Alkali Halide Melts	
Z. Akdeniz and M.P. Tosi	11
Solubility Studies of the Ca-CaO-CaCl₂ System	
K.M. Axler and G.L. DePoorter	19
Spectroscopic and Electrochemical Investigations of Selected Aromatic and Heteroaromatic Compounds in Ambient Temperature Chloroaluminate Melts	
J.E. Coffield, S.P. Zingg, K.D. Sinerth, S. Williams, C. Lee, G. Mamantov and G.P. Smith	25
Surface Tension of Alkali-Metal Acetate Hydrated Melts	
S. Deki, T. Yanomaru, A. Kajinami and Y. Kanaji	33
The Effect of Possible Phase Changes on the Heat Conduction of Slags	
T. El Gammal and S. Odendahl	37
Gold Anions in Alkali Bromide Melts: Solubility and Optical Spectrum	
R. Erdmann, R. Wormuth and R.W. Schmutzler	45
Investigations of Complex Formation and Phase Diagrams of Molten Salts Related to the Oxidized Form of Sulphuric Acid Catalysts	
G.E. Folkmann, G. Hatem, R. Fehrmann, M. Gaune-Escard and N.J. Bjerrum	53
Neodymium Chloride and Alkali Chlorides Mixtures: Calorimetric Investigation and Modeling	
M. Gaune-Escard, A. Bogacz, L. Rycerz and W. Szczepaniak	61
BaF₂-NaF-ZrF₄ Melts: Experimental Thermodynamics and Modeling	
G. Hatem, M. Guane-Escard and M. Hoch	71
Structural Study of Molten CaCl₂-KCl System	
K. Igarashi, K. Tajiri, T. Asahina and M. Kosaka	79
Molecular Dynamics Simulation of Molten Mixture of Lithium Bromide and Lithium Iodide	
S. Itoh	85
Structural Analyses of B₂O₃-Cs₂O Glasses	
Y. Iwadate, T. Hattori and J. Mochinaga	93
Estimation of Excess Thermodynamic Functions of Aluminium Monochloride Dissolved in Alkali Chloride Melts	
G. Kaptay	101
Microstructure of the Metal-Molten Salt Interface	
A.I. Karasevskii, R.E. Kris and E.V. Panov	109
Catalytic Activity and Spectroscopic Investigations of the M₂S₂O₇/V₂O₅-SO₂/O₂/SO₃/N₂ System (M = Na, K and Cs)	
D.A. Karydis, K.M. Eriksen, R. Fehrmann, G.N. Papatheodorou and N.J. Bjerrum	115
High Temperature NMR Studies of Oxide Glasses and Melts	
H. Maekawa, Y. Inagaki, S. Shimokawa, Y. Nakamura, T. Maekawa and T. Yokokawa	123
Thermodynamic Modeling of the 3(Zr,Hf)Cl₄-2POCl₃ Distillable Molten Salt Composition	
D.F. McLaughlin	131
Structure of Molten Alkanoates: Order and Disorder Aspects	
T.A. Mirnaya	143
Short Range Structures of Several Rare Earth Chloride Melts	
J. Mochinaga, Y. Iwadate and K. Fukushima	147
Direct Observations of Marangoni Convection in Molten Salts	
T. Nakamura, K. Yokoyama, F. Noguchi and K. Mukai	153
Correlations between Structure, Spectra and Thermodynamics of Transition Metals Dissolved in Molten Chloroaluminate Solutions	
D.S. Newman, P.J. Tumidajski and M. Blander	159
X-Ray Diffraction Analysis of Molten AgCl under Ultra High Pressure	
H. Ohno, N. Igawa, T. Makita, K. Igarashi, T. Kikegawa and O. Shimomura	167

The Chemla Effect in Molten (Li,Cs) Cl - Electromigration and MD Simulation	175
I. Okada, S. Okazaki, H. Horinouchi and Y. Miyamoto	
Vapour Pressure and Thermodynamics of the System 1-Methyl-3-Ethyl-Imidazolium Chloride - Aluminium Chloride	183
H.A. Øye, M. Jagtoyen, T. Oksefjell and J.S. Wilkes	
Thermodynamiccis of MgCl₂ in Plutonium Electrorefining	191
G.S. Perry and R.F. Watson	
The Thermodynamic Properties of Molten PbO-PbCl₂PbS Solutions	199
C.A. Pickles and S.N. Flengas	
Construction and Thermodynamic Analysis of Molten Salt Phase Diagrams of Systems Containing Rare Earth Chlorides	217
Z.Y. Qiao and X.R. Xing	
Studies on the Behaviour of Hydrous Melts: The Non-Aqueous (Ag, Ti)NO₃+DMSO Liquid System from Thermodynamic and Volumetric Measurements	227
G.A. Sacchetto and Z. Kodejs	
Effects of Alkali Halides on Sodium Borate Melts by Means of Molecular Dynamics Simulations	237
N. Sawaguchi, K. Kawamura and T. Yokokawa	
Viscosity and Glass-Transition Temperature of Some Silicate Melts under Low and High Pressures	245
H. Taniguchi and E. Takahashi	
Solubility of FeCl₂ in Molten NaCl-AlCl₃	251
P.J. Tumidajski and M. Blander	
Careful (Partial) Oxidation of Methane Gas on Molten Metal Complexes	273
S.V. Volkov, V.A. Bandur and N.I. Buryak	
Vibrational Spectra of Fluoro and Oxofluoro Complexes of Nb(V) and Ta(V)	279
J.H. von Barner, R.W. Berg, N.J. Bjerrum, E. Christensen and F. Rasmussen	
Raman Spectra of Subvalent Mercury Species Formed during Electrolysis of HgCl₂ in Melts	285
G.A. Voyatzis, G.C. Carountjos and I.V. Boviatsis	
Pourbaix Diagram of Molten Oxide Mixture	291
T. Yokokawa, K. Kawamura and S. Denzumi	
EmF Studies of AgNO₃-KNO₃-NaNO₃ Melts	295
I.J. Zsigrai and K. Mészáros Szécsényi	
Electrochemical Properties of NbCl₅ or K₂NbF₇ Dissolved in NaCl-KCL Equimolar Mixture	305
L. Arurault, J. Bouteillon, J. de Lepinay, A. Khalidi and J.C. Poignet	
Electroreduction of Fluoniobate, K₂NbF₇, in Fused NaCl-KCl	313
A. Barhoun, F. Lantelme, M.E. de Roy and J.P. Besse	
Preparation of Electrode Materials by Elecrolytic Reduction of Molten Salts	321
J.P. Besse and M.E. de Roy	
Stability and Electrochemical Properties of Mono and Trivalent Indium Species in Fused LiCl-KCl Eutectic	327
J. Bouteillon, M. Jafarian, M. Mohamedi and J.C. Poignet	
Behaviour of Oxygen Reduced Species in Molten Na₂CO₃-K₂CO₃ Eutectic at 750-800°C: Correlation with the Oxidative Coupling of Methane	333
M. Cassir, G. Moutiers, C. Moneuse, J. Devynck and B. Tremillon	
Chemical and Electrochemical Behaviour of Tin Ions in ZnCl₂-xNaCl Molten Salts	341
Y. Castrillejo, D. Ferry, A. García, R. Pardo and P. Sanchez Batanero	
Fundamental Study of Electrodeposition of Chromium in Fused Salts by Pulse Techniques	349
E. Cherrat, K. Benslimane, F. Lantelme and M. Chemla	
Chemical and Electrochemical Behaviour of Chromium Containing Ions in the Molten Na₂CO₃-K₂CO₃ (58/42 MOL%) Eutectic Mixture at 800°C	357
P. Clae, B. Thirion and J. Gilbert	
Qualitative and Quantitative Electrochemical Studies of Multivalent Elements in Molten Oxide Glasses	365
P. Clae, J.-. Tilquin and J. Gilbert	
Impedance Measurements in KF-2HF Melts	373
D. Devilliers, H. Groult, O. Kerrec and M. Chemla	

Production of Fluorine with Large Amplitude AC Signals in KF-2HF Melts	381
D. Devilliers, B. Teisseyre, H. Groult and M. Chemla	
Electrochemical Determination of Arsenic (III) in Molten Sodium Hydroxide	387
R. Dorin and E.J. Frazer	
Electrochemical Behaviour of Niobium in CsCl-KCl-NaCl-NbCl₅ Melt	393
I. Elizarova, E.G. Polyakov and L.P. Polyakova	
Effects of Oxide on Anodic Behaviours of Graphite Electrodes in Fluoride Molten Salts	401
C. Guang-Sen, T. Oki, B. Pacaud and N. Tanaka	
Rotating Ring Disk Electrode in Molten Chloride Systems	409
Y. Ito, S. Hikino and K. Ema	
An Electrochemical Study of Tungsten Species in an Acidic Zinc Chloride-Sodium Chloride Melt	415
A. Katagiri	
Electrochemical Reduction of Niobium Ions in Molten NaCl-KCl	421
A. Khalidi, P. Taxil, B. Lafage and A.P. Lamaze	
Electrochemical Investigation of Diffusion of Lithium in Beta-LiAl Alloy at Room Temperature	429
N. Kumagai, Y. Kikuchi, K. Tanno, F. Lantelme and M. Chemla	
The Conventional Standard Potential of Alloys	435
V.A. Lebedev	
Electrochemical Reduction of Molybdenum from KF-B₂O₃-K₂MoO₄ Molten Salt System	443
G. Li and D.H. Fan	
Continuous Refining of Niobium in Molten Salts	449
G. Lorthioir, A. Saile and F. Basile	
The Auxiliary Electrode for TiCl₂ Electrolysis Design of Anodes	457
M. Maja, P. Spinelli, G. Morello and E. Serra	
The Auxiliary Electrode for TiCl₂ Electrolysis the Active Porous Mass	465
M. Maja, N. Penazzi, M. Gaido and M. Martano	
Electrodeposition of Aluminum from AlCl₃-MEIC-NaCl and AlCl₃-MEIC-LiCl Melts	473
M. Matsunaga, T. Miwa, Y. Inoue and K. Hosokawa	
Summerized Process in the Electrolysis of Cryolite-Alumina Melts	479
V. Moskvitin, V. Shchavelev and V. Shchavelev	
Intercalation of Fluorine into Graphite in the KF₂HF Melt	483
T. Nakajima, M. Tohma and Y. Kawabata	
Electrochemical Behaviour of Lithium Oxide in Equimolar NaCl-KCl at a Glass Carbon Electrode	491
V.N. Nekrasov, N.M. Barbin and L.E. Ivanovsky	
Thin-Layer Melt Electrolysis	499
A.A. Omel'chuk and O. Zarubitsky	
The Niobium Chemistry in Molten LiCl+KCl Eutectic	505
G. Picard and P. Bocage	
Electrochemical Experiments in Molten Sulphates for Simulating Hot Corrosion of Metallic High Temperature Materials	513
H.-. Rätzer-Scheibe	
Electrochemical Studies and Anode Reaction Mechanisms of Al-Li Alloys and Li₂O-LiF-CaF₂ Melts	521
R.G. Reddy and A.R. Narayan	
Aspects of the Liquid Cerium Electrodeposition in Molten Halide Media	533
T.A.G. Restivo and E.J. Pessine	
Formation of Corrosion Resistant Niobium Coatings by Electrode-Position in Fluoride Melts	539
A. Robin, M.E. de Almeida and A.F. Sartori	
Standard Potentials of Lanthanide and Actinide Trichlorides in Molten Eutectic LiCl-KCl Electrolyte	547
J.J. Roy, L.F. Grantham, L.R. McCoy, C.L. Krueger, T.S. Storwick, T. Inoue, H. Miyashiro and N. Takahashi	

Metallurgical Electrochemistry: The Interface between Materials Science and Molten Salt Chemistry	555
D.R. Sadoway	
Electrochemical Reduction of Quinones from Molten Amides	561
S. Sampath and R. Narayan	
Electroanalytical Study of the Reduction of $KWCl_6$ in Molten LiCl-KCl Eutectic	569
C.A.C. Sequeira	
Development of AL-Mn Alloy Electroplated Steel Sheet from Molten Salt	577
A. Shibuya, J. Uchida, Y. Yamamoto, H. Seto and T. Tsuda	
The Electrochemical Process at the Interface of Carbon Electrode and Metal in the Baths for Refining of Aluminium	585
G. Sidorin and V. Moskvitin	
Electrolysis of Zr^{4+} in the Molten Fluoride System under Gamma-Ray Radiation Field	591
R. Takagi and G. Li	
Studies of the Electroreduction of Tantalum and Niobium in Fluorochloroaluminate Melts	595
V. Taranenko, K.D. Sienerth, N. Sato, A.G. Edwards and G. Mamantov	
Anodic Behavior of Nickel and Nickel Based Alloy in a $CsF-HF-NH_4F$ System	603
A. Tasaka, K. Mizuno, A. Kamata and K. Nishimura	
Low Polarization Electrode Impregnated with Molten Metal Fluorides in Fluorine Cell	609
T. Tojo, J. Hiraiwa, Y. Chong and N. Watanabe	
Kinetics of the Oxygen Electrode Reactions at Golden Electrode in Molten (Li/Na) Carbonate Eutectic	617
P. Tomczyk, L. Bieniasz and G. Mordarski	
Electrochemical Characteristics of Calcia Stabilized Zirconia Electrolyte in the Molten Alkali Chloride-Carbonate Systems	625
C.C. Yang and S.N. Flengas	
Research on Chemical Metallurgy of Al-Li Master Alloy in Molten Salt	637
M. Zhao, Y. Zhang, K. Chang and D. Tang	
Electrorefining of Titanium Metal in Molten Alkali Halide Mixtures	643
S. Zuca and N. Ene	
Amide Electrolyte Molten Systems: Mixtures Showing Megavalue of the Dielectric Constant	653
G. Berchiesi	
Molten Salts Reactions a Process for Fine Grained Solids Preparation	663
B. Durand and M. Roubin	
Temperature Dependence of the Vapor Pressures and Electrochemical Windows of the NH_4HF_2-HF Mixtures	669
D. Filliaudeau and G. Picard	
Investigation of the 1-Methyl-3-Ethyl-Imidazolium Chloride-$AlCl_3$ Melt for Lithium Battery Application	677
Y.S. Fung and S.M. Chau	
Global Measure for Energy & Environmental Problems by Thorium Molten-Salt Nuclear Energy Synergistics	685
K. Furukawa, A. Lecocq, K. Mitachi and Y. Kato	
Hydrotreating Properties of MoS_2 Catalysts Prepared from Thiocyanate Melts	693
C. Geantet, D.H. Kerridge, T. Decamp, B. Durand and M. Breyses	
Feasibility Study of Materials for a Medium-Temperature Reserve Cell Concept	699
C.O. Giwa	
High-Temperature Calibration Quality Data: Molten Salts and Metals	707
G.J. Janz	
Molten Salts Database for PC Users: Design and Development	715
G.J. Janz	
Molybdenum Alumosilicides Corrosion by Molten Salts	725
V. Kodash, P. Kisly and N. Krezhova	
Preparations of Ion-Exchanged Beta-Alumina by Employing Molten Salts and those Applications to Thermodynamic Investigations	735
Z. Kozuka and M. Itoh	
The Solubilization and Desulfurization of Coal in Low Temperature Chloroaluminate Melts	741
D.S. Newman, D. Chen and V. Nanayakkara	

High Temperature Corrosion of Nickel with Molten Alkali Carbonate Coating	749
K. Ota, B. Kim, H. Yoshitake and N. Kamiya	
Influence of the Environment in the Corrosion Kinetics of Different Superalloys at High Temperature in Eutectic Melt 60%V₂O₅-40%Na₂SO₄	757
E. Otero, A. Pardo, J. Hernàez, F.J. Pérez and M. Laguna	
Effect of Hydrogen Sulfide on Kinetics of Hydrogen Oxidation in Molten Alkali Carbonate	765
I. Uchida, S. Ohuchi and T. Nishina	
Studies on Pressurized Oxygen Electrode Reaction in Molten Alkali Carbonate	773
I. Uchida, K. Yamada and T. Nishina	
Gas Driven Electrolyte Flow and Its Implications for the Dynamics of Aluminium Smelter Cells	779
B.J. Welch, J.J.J. Chen, W.D. Zhang, J.M. Purdie and M.P. Taylor
