## Preface

|                                                                                                                                               |     |
|-----------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Photocatalytic Reduction of Carbon Dioxide by Water: A Step towards Sustainable Fuels and Chemicals</b>                                    |     |
| V. Jeyalakshmi, R. Mahalakshmy, K.R. Krishnamurthy and B. Viswanathan                                                                         | 1   |
| <b>Photocatalysts for Solar-Induced Water Disinfection: New Developments and Opportunities</b>                                                |     |
| W.J. Wang, J.C. Yu and P.K. Wong                                                                                                              | 63  |
| <b>Preparation and Characterization of Li-Doped ZnO Nano-Sized Powders for Photocatalytic Applications</b>                                    |     |
| I. Ganesh, P.S.C. Sekhar, G. Padmanabham and G. Sundararajan                                                                                  | 90  |
| <b>Degradation of Tannic Acid Powered by TiO<sub>2</sub> Nanoparticles</b>                                                                    |     |
| N.L. Kruthika, G.B. Raju and S. Prabhakar                                                                                                     | 117 |
| <b>Facile Fabrication of Single Crystalline Ceria Nanoparticles for Photo-Responsive Applications</b>                                         |     |
| D.P. Das, A. Dash and B.K. Mishra                                                                                                             | 127 |
| <b>Current Perspective of Semiconductor and its Composites with Unusual Surfaces for the Use of Photocatalysis: Review</b>                    |     |
| T. Selvamani and S. Anandan                                                                                                                   | 138 |
| <b>Recent Development on Titania Based Mixed Oxide Photocatalysts for Environmental Application under Visible Light</b>                       |     |
| N. Aman and T. Mishra                                                                                                                         | 186 |
| <b>Photolysis and Photocatalysis of 1,4 Dichlorobenzene Using Sputtered TiO<sub>2</sub> Thin Films</b>                                        |     |
| S.A. Mahmoud, E. Yassitepe and S.I. Shah                                                                                                      | 215 |
| <b>Photo-Catalytic Activity of Carbon/Nitrogen Doped TiO<sub>2</sub>-SiO<sub>2</sub> under UV and Visible Light Irradiation</b>               |     |
| H.H. Mungondori and L. Tichagwa                                                                                                               | 226 |
| <b>Sonochemical Decolourisation of Reactive Blue 21 and Acid Red 114 in the Presence of TiO<sub>2</sub> and Rare Earths</b>                   |     |
| Pankaj and S. Goyal                                                                                                                           | 237 |
| <b>Photocatalytic Degradation of Organic Pollutants: A Review</b>                                                                             |     |
| R. Ameta, S. Benjamin, A. Ameta and S.C. Ameta                                                                                                | 247 |
| <b>Environmental Application of Photocatalysis</b>                                                                                            |     |
| S. Chaturvedi and P.N. Dave                                                                                                                   | 273 |
| <b>Manganese Loaded on Titania Surface by Impregnation Method for Photocatalytic Degradation of Reactive Red-3 Dye</b>                        |     |
| K. Wantala, A. Tosuwan and N. Grisdanurak                                                                                                     | 295 |
| <b>Photocatalytic Degradation of Alachlor on Fe-TiO<sub>2</sub>-Immobilized on GAC under Black Light Irradiation Using Box-Behnken Design</b> |     |
| K. Wantala, S. Neramittagapong, A. Neramittagapong, K. Kasipar, S. Khaownetr and S. Chuichulcherm                                             | 306 |
| <b>Degradation of Acid Red 27 in Sunlight Using TiO<sub>2</sub></b>                                                                           |     |
| J. Kumar and A. Bansal                                                                                                                        | 317 |
| <b>Photocatalytic Degradation of Dyes by Al<sub>2</sub>O<sub>3</sub>-TiO<sub>2</sub> and ZrO<sub>2</sub>-TiO<sub>2</sub> Nanocomposites</b>   |     |
| C. Karunakaran, P. Magesan, P. Gomathisankar and P. Vinayagamoorthy                                                                           | 325 |
| <b>Photocatalytic and Photoelectro-Chemical Study of Ferrites for Water Splitting Applications: A Comparative Study</b>                       |     |
| R. Dom and P. Borse                                                                                                                           | 334 |
| <b>Nano-Photocatalysts in the Treatment of Colored Wastewater - A Review</b>                                                                  |     |
| N. Divya, A. Bansal and A.K. Jana                                                                                                             | 349 |
| <b>Metal Doped Titanium Dioxide: Synthesis and Effect of Metal Ions on Physico-Chemical and Photocatalytic Properties</b>                     |     |
| S.I. Mogal, M. Mishra, V.G. Gandhi and R.J. Tayade                                                                                            | 364 |
