

Preface

Nanotechnology is now growing rapidly and meeting various applications in sciences and engineering. Nanotechnology is believed to solve many problems faced by mankind now and in the future. Among the fields in which nanotechnology will play very important role are energy and environment. These applications include the recovery and improvement of environment caused by pollution, efficient use of conventional energies, and development of renewable energies. Today, energy and the environment are among the priority fields that are fully considered by various countries. Therefore, it becomes very strategic to propose a symposium focusing on the applications of nanotechnology in solving the problems of energy and environment worldwide.

This symposium is expected to become an important forum for exchanging researches and experiences between scientists and industry counterparts, especially for those working in the corresponding fields. Especially for developing countries, this symposium is expected to produce new guideline or recommendation for governments or stakeholders for solving various problems faced by their countries in the fields of energy and environment.

Bandung, September 20, 2012

Chief of Organizing Committee

Prof. Mikrajuddin Abdullah

Committee

Chief:

Mikrajuddin Abdullah (Institut Teknologi Bandung)

Member:

Prof. Khairurrijal (Institut Teknologi Bandung)
Prof. Kikuo Okuyama (Hiroshima University)
Prof. I. Wuled Lenggoro (Tokyo University of Agriculture and Technology)
Dr. Ferry Iskandar (Institut Teknologi Bandung)
Dr. Veinardi Suendo (Institut Teknologi Bandung)
Prof. Hermawan K. Diponoro (Institut Teknologi Bandung)
Prof. Toto Winata (Institut Teknologi Bandung)
Prof. Satria Bijaksana (Institut Teknologi Bandung)
Dr. Brian Yuliarto (Institut Teknologi Bandung)
Prof. Heru Setiawan (Institut Teknologi Sepuluh Noverember)
Dr. Bambang Sunendar (Institut Teknologi Bandung)
Dr. Agus Purwanto (Universitas Negeri Sebelas Maret)
Dr. Puji Lestari (Institut Teknologi Bandung)
Dr. Camellia Panatarani (Universitas Padjajaran)
Dr. Irman Idris (Institut Teknologi Bandung)
Dr. Hendri Widiyandari (Universitas Diponegoro)
Dr. Muhammad Miftahul Munir (Institut Teknologi Bandung)
