

# Table of Contents

## Preface and Editorial Board

## Chapter 1: Physical Metallurgy

<b>Investigation of the Kinetic of a Bainitic Reaction upon Heating in a CuAlNiMn and a CuAlNiMnFe Shape Memory Alloy</b>	
M. Benke, V. Mertinger and P. Barkoczy	3
<b>A Unified Theoretical Framework to Model Bulk, Surface and Interfacial Thermodynamic Properties of Immiscible Liquid Alloys</b>	
Á. Végh, C. Mekler and G. Kaptay	10
<b>Comparative Study of Precipitation Hardened and Equal Channel Angular Pressed Powder Metallurgical Al-Alloy Samples</b>	
J. Pázmán, Z. Gácsi and G. Králíkcs	20
<b>Hf Particles Reinforced Cu-Zr-Al Amorphous Powder Produced by Milling</b>	
K. Tomolya, M. Benke, D. Janovszky and Á. Kovács	30
<b>Analysis of Lead in SnAg Based Solders Using X-Ray Fluorescence</b>	
D. Koncz-Horváth and Z. Gácsi	37
<b>The Role of Pb Impurity in SAC Solder Alloy</b>	
G. Gergely, A. Molnár and Z. Gácsi	42
<b>Description of the PM Process by Using Ishikawa-Analysis</b>	
A. Simon, K. Kovács, C.H. Gür, T. Pieczonka and Z. Gácsi	48
<b>Effect of High Rotating Magnetic Field on the Solidified Structure of Al-7wt.%Si-1wt.%Fe Alloy</b>	
A. Roósz, J. Kovács, A. Rónaföldi and Á. Kovács	57

## Chapter 2: Plastic Deformation

<b>The Constitutive Behavior of Al 7075 Aluminium Alloy under Hot Compression Test</b>	
T.S.B. Naser and G. Králíkcs	69
<b>Microstructure Characterization of Deep-Drawn DP780-Grade Dual Phase Steel</b>	
A. Filep and V. Mertinger	75
<b>Limitations in Measuring the Flow Stress</b>	
G. Králíkcs, A. Reé, K. Bobor and V. Szombathelyi	85
<b>Residual Stress Evolution during Fatigue Test of a Shot Peened Steel Sample</b>	
D. Cseh, V. Mertinger and J. Lukács	95
<b>Determination of the Onset of the Dynamic Recrystallization of a 7075 Al Alloy</b>	
T. Mikó and P. Barkoczy	105
<b>Modelling of Crown on Cold Rolled Aluminium Sheet</b>	
S. Pálinskás, G. Králíkcs and Z. Bézi	115
<b>Development of a Complex Optimizing Model of Wire Drawing Technology</b>	
S. Kovács and V. Mertinger	125
<b>Design Curves for High-Cycle Fatigue Loaded Structural Elements</b>	
Z. Koncsik and J. Lukács	135

## Chapter 3: Solidification

<b>A New Method to Examine the Annealing of Two Alloying Elements of 3004-Grade Cast Aluminum by Resistivity and Thermoelectric Power</b>	
F. Tranta	147
<b>Comparison of Measured and Numerically Simulated Angular Velocity of Magnetically Stirred Liquid Ga-In Alloy</b>	
C. Nagy, A. Rónaföldi and A. Roósz	157

<b>Investigation of Microstructure of Cast Iron by Color Etching</b>	167
I. Kardos and Z. Gácsi	
<b>Development of Amorphous and Microstructured Surface Layer by Laser Surface Treatment</b>	175
M. Svéda and A. Roósz	
<b>Effect of the Technological Parameters on the Thermal Conditions of Die-Casting Tool</b>	183
J. Dúl, Z. Leskó and B. Juhász	
<b>The Effect of Homogenization on the Annealing of Al-1,5%Mn Aluminium Alloy</b>	193
T. Hegyes and P. Barkoczy	

## Chapter 4: Simulation

<b>Simulation of Isothermal Nucleation of Austenite in Spheroidite Plain Carbon Steels</b>	201
G. Karacs and A. Roósz	
<b>Modelling of Flow Properties of Asphalt Mastics</b>	209
R. Géber and L.A. Gömze	
<b>Simulation of Grain Coarsening Using One-Dimensional Cellular Automaton</b>	217
S. Gyöngyösi and P. Barkoczy	

## Chapter 5: Polymers

<b>Preparation and Evaluation of Novell Wood-PVC Systems</b>	225
T. Kuknyó and T. Szabó	
<b>The Effect of Technological Parameters on the Quality of UHMWPE Products</b>	233
I. Kállai	
<b>Effect of Crystallinity on PLA's Microbiological Behaviour</b>	241
E. Kun and K. Marossy	
<b>Tribological Testing Results Comparison by Microscope Techniques</b>	248
T. Szívós and G. Zsoldos	

## Chapter 6: Miscellanies

<b>The Effect of Aluminium and Nickel on some Spectral Lines of Alkaline-Earth Metals in the Course of ICP-AES Analysis</b>	259
O. Bánhidi	
<b>Modelling of Ion Distribution in Single, Binary and Ternary Ion Exchanged Zeolite Used for Biomedical Applications</b>	268
P. Kaali and G. Czél	
<b>Optimally Balanced Active-Passive Corrosion Protection by Zinc-Rich Paint Coatings Featuring Proper Hybrid Formulation with Polypyrrole Modified Carbon Nanotubes</b>	275
A. Gergely and T.I. Török	
<b>Laboratory Preparation and Characterization of Electroless Nickel Coated Powders of Industrially Produced Aluminium and Iron(III) Oxides</b>	284
T.I. Török, J. Pázmán, M. Szabó and V. Janó	
<b>The Effect of Micro-Impulse Current on the Morphology of Tin Electrodeposited from Chloride Solutions</b>	294
T. Kulcsár, Z. Dobó and T. Kékesi	
<b>Scanning Transmission Electron Microscopy Analysis of Diesel Soot Particles for Source Attribution</b>	304
Á.B. Palotás
