

Table of Contents

Preface and Organizing Committee

Chapter 1: Materials for Energy Conversion, Solar Cell and New Energy

Synthesis of Polyglycerol Fatty Acid Ester for Insulating Oil M.S. Gwon, Y.B. Ryu, D.W. Park and M.S. Lee	3
Preparation of the Catalyst for Methanol Steam Reforming from Cr-Zr Amorphous Alloys T. Matsusako, T. Kai, T. Nakazato, H. Kimura, T. Goto and H. Kato	7
Evaluation of Electric Power of SOFC Using Reformed Biogas N. Furukawa, Y. Hirata, S. Sameshima and N. Matsunaga	11
Optical and Photovoltaic Properties of CdS/Ag₂S Quantum Dots Co-Sensitized-Solar Cells A. Tubtimtae and M.W. Lee	15
Preparation and Electrical Conductivity of Sr(Zr_{1-x}Al_x)O_{3-x/2} Perovskite Solid Solution (x = 0-0.5) R. Oitate, Y. Hirata, S. Sameshima and N. Matsunaga	19
The Thermal Expansion Characteristics of Epoxy Resin/Crepe Paper Composites for High-Voltage DC Bushing N.K. Gao, C. Wu, W.X. Zhang, Z. Xu and H.Y. Jin	23
Fabrication and Thermoelectric Properties of Al-Doped (ZnO)₅In₂O₃ by Microwave Heating T. Endo, Y. Hayashi, J. Fukushima and H. Takizawa	27

Chapter 2: Photocatalysis and Semiconducting Materials

Nitrogen Doping to Metatitanic Acid by NH₃ Heat Treatment for Achieving Visible-Light-Responsive Photocatalytic Activity S.K. Park, J.H. Eun and H.H. Shin	35
Feasibility of Hydrothermal Nitrogen Doping Process for Enhancing Visible Light Photocatalytic Activity of Metatitanic Acid Powder S.K. Park, J.E. Woo and H.H. Shin	41

Chapter 3: Processing and Design for Eco-Materials

Preparation of Hematite by Drip Thermal Oxidation Using a Fluidized Bed for Conversion to Electromagnetic-Wave-Absorptive Magnetite T. Nakazato, Y. Iikuma and T. Kai	49
Fabrication and Consolidation of TiN_x by Pulsed Electric Current Sintering S.I. Suarez-Vazquez and M. Nanko	55
Fabrication and Characterization of Calcium Silicate Phosphors - Ca₂SiO₄ and Ca₂MgSi₂O₇ T. Watari, T. Tsuji, K. Mori, H.N. Luitel, T. Torikai, M. Yada, C.N. Xu and T. Terasaki	59
Recovery of Silicon and Silicon Carbide Powder from Waste Silicon Wafer Sludge W.T. Kwon, S.R. Kim, Y. Kim, J.B. Poudel and S.C. Oh	65
Characterization of Silicon Kerf and the Effect of Grinding on the Synthesis of SiC Powder W.T. Kwon, S.R. Kim, Y. Kim, Y.J. Lee, J.Y. Won, T.G. Ko and S.C. Oh	69
A Model for Stress History during Sintering of Ceramic Laminates K. Yasuda and P.L. Lv	73
Simulation Study on HPDC Process for Automobile Part with Aluminum Alloy H.K. Kwon and K.K. Seo	79
Effects of CNT Addition on Mechanical Properties, Electric Conductivity and Oxidation Resistance of Al₂O₃-TiC Composite H. Sano, J. Morisaki, G.B. Zheng and Y. Uchiyama	83

Eco-Fabrication of Metal Nanoparticle Related Materials by Non-Equilibrium Reaction Field

Y. Hayashi, Y. Sekiguchi, T. Yamada, K. Takizawa, H. Koubu, J. Fukushima and H. Takizawa

87

Synthesis and Characterization of Zeolite from Glass by Hydrothermal Processing

M. Tsujiguchi, T. Kobashi, J. Kanbara, Y. Utsumi, N. Kakimori and A. Nakahira

91

Enhancement of Grain Refinement and Formability of Cross Roll Rolled Ni-10Cr Alloy

K.H. Song, H.S. Kim and W.Y. Kim

95

Chapter 4: Bio-Inspired Materials and Hybrid Materials

Effect of Fiber Cross-Sectional Shape and Nano ZnO/Modified Chitosan Loading on Antibacterial Properties

N. Suwannamek, N. Ruangpaisarn and C. Prahsan

103

Linear Assembly of Oxidized Surface Treated Nanodiamonds in Polymer-Based Nanohybrids by Electric Field Inducement

S.T. Nguyen, H.B. Cho, T. Nakayama, M.T.T. Huynh, H. Suematsu, T. Suzuki, W.H. Jiang, S. Tanaka, Y. Tokoi and K. Niihara

107

Characterization of HA/Ta Composite Coatings Fabricated by Vacuum Plasma Spraying

L.P. Huang, Y.T. Xie, H. Ji, Y. Zeng and X.B. Zheng

113

Responses of Human Bone Marrow-Derived Stromal Cells to Calcium Silicate Coatings with Different Chemical Stability

Y.T. Xie, L.P. Huang and X.B. Zheng

117

Preparation of Copper Nanoparticles by Pulsed Wire Discharge in Water

Y. Tokoi, S. Nagasawa, H. Suematsu, H.B. Cho, T. Nakayama and K. Niihara

121

Oxidation of Tantalum Nitride

K. Hamaguchi, T. Tsuchiyama and J. Matsushita

125

Fabrication of Nanorod Array Structure by Using Aluminizing and Internal Oxidation of Ni with Micro-Channels

T. Ishizaki, D.T.M. Do and M. Nanko

131

Characterization of Hydroxyapatite Containing of Titanium Hydride Sintered Body by Nano Size Powder

K. Ishiwata, K. Tawara and J. Matsushita

135

Characterization and Cell Response of Novel Hydroxyapatite/Glyceride-Based Polyurethane Porous Scaffold

J.J. Du, Y. Zuo, Q. Zou and Y.B. Li

141

Chapter 5: Porous and Nanostructured Materials

Synthesis of Palladium Nanoparticles in Various Carbon Materials

M.A. Bae, J.H. Baek and M.S. Lee

147

Compressive Properties of Porous Aluminum Alloy Fabricated by Joining Pipes and Melt through Continuous Casting

J. Ichikawa, T. Hayashida and S. Suzuki

151

Effect of Pore Forming Agent on Microstructures and Properties of Porous Molybdenum

Z.L. Lu, X.J. Rao and X.F. Xu

157

Dispersion and Impact Strength of Epoxy Resin/Nano-Al₂O₃ Composites

N.K. Gao, Z. Xu, C. Wu, R.H. Li and H.Y. Jin

161

Relationship between Nitrogen Content and Mechanical Properties in Al_{1-x}Cr_xN_y Thin Films

T.H.T. Pham, F. Paumier, E. Le Bourhis and P. Goudeau

165
