

# Table of Contents

## Preface

## Chapter 1: Surface Topography and Coatings

### Formation of the Surface Layers of a Material with Shape-Memory-Based TiNiCo Diffusion Metallization

P.O. Rusinov and Z. Blednova 3

### The Surface Treatment Influence on the Occurrence of the Critical State Relating to the Needle as the Operating Tool

F. Pešlová, A. Pavůčková, M. Ďurovcová, L. Hajdúchová, M. Janeková, D. Košťaliková and S. Krum 7

### X-Ray Diffraction Analysis of Zn-Mg Coating in Dependence on Deformation

L. Zuzánek, O. Ridky, P. Solfronk, M. Kolnerová, J. Sobotka and N. Ganey 11

### The Study of Parameters of Surface Roughness by the Correlation Analysis

D. Draganovská, G. Ižariková, J. Brezinová and A. Guzanová 15

### The Effect of Shot Peening on the Surface Topography and Fatigue Strength of Selected Sheets

Ł. Bąk, M. Bucior, F. Stachowicz and W. Zielecki 19

### Adhesive Bonding Technology at Car - Body Structure – Application of New Coating with Layer Zn/Mg

M. Kolnerová, J. Sobotka, P. Solfronk and L. Zuzánek 23

### Testing of PVD Hard Coatings Applied to Coining Dies

D. Jakubéczyová, D. Kalincová and R. Kaštan 27

### Study of Selected Properties of Coatings Devoted to Extreme Tribo-Corrosive Conditions

A. Guzanová, J. Brezinová, J. Bronček, P. Maruschak and M. Landová 32

### Influence of Electrodeposited Coatings on Ultra-High-Cycle Fatigue Life of S235 Structural Steel

F. Nový, L. Trško, R. Ulewicz and S. Dundeková 37

### Non-Destructive Surface Diagnostics of Tools

M. Džupon, J. Balko and J. Brezinová 41

### Surface Finish Techniques for FDM Parts

I. Gajdoš, E. Spišák, L. Kaščák and V. Krasinskyi 45

### Evaluation of AlTiCrN Coatings Surface after Tribological Tests

J. Brezinová, D. Jakubéczyová and M. Landová 49

### Assessment of the Properties of Paint Films Containing Surface-Treated Silicates

K. Nechvilová and A. Kalendová 53

### Influence of Deformation on the Damage of Zn-Mg Based Protective Coating

P. Solfronk, J. Sobotka, M. Kolnerová and L. Zuzánek 57

### Properties of the Electro-Spark Deposited Coatings - Technology and Applications

N. Radek, J. Bronček, P. Fabian, J. Pietraszek and K. Antoszewski 61

### Morphology Characteristics of Coatings for Forming Applications

D. Draganovská, E. Evin and M. Tomáš 65

### Tribological Properties of Coatings for Sheet Metal Stamping Dies

E. Evin, B. Antoszewski, M. Tomáš, J. Tkáčová and D. Draganovská 69

### Influence of Pressure in the Nozzle Combustion Chamber on the Porosity and Hardness of WC - Co Coatings Created by HVOF Technology

J. Moravec and V. Kaška 74

### Properties Evaluation of Renovation Coatings Created by Thermal Spraying Technology

A. Mareš, J. Brezinová and D. Draganovská 78

### Investigation of Statically Deformed Aluminum Alloy Surface

P. Maruschak, I. Konovalenko, J. Brezinová and I. Zakiev 83

### Short-Term Corrosion Protection of Materials Using Nanocoatings

D. Pavelková, L. Koldová, J. Podjuklová, R. Siostrzonek, Z. Pěnička and V. Menshikov 89

|                                                                                                                                                                |     |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Change of Tribological Properties of Zn-Mg Coating in Dependence on Deformation</b><br>J. Sobotka, P. Solfronk, M. Kolnerová and L. Zuzánek                 | 93  |
| <b>Sorption Capable Film Coatings with Variable Conductivity</b><br>O. Grytsenko, E. Spišák, Ľ. Dulebová, V. Moravskii and O. Suberlyak                        | 97  |
| <b>The Influence of Modifying HDPE on Properties of the Surface</b><br>Ľ. Dulebová, T. Garbacz, V. Krasinskyi and B. Duleba                                    | 101 |
| <b>Heat-Resistant Coatings on the Basis of Phenol-Formaldehyde Compositions</b><br>V. Krasinskyi, E. Spišák, I. Gajdoš and T. Garbacz                          | 105 |
| <b>Analysis of Changes in the Surface Quality of a UD Prepregs Composite due to Mechanical Loading</b><br>M. Petruž, M. Syrovátková, T. Martinec and P. Lepšík | 109 |

## Chapter 2: Corrosion Processes and Corrosion Properties of Materials

|                                                                                                                                                                              |     |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Study of Calcium Phosphate (OCP) Electrodeposition Process on Elektron 21 Magnesium Alloy Surface</b><br>M. Omasta and B. Hadzima                                         | 115 |
| <b>The Causes of Corrosion Formation of Packaging Sheets after Plastic Deformation</b><br>E. Spišák, J. Majerníková and E. Spišáková                                         | 121 |
| <b>The Corrosion Characteristics of AlSi1MgMn</b><br>P. Lacková, M. Mihalíková, J. Cervová and A. Lišková                                                                    | 125 |
| <b>Corrosion of Dry - Bottom Boiler Evaporator in Power Industry</b><br>R. Maršál, J. Podjuklová, R. Siostrzonek, D. Pavelková, L. Koldová and Z. Pěnička                    | 129 |
| <b>Some Possibilities of Evaluation of Corrosive Resistance of Metal and Non-Metal Coatings</b><br>M. Hagarová, Z. Fečková, P. Lacková and J. Cervová                        | 133 |
| <b>Release of Metals from Cans during Short-Term Storage</b><br>M. Halama, T. Beyreder, D. Vasilková and D. Halamová                                                         | 137 |
| <b>Evaluation of Corrosion Resistance of Galvanized Steel Sheets Used in Automotive Production</b><br>L. Kašćák, J. Brezinová and J. Mucha                                   | 141 |
| <b>Electrochemical Characteristics of Mechanically Treated Metallic Surfaces</b><br>J. Brezinová, A. Guzanová, D. Draganovská and J. Koncz                                   | 145 |
| <b>Electrochemical Characteristics of Anodized Ti-6Al-4V Alloy</b><br>M. Ivašková, M. Lovíšek and K. Miková                                                                  | 149 |
| <b>Defectometry Analysis of Surface Condition Damaged with Corrosion Pitting</b><br>P. Maruschak, I. Konovalenko, A. Guzanová, P. Sydor and S. Panin                         | 153 |
| <b>Impact of Cathodic Protection on Selected Polymeric Coatings</b><br>M. Lovíšek, T. Liptáková, S. Dundeková and P. Šimko                                                   | 158 |
| <b>Corrosion Protection of Structural Steelwork by a Duplex Coating System</b><br>R. Siostrzonek, D. Pavelková, L. Koldová, J. Podjuklová and P. Strzyž                      | 162 |
| <b>The Influence of Substrate Surface Cleanliness on the Corrosion Resistance of Coating Systems</b><br>M. Hanák, J. Podjuklová, R. Siostrzonek, D. Pavelková and L. Koldová | 167 |
| <b>The Effect of Polypyrrole on Corrosive Properties of Organic Coatings Containing High Amounts of Zinc Metal Particles</b><br>M. Kohl and A. Kalendová                     | 171 |

## Chapter 3: Surface Treatment of Wood

|                                                                                                                                                                |     |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Morphological Changes on Spruce Wood Surface, Induced by Treatment with Dry Ice</b><br>J. Kúdela, L. Mrenica, I. Čunderlík and P. Šmíra                     | 177 |
| <b>The Sodium Water Glass in Surface Treatment of Chordophones</b><br>A. Danihelová, E. Ružinská and D. Spišiak                                                | 181 |
| <b>The Evaluation of Specific Environmental and Degradation Characteristics of Surface Treated Wood</b><br>E. Ružinská, V. Hagara, P. Jakúbek and K. Krajewski | 185 |

|                                                                                                                                                                                                                                |     |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Activity of Bacteria and Moulds on Surfaces of Commercial Wooden Composites</b><br>Z. Vidholdová, J. Iždinský, L. Reinprecht and J. Krokošová                                                                               | 190 |
| <b>Modified Method of Evaluation the Effect of the Protection Retardant Coatings Applied on the Surface of the Wood Building Construction</b><br>E. Ružinská, I. Mitterová, M. Zachar, A. Majlingová, V. Hagara and P. Jakúbek | 194 |
| <b>Photostability of Transparent Surface Coatings of Wood</b><br>G. Slabejová and Z. Vidholdová                                                                                                                                | 198 |
| <b>Adhesion of UV-Curable Coatings to Beech Wood</b><br>M. Štrbová, D. Tesařová and J. Kúdela                                                                                                                                  | 202 |

## **Chapter 4: Technological Properties of Materials for Mechanical Engineering**

|                                                                                                                                                         |     |
|---------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Tribological Research of Properties of Heat – Treated Cast Irons with Globular Graphite</b><br>J. Bronček, P. Fabian and N. Radek                    | 209 |
| <b>Measurement of the Limit Strains on TS 245 Tinplate</b><br>M. Tomáš, J. Slota, E. Spišák and J. Hudák                                                | 213 |
| <b>Clinching - An Innovative Trend in Joining of Combined Materials in Car Body Production</b><br>L. Kaščák, E. Spišák, E. Spišáková and I. Gajdoš      | 217 |
| <b>Quality Analysis of Welding Joints on Helically Welded Pipes</b><br>M. Gatíal, J. Viňáš and J. Pořák                                                 | 221 |
| <b>Evaluation of Welded Joints of Automotive Sheets</b><br>Š. Kender                                                                                    | 225 |
| <b>Analysis of Welds Made by Delta Spot Method</b><br>J. Viňáš and L. Kaščák                                                                            | 229 |
| <b>Analysis of Thrust Force and Torque in Drilling Process of Particle Board</b><br>K. Szwajka                                                          | 233 |
| <b>Analysis of Laser Welds on Automotive Steel Sheets</b><br>J. Viňáš and M. Ábel                                                                       | 239 |
| <b>Analysis of the Delamination in Drilling of Particle Board</b><br>K. Szwajka                                                                         | 243 |
| <b>Evaluation of Limit Deformations of Zn Coated High Strength Steel</b><br>M. Tomáš, E. Evin, S. Németh and J. Hudák                                   | 248 |
| <b>Wrinkling Prediction and Optimization of Sheet Metal Forming Process by Numerical Simulation</b><br>J. Slota and M. Šiser                            | 252 |
| <b>Ultrasonic Inspection of Thin Duplex Steel Welds by Phased Array</b><br>E. Hodulová, I. Kovaříková, B. Šimeková and K. Ulrich                        | 256 |
| <b>Parameters of Laser Welding and their Influence of Weld Seam</b><br>P. Balog, J. Brezinová and P. Pastorek                                           | 260 |
| <b>The Influence of Punch-Die Clearance on Blanked Edge Quality in Fine Blanking of Automotive Sheets</b><br>E. Spišák, J. Majerníková and E. Spišáková | 264 |
| <b>The Evaluation of Surface Quality for Particular Parts of Forging Die</b><br>P. Ižol and J. Beňo                                                     | 268 |
| <b>The New Knowledge of Environmentally Friendly Joints Made by Thermal Drilling</b><br>L. Sobotová and M. Badida                                       | 272 |
| <b>The Analysis of the Shape and Mass of the Frames of Assembly Presses</b><br>M. Stupavský and J. Bronček                                              | 276 |
| <b>RP Technology Used for the Production of Metal Parts</b><br>V. Čapková and I. Zetková                                                                | 280 |
| <b>Modification of Milling Tools and their Coating for Machining Sandwich Materials</b><br>T. Kroupa, T. Bakša, P. Hanzl and M. Zetek                   | 284 |
| <b>Analysis of Pearlitic Cold Drawn Steel Wire</b><br>M. Mihalíková, P. Lacková and A. Lišková                                                          | 288 |

## **Chapter 5: Plastics and Composites**

|                                                                                                                                                                              |     |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>X-Ray Microtomograph Detection of Internal Defects for a UD Prepreg Composite</b><br>M. Petřů, M. Syrovátková, M. Kolínová and O. Novák                                   | 295 |
| <b>Possibility of Increasing the Mechanical Strength of Carbon/Epoxy Composites by Addition of Carbon Nanotubes</b><br>B. Duleba, F. Greškovič, Ľ. Dulebová and T. Jachowicz | 299 |
| <b>Analysis of the Reason of Non-Homogeneity of Molded Part from Semi-Crystalline PPS</b><br>E. Spišák, B. Duleba and I. Gajdoš                                              | 303 |
| <b>Analysis of Short Glass Fiber Orientation in Injection Moulded Components</b><br>B. Duleba, F. Greškovič, J. Sikora and Ľ. Dulebová                                       | 307 |
| <b>Application of Natural Fibers in Hybrid Composite Materials</b><br>M. Dúbravčík                                                                                           | 311 |
