

# Table of Contents

Preface, Scientific Committee

## Chapter 1: Technology of Rolling and Thermomechanical Processing

<b>Effect of Parameters in the Physical Simulated Rough Rolling Stage on Microstructure Evaluation and Tensile Properties of a Bainitic Pipeline Steel</b> M. Soliman and H. Palkowski	3
<b>Development of Modern Steels for Strain Based Design Pipe Lines and Simulation Results</b> C. Heering, K. Tokmakov and I. Schuster	9
<b>Influence of Hot Rolling Condition on the Final Microstructure of Non-Oriented Electrical Steel Fe-3.2 wt.% Si</b> A. Stöcker, A. Franke, H. Hermann and R. Kawalla	16
<b>On the Correlation between Microstructure Homogeneity and Formability in Two Multi Phase Steels Treated with Different Cooling Strategies</b> M. Bechtold, M. Witte and S. Kluge	22
<b>Production of Directly Quenched High-Strength Hot-Rolled Strip Steels - Influence of Rolling and Cooling Conditions on Mechanical Properties and Flatness</b> J. Schöttler, T. Maiwald and G. Linke	29
<b>Material Aspects of Hot Rolling and Cooling Conditions for Strips from Martensitic Steel</b> M. Dziejczak, S. Turczyn and Z. Kuzminski	35
<b>Arvedi ESP Technology - The Hot Rolling of HS and AHS Thin Gauge Steel Strips</b> R. Venturini, P.D. Avancini, N. Barbier and A. Rizzi	42

## Chapter 2: New Materials, Special Forming Processes and Materials Characterization

<b>Substitution of Rare Earths in Magnesium Alloys</b> R. Hoppe, G. Kurz and D. Letzig	51
<b>Substitution of Rare Earth Elements in Hot Rolled Magnesium Alloys with Improved Mechanical Properties</b> K. Neh, M. Ullmann and R. Kawalla	57
<b>The Effect of Sheet Thickness, Loading Rate and Punch Diameter on the Deformation Behaviour of AZ31 during 3-Point Bending</b> F. Berge, H. Winderlich, C. Krbetschek, M. Ullmann and R. Kawalla	65
<b>Investigation of Texture Structure and Mechanical Properties Evolution during Hot Deformation of 1565 Aluminum Alloy</b> S. Rushchits, E. Aryshenskii, R. Kawalla and V. Serebryany	73
<b>Development of Rolling Technology for an Iron-Based Shape-Memory-Alloy</b> C. Leinenbach, C. Czaderski, J. Michels, M. Graf and R. Kawalla	79
<b>Rolling of Flat Aluminum Strips with Tailored Mechanical Properties</b> O. Grydin, S. Bondarenko, M. Stolbchenko and M. Schaper	87
<b>Skin Pass Rolling of High Manganese Steels</b> K. Köhler, N. Kwiaton and M. Bretschneider	93
<b>A New Strategy for Manufacturing Tailored Blanks by a Flexible Rolling Process</b> P. Hildenbrand, M. Lechner and M. Merklein	99
<b>Corrosion Resistant Plates for Pipes Operated in Sour Environments</b> M.Y. Matrosova, O.N. Sychev, A.M. Korchagin and O.P. Talanov	106
<b>Cyclic Tension Test of AZ31 Magnesium Alloy at Elevated Temperature Realized in a Miniaturized Uniaxial Tensile Test Setup</b> S. Suttner and M. Merklein	112
<b>Punch Stretch Test for TRIP690 and DP780 Steel at Elevated Temperatures</b> R. Krupa	118

<b>Effects of Process Parameter Variation on the Bonding Strength in Clad Steel Strips by Twin-Roll Strip Casting</b> D. Münster, M. Vidoni and G. Hirt	124
--	-----

## **Chapter 3: Mathematical Modeling and Numerical Investigation in Designing of Technological Processes**

<b>Thermo-Kinetic Modelling and Analysis of the Simultaneous Hot Stamping and Quenching of EN AW-6016-T4 Sheet</b> M. Kumar	133
<b>Modelling the Temperature Evolution During Hot Reversing Strip Rolling of Magnesium Alloys</b> A. Nam, U. Prüfert, M. Eiermann and R. Kawalla	140
<b>Physical and Numerical Simulation of Cold Rolling and Heating during Continuous Annealing of DP Steel Strips</b> L. Madej, N. Kwiaton, R. Kuziak, M. Sitko and M. Pietrzyk	146
<b>A New FE-Model for the Investigation of Bond Formation and Failure in Roll Bonding Processes</b> M. Pietryga, J. Lohmar and G. Hirt	152
<b>Implementation of a Dual Mesh Method for Longitudinal Rolling in QForm V8</b> D. Gerasimov, N. Biba, S. Stebunov and M. Kadach	158
<b>Hybrid Modeling of Materials Properties for Improved CAE-Simulations</b> U. Diekmann, A. Miron and A. Trasca	163
<b>Comparison of Numerical Simulation and Experiment for the Microstructure Development of a Cold-Rolled Multiphase Steel during Annealing</b> N. Kwiaton, R. Kuziak and M. Pietrzyk	167
<b>Material Models and their Capability for Process and Material Properties Design in Different Forming Processes</b> K. Schacht, U. Prahl and W. Bleck	174
<b>Computer Model STAN 2000 and its Use in Practice of Steels Hot Rolling on Mill 2000 of Severstal</b> A. Ogoltcov, D. Sokolov, S. Sokolov and A. Vasilyev	183

## **Chapter 4: Systems of Control, Automation and Measurements, Plant Layout for Production and Processing**

<b>Further Developments in Strip Thickness Measurement Laser-Based Strip Thickness Measurement</b> E. Roller	193
<b>New Opportunities for Process Optimization in the Metal Industry Using Laser Line Sensors for Thickness and Width Gauging</b> A. Sonntag	200
<b>Arvedi ESP for High-Quality Hot-Strip Production at Rizhao Steel</b> B. Linzer and A. Jungbauer	207
<b>Digitalization in Hot and Cold Rolling Mills</b> J. Ohlert, A. Sprock and P. Sudau	215
<b>Power Cooling</b> E. Opitz, A. Seilinger, L. Pichler, O. Silbermann and A. Rimnac	225
<b>The Virtual Rolling Mill – Enhancing Product Development and Commissioning</b> M. Klinkov and R. Feist	231
<b>Inline High Speed Laser Cutting of Band Material</b> A. Wetzig, J. Hauptmann, P. Herwig, E. Beyer, W. Bundschuh, S. Volk and M. Hemberger	237
<b>Industrialization of New Developments in the Lubrication System of the Coupled Tandem Mill AMEKO at ArcelorMittal Eisenhüttenstadt with Henkel AG</b> M. Tille, B. Staes, G. Sardo, A. Müller, T. Saffer and F. Fabian	243
<b>Numerical Investigation of a Process Control for the Roller Levelling Process Based on a Force Measurement</b> M. Grüber and G. Hirt	249

**Continuous Casting and Rolling Technology at MKM Mansfelder Kupfer und Messing GmbH – Optimisation of the Surface Quality for Conti-M<sup>®</sup> Strip**  
K.D. Palm, H. Busch and A. Dusdorf
