

Table of Contents

Preface, Committees

Chapter 1: Magnetohydrodynamics and Superconductivity

Effect of Tapered Metering Pin on Magnetorheological Fluid Subjected to Shock Loading Y. Shimizu, S. Takagi and T. Sawada	3
Behavior of both Nonmagnetic Particles and Magnetic Particles in Magnetic Compound Fluids in a Micro-Tube with Axial Flow under Rotating Magnetic Field Y. Ido, K. Asakura and H. Nishida	9
Dynamic Interfacial Phenomena at Water-Magnetic Fluid System Subject to Alternating Magnetic Field M. Nakanishi, S. Sudo and H. Nishiyama	15
Vibrating Properties of a Magnetic-Fluid Tuned Liquid Column Damper with Different U-Pipes S. Kondo, K. Ikari and T. Sawada	21
Characteristics in the Opening and Closing Operations of Micro Magnetic Fluid Diaphragm Mechanism by Alternating Magnetic Field S. Sudo, M. Nakanishi, M. Shinozaki and H. Nishiyama	26
Processing of Bulk MgB₂ Superconductors for Application in Fault Current Limiters T. Prikhna, V. Sokolovsky, V. Meerovich, M. Eisterer, A.G. Mamalis, A. Kozyrev, W. Gawalek, V. Moshchil, V. Sverdun, H.W. Weber, V. Kovylaev, W. Goldacker, M. Karpets, T. Basyuk, M.Z. Wu and N. Sergienko	32
Brushless Exciter Based on Nanomaterials for 1 MVA HTSC Wind Power Alternator L. Chubraeva, E. Evseev, S. Timofeyev, M. Turubanov, D. Volkov and S. Soleniy	38
Amorphous Alloy Cores for HTSC Electrical Devices L. Chubraeva, S. Timofeyev and D. Volkov	44

Chapter 2: Nanostructure Materials

New Developments of Mesoscopic Materials of Nano-Scale Particles for Optical and Dielectric Applications M. Matsuda, H. Shimoji and K. Yamada	53
Generalized Thin-Wire Hybrid VFETD/FDTD Schemes for Nanocomposite and Graphene Applications N. Kantartzis, T. Ohtani, Y. Kanai and T. Tsiboukis	58
Shockwave Response of Polymer and Polymer Nanocomposites J. Njoroge, A. Chakrabarty and T. Çağın	64
Thermophysical Properties of Anti-Parallel β-Sheets with <i>Bombyx mori</i> Silk Nanostructures [Gly-Ser-Gly-Ala-Gly-Ala]_n and [Gly-Ala]_n B. Aksakal, S.D. Günay, Ü. Akdere, T. Çağın and Ç. Tasseven	70
Thermomechanical Properties of Anti-Parallel β-Sheets with <i>Bombyx mori</i> Silk Nanostructures [Gly-Ser-Gly-Ala-Gly-Ala]_n and [Gly-Ala]_n S.D. Günay, Ü. Akdere, B. Aksakal, T. Çağın and Ç. Tasseven	74
Constitutive Modeling of Near-Equiatomic NiTi Shape Memory Alloys Considering Composition and Heat Treatment A. Cox, T. Baxevanis and D.C. Lagoudas	78
Monitoring Magnetic Nanoparticles in the Body A. Ferraro, A.G. Mamalis and E. Hristoforou	85
Features of Sintering of ZrO₂ Nanopowders and Composition with Different Content of Al₂O₃ A.G. Mamalis, E. Gevorkyan and S.N. Lavrynenko	92
Magnetofluorescent Nanocomposites Integrating Magnetic Nanoparticles and Near Infrared Quantum Dots for Tumor Cell Targeting X.S. Zhu	97

Synthesis of Superparamagnetic Nanoparticles for Desalination Purposes E.D. Metaxa, K. Berkesi, D. Musmarra, A.G. Mamalis and E. Hristoforou	105
--	-----

Chapter 3: Particular Advanced Materials and Characterization Techniques

Advanced Materials for Extreme Environment Aerospace Actuators L. Papini, C. Gerada, G. Kampitsis and A.G. Kladas	119
Vibrations in High Speed Boring Process of Bioengineering Polymers A.G. Mamalis, G. Tokhtar and S. Lavrynenko	125
Modelling of the Electric Field Applied to the Ensembles of Microparticles I.I. Iatcheva, G. Bojilov and I. Saykova	129
Exploitation of Piezoelectric Micro-Devices as Building Blocks of Controllable Terahertz Complex Materials A. Lalas, N. Kantartzis and T. Tsiboukis	135
Non-Destructive Evaluation of Materials by Magnetic Measurements Y. Tsuchida and M. Enokizono	141
Magnetic Barkhausen Measurements for Determining Residual Stress Distribution in Welded Electrical Steels P. Vourna, A. Ktena, A.G. Mamalis, E. Hristoforou, P.W. Chen and Q. Zhou	147
Effect of Cu Atoms on the Band Structure of CdTe M. Çalışkan, A. Öztoprak, S.D. Günay, T. Çağın and Ç. Tasseven	153
Electromagnetic Flow Meter Field Distribution Maximizing Device Sensitivity I.I. Iatcheva, A. Andreev, R.D. Stancheva and I.T. Lilyanova	157

Chapter 4: Computational Electromagnetics

Proposal of Hybrid Type Active Magnetic Bearing for Turbo Machinery Y. Okada, M. Touno, K. Matsuda, R. Kondo and T. Todaka	165
Characteristics of a Permanent Magnet Synchronous Machine Designed by a Topology Optimization Method T. Ishikawa, S. Mizuno and N. Kurita	172
Examination of a Split Transformer Arrangement for the Inductive Link of Contactless Power Transfer Systems E. Gati, A.G. Kladas and S.N. Manias	178
Electromagnetic Field Modelling Using FEM of the Active Part of Oil-Immersed Transformers E. Mechkov, R. Tzeneva, V. Mateev and I. Yatchev	184
Investigation of the Influence of the Electromagnetic Field in the Vicinity of High Voltage Overhead Line A. Chervenkov and T. Chervenкова	190
Development of the Two Pole Type Shaded Pole Self-Bearing Motor N. Kurita, T. Ishikawa and G. Suzuki	196
Model Predictive Control Employing Finite-Element Methods for Aerospace Actuators P. Kakosimos, M. Beniakar, A.G. Sarigiannidis and A.G. Kladas	202
A New Eddy Current Surface Probe with Perpendicular Coils I. Dolapchiev	207
Automatic Pain Detection in Video Sequences for Neuro-Rehabilitation N. Neshov and A. Manolova	213

Chapter 5: Electric Actuation and Traction Applications

Development of Actuator with Permanent Magnets Arranged in Halbach Array I. Murakami, S. Machida, T. Yamagami and Y. Ando	221
---	-----

Optimal Design of a Servo Motor for Energy-Saving in Oil Hydraulic System of Machine Tools	
C.C. Hwang, C.T. Liu and C.M. Chang	227
Comparison of Three Different In-Wheel SMPM Motor Configurations Based on the Urban NEDC	
C. Krasopoulos, M. Beniakar and A.G. Kladas	233
Design of the Maximum Transmission Torque for Cylindrical Magnetic Gears	
K. Uchibori, Y. Ando, I. Murakami and K. Chigra	239
3-D FEM and Lumped-Parameter Network Transient Thermal Analysis of Induction and Permanent Magnet Motors for Aerospace Applications	
T.D. Kefalas and A.G. Kladas	245
KERS Technology Coupled with Fuel Cell to Power City Bus with Solar-Hydrogen Energy Cycle	
G. D'Ovidio and C. Masciovecchio	251
Saturation Effects on the Parameters of Interior Permanent Magnet Synchronous Motors with Different Rotor Configuration	
G. Todorov and B. Stoev	257
Interior PM Motor Torque Control and Performance Analysis Considering Saturation and Cross Magnetization Effects for Electric Traction	
A.G. Sarigiannidis and A.G. Kladas	263
Particular SRM Design Methodology Based on Similarity Theory, Scale Factors and FEM	
A.P. Moschoudis, G.J. Tsekouras, F.D. Kanellos and A.G. Kladas	269

Chapter 6: Renewable Energy Applications

Study of Photovoltaic Systems' Performances with Different Module Types	
Z. Zarkov, L. Stoyanov, H. Kanchev, V. Milenov and V. Lazarov	279
A Tubular Linear Magnetic Gear/Generator Set for Harvesting Slow-Motion Renewable Energy	
C.T. Liu, C.C. Hwang and K.Y. Hung	285
Experimental Investigation of the Response of Different PLL Algorithms to Grid Disturbances	
G. Kampitsis, A.P. Tsoumanis, K.C. Gallos, S.A. Papathanassiou and S.N. Manias	291
The Study of Heat Consumption Systems of Buildings with Heat Pump	
A. Tsynaeva and K. Tsynaeva	297
An Algorithm to Detect Partial Shading Conditions in a PV System	
E. Batzelis and S.A. Papathanassiou	303
Comparison of Thin Film Modules Productivity for Building Integration	
L. Stoyanov, Z. Zarkov, G. Notton and V. Lazarov	309
Off-Grid Inverter Faults: Diagnosis, Symptoms and Cause of Failure	
E. Batzelis, K. Samaras, G. Vokas and S.A. Papathanassiou	315
Development of Temperature-Dependent SPICE Computer Models of Photovoltaic Cells	
E. Gadjeva and M. Hristov	322

Chapter 7: Electric Power Applications

Reducing the Losses in the Electrical Power System of Kosovo by Implementation of New Type of Transformers in the Power Distribution System	
R. Shaqiri	331
Development of Electric Current Sensor for the Device Protecting Electrical Wiring against Sparks	
A. Kovalyov, S. Soleniy and O. Solenaya	337
The Effects of Harmonics Generated by Industrial Loads in the Power System	
V. Rexhepi	343
Electric Machine Design through Investigation of Thermal Performance by Installing Thermocouple Sensors	
K. Disios, I. Mantas, A. Melanitis, E. Amoiralis and M. Tsili	349

Investigation of MEMS Piezoelectric Transformer with PVDF Thin Layer Y. Vucheva, G. Kolev, M.P. Aleksandrova and K. Denishev	356
Comparative Analysis of the Thermal Stress of Si and SiC MOSFETs during Short Circuits G. Kampitsis, S.A. Papathanassiou and S.N. Manias	362
Influence of the Ventilation Apertures on Low Voltage Switchboard Heating I. Yatchev, I. Hadzhiev and D. Malamov	368
A Fast-Converging Algorithm for the Efficiency Optimization of Vector Controlled Induction Motor Drives Based on a Hybrid Magnetic Flux Controller Architecture A. Alexandrou and A.G. Kladas	374
Modeling of the Processes in a Resistive Glass Melting Furnace in Heat Treatment of Glassware with Complex Form N. Tsvetkova and I.I. Iatcheva	380
